## **Suicide And Euthanasia:**

**New Directions in the Ethics of Assisted Suicide and Euthanasia** Michael Cholbi, Jukka Varelius, 2023-03-03 This book provides novel perspectives on ethical justifiability of assisted dying in the revised edition of *New Directions in the Ethics of Assisted Suicide and Euthanasia*. Going significantly beyond traditional debates about the value of human life, the ethical significance of individual autonomy, the compatibility of assisted dying with the ethical obligations of medical professionals, and questions surrounding intention and causation, this book promises to shift the terrain of the ethical debates about assisted dying. The novel themes discussed in the revised edition include the role of markets, disability, gender, artificial intelligence, medical futility, race, and transhumanism. Ideal for advanced courses in bioethics and healthcare ethics, the book illustrates how social and technological developments will shape debates about assisted dying in the years to come.

**Physician-assisted Suicide and Euthanasia in the Netherlands**, 1996      **Doctor Assisted Suicide and the Euthanasia Movement** Gary E. McCuen, 1999 Essays and articles by physicians, law enforcement officials, professors, and others present various opinions on doctor-assisted suicide and euthanasia.      *Euthanasia and Physician-Assisted Suicide* Gerald Dworkin, R. G. Frey, Sissela Bok, 1998-08-28 The moral issues involved in doctors assisting patients to die with dignity are of absolutely central concern to the medical profession, ethicists, and the public at large. The debate is fuelled by cases that extend far beyond passive euthanasia to the active consideration of killing by physicians. The need for a sophisticated but lucid exposition of the two sides of the argument is now urgent. This book supplies that need. Two prominent philosophers, Gerald Dworkin and R. G. Frey, present the case for legalization of physician-assisted suicide. One of the best-known ethicists in the US, Sissela Bok, argues the case against.      **Last Rights?** Michael M. Uhlmann, 1998 This rich and comprehensive anthology of primary sources is the essential reference work for anyone interested in understanding the arguments, moral, theological, medical, and legal, on both sides of the assisted suicide and euthanasia debate.      **The Future of Assisted Suicide and Euthanasia** Neil M. Gorsuch, 2009-03-23 From U.S. Supreme Court Justice and bestselling author Neil Gorsuch, an argument against the legalization of assisted suicide and euthanasia. *The Future of Assisted Suicide and Euthanasia* provides the most thorough overview of the ethical and legal issues raised by assisted suicide and euthanasia, as well as the most comprehensive argument against their legalization ever published. In clear terms accessible to the general reader, Neil Gorsuch thoroughly assesses the strengths and weaknesses of leading contemporary ethical arguments for assisted suicide and euthanasia. He explores evidence and case histories from the Netherlands and Oregon, where the practices have been legalized. He analyzes libertarian and autonomy-based arguments for legalization, as well as the impact of key U.S. Supreme Court decisions on the debate. And he examines the history and evolution of laws and attitudes regarding assisted suicide and euthanasia in American society. After assessing the strengths and weaknesses of arguments for assisted suicide and euthanasia, Gorsuch builds a nuanced, novel, and powerful moral and legal argument against legalization, one based on a

principle that surprisingly has largely been overlooked in the debate the idea that human life is intrinsically valuable and that intentional killing is always wrong At the same time the argument Gorsuch develops leaves wide latitude for individual patient autonomy and the refusal of unwanted medical treatment and life sustaining care permitting intervention only in cases where an intention to kill is present Those on both sides of the assisted suicide question will find Gorsuch s analysis to be a thoughtful and stimulating contribution to the debate about one of the most controversial public policy issues of our day

*Giving Death a Helping Hand* Dieter Birnbacher, Edgar Dahl, 2008-01-22 Public policy surrounding the hotly debated issue of physician assisted suicide is examined in detail You ll find an analysis of the current legal standing and practice of physician assisted suicide in several countries Authors discuss the ethical principles underlying its legal and professional regulation Personal narratives provide important first hand accounts from professionals who have been involved in end of life issues for many years

**Suicide and Euthanasia** B.A. Brody, 2013-04-17 *Euthanasia and Physician-assisted Suicide* Michael Manning (M.D.), 1998 A concise overview of the history and arguments surrounding euthanasia and physician assisted suicide *When Death is Sought* New York State Task Force on Life and the Law, 2000 *Physician-Assisted Suicide and Euthanasia* Sheldon Rubinfeld, Daniel P. Sulmasy, 2020-11-03 Unlike Nazi medical experiments euthanasia during the Third Reich is barely studied or taught Often even asking whether euthanasia during the Third Reich is relevant to contemporary debates about physician assisted suicide PAS and euthanasia is dismissed as inflammatory Physician Assisted Suicide and Euthanasia Before During and After the Holocaust explores the history of euthanasia before and during the Third Reich in depth and demonstrate how Nazi physicians incorporated mainstream Western philosophy eugenics population medicine prevention and other medical ideas into their ideology This book reveals that euthanasia was neither forced upon physicians nor wantonly practiced by a few fanatics but widely embraced by Western medicine before being sanctioned by the Nazis Contributors then reflect on the significance of this history for contemporary debates about PAS and euthanasia While they take different views regarding these practices almost all agree that there are continuities between the beliefs that the Nazis used to justify euthanasia and the ideology that undergirds present day PAS and euthanasia This conclusion leads our scholars to argue that the history of Nazi medicine should make society wary about legalizing PAS or euthanasia and urge caution where it has been legalized

**Euthanasia and Assisted Suicide** Michael J. Cholbi, 2017-01-26 This book addresses key historical scientific legal and philosophical issues surrounding euthanasia and assisted suicide in the United States as well as in other countries and cultures Euthanasia was practiced by Greek physicians as early as 500 BC In the 20th century legal and ethical controversies surrounding assisted dying exploded Many religions and medical organizations led the way in opposition citing the incompatibility of assisted dying with various religious traditions and with the obligations of medical personnel toward their patients Today these practices remain highly controversial both in the United States and around the world Comprising contributions from an international group of experts this book thoroughly investigates

euthanasia and assisted suicide from an interdisciplinary and global perspective It presents the ethical arguments for and against assisted dying highlights how assisted dying is perceived in various cultural and philosophical traditions for example South and East Asian cultures Latin American perspectives and religions including Islam and Christianity and considers how assisted dying has both shaped and been shaped by the emergence of professionalized bioethics Readers will also learn about the most controversial issues related to assisted dying such as pediatric euthanasia assisted dying for organ transplantation and suicide tourism and examine concerns relating to assisted dying for racial minorities children and the disabled

Regulating how We Die Linda L. Emanuel,1998 Addressing the subject of euthanasia medical ethicist Dr Linda Emanuel assembles testimony from leading experts to provide not only a clear account of the arguments for and against physician assisted suicide and euthanasia but also historical empirical and legal perspectives on this complex and often heart rending issue

*Terminal Choices* Robert N. Wennberg,1989 A discussion of the moral religious legal and personal issues surrounding euthanasia suicide and the right to die

*Assisted Suicide and Euthanasia* Mr Craig Paterson,2012-10-01 As medical technology advances and severely injured or ill people can be kept alive and functioning long beyond what was previously medically possible the debate surrounding the ethics of end of life care and quality of life issues has grown more urgent In this lucid and vigorous book Craig Paterson discusses assisted suicide and euthanasia from a fully fledged but non dogmatic secular natural law perspective He rehabilitates and revitalises the natural law approach to moral reasoning by developing a pluralistic account of just why we are required by practical rationality to respect and not violate key demands generated by the primary goods of persons especially human life Important issues that shape the moral quality of an action are explained and analysed intention foresight action omission action consequences killing letting die innocence non innocence person non person Paterson defends the central normative proposition that it is always a serious moral wrong to intentionally kill an innocent human person whether self or another notwithstanding any further appeal to consequences or motive

**Intending Death** Tom L. Beauchamp,1996 At the cutting edge of one of the most sensitive contemporary controversies this anthology presents the most current thinking of experts in the field of the ethics of assisted suicide and euthanasia exploring point blank issues that law and public policy have often skirted or wished away Explores issues from three perspectives philosophical clinical and political legal and economic

**Doctor Assisted Suicide and the Euthanasia Movement** Gary E. McCuen,1994 This book gives an introduction and overview of euthanasia discusses Dr Kevorkian and assisted suicide physician assisted suicide and more

**DYING TO KILL** Kieran Beville,2014-11-26 This is a comprehensive study of euthanasia and assisted suicide It traces the historical debate examines the legal status of such activity in different countries and explores the political medical and moral matters surrounding these emotive and controversial subjects in various cultural contexts The key advocates and pioneers of this agenda driven movement such as the late Jack Kevorkian popularly known as Dr Death and Philip Nitschke founder of Exit International are profiled Not only are the elderly and

disabled becoming increasingly vulnerable but children psychiatric patients the depressed and those who are simply tired of life are now on a slippery slope into a dystopian nightmare The spotlight is brought to bear on the Netherlands in particular where palliative care and the hospice movement are greatly underdeveloped as a result of legalization These dubious services are now offered as part of normal medical care in Holland where it is deemed more cost effective to be given a lethal injection The vital role of physicians as healers in society must be preserved and the important but neglected spiritual dimension of death must be explored Thus a biblical view of human life is presented Death and bereavement are universal phenomena and people of all faiths and those of none have a legitimate right to comment However the historic Christian tradition is struggling to be heard in the clamor for personal autonomy and civil liberties in a multi cultural society that is becoming increasingly secular This work provides an ethical framework in which euthanasia and assisted suicide can be evaluated These issues are on the radar indicating a collision course with Christian values It is time for Christians to be alert and to present the case that these are not satisfactory solutions to legitimate end of life concerns      **Physician-Assisted**

**Suicide: What are the Issues?** L.M. Kopelman,K.A. de Ville,2001-11-30 Physician Assisted Suicide What are the Issues offers a detailed discussion of recent supreme court rulings that have had an impact on the contemporary debate in the United States and elsewhere over physician assisted suicide Two rulings by the U S Supreme Court have altered the contemporary debate on physician assisted suicide Washington v Glucksberg 1997 and Vacco v Quill 1997 In these cases the Supreme Court ruled that state laws could prohibit assisted suicide and therefore physician assisted suicide These rulings mark the apex of over two decades of unprecedented litigation regarding end of life care and signal the beginning of a new clinical ethical and legal debate over the extent of an individual s rights to control the timing manner and means of his her death The debate over suicide and assisting suicide is ancient and contentious and intertwined with questions about the permissibility of voluntary active euthanasia or mercy killing Responses to these issues can be divided into those who defend physician assisted suicide and many of these other activities and those who object But those who object may do so on principled grounds in that they regard these activities as wrong in all cases or non principled in that they believe there are more prudent less disruptive or more efficient policies The authors in this book sort out these responses and look at the assumptions underlying them Several of these authors give startling new interpretations that a culture gap deeper and wider than that in the abortion debate exists      Euthanasia Lisa Yount,2002 Essays discuss euthanasia and the medical legal and ethical controversies surrounding it
