Suicide The Constructive destructive Self:

Suicide Coletta A. Klug, 1996 *Principles and Practice of Psychiatric Nursing - E-Book* Gail Wiscarz Stuart, 2012-07-23

Using the latest clinical research and diagnoses *Principles and Practice of Psychiatric Nursing* 10th Edition provides a holistic biopsychosocial approach to psychiatric nursing care. It follows the popular Stuart stress adaptation framework and includes comprehensive coverage to simplify important nursing and medical concepts, promote quality and safety in care, and address psychobiology and psychopharmacology topics integral to today's psychiatry. New to this edition is a chapter on psychiatric care of military personnel plus the latest on health care reform, prescription abuse, and obesity issues. Written by psychiatric nursing expert Gail W. Stuart, this market-leading text makes it easy to apply classroom theory to clinical practice. An easy-to-follow writing style makes it easy to understand both simple and complex topics. A well-rounded collaborative approach provides coverage of all major psychiatric disorders from nursing and medical perspectives. The Stuart Stress Adaptation Model of health and wellness provides a consistent nursing-oriented framework with clear explanations of biological, psychological, sociocultural, environmental, and legal/ethical components. An evidence-based practice approach bridges the gap between clinical research and everyday practice. Learning from a Clinical Case boxes begin disorders chapters with thought-provoking questions, and end chapters with answers and feedback. Summarizing the Evidence boxes in the disorders chapters examine the research and findings that support psychiatric nursing care. A family focus and discussions of outpatient care reflect current trends in psychiatric nursing. A Patient Speaks and A Family Speaks boxes present short vignettes with the patient's and family's perspectives of the caregiving process. Competent Caring: A Clinical Exemplar of a Psychiatric Nurse boxes feature the experiences and personal insights of practicing psychiatric nurses. Medical and Nursing Diagnoses boxes and Detailed Diagnoses tables emphasize the interdisciplinary approach to patient care by presenting NANDA diagnoses relevant to specific disorders and describing the essential features of the related DSM-IV-TR diagnoses. Nursing Treatment Plan Summary tables present care plans including patient goals with nursing interventions and rationales. Patient Education Plan and Family Education Plan tables include key information that you need to share with the patient and his or her family to facilitate shorter hospital stays and more outpatient care. Therapeutic Dialogue boxes offer examples of nurse-patient interactions. Clinical examples include selected nursing diagnoses. Focus Points provide a comprehensive point-by-point review of the important information in each chapter.

Understanding Suicide and Its Prevention Federico Sanchez, 2010-06

Finally a book that explains suicide using the latest research in suicidology. A must-read for mental health professionals and the survivors of suicide who want to understand why suicide happens. The material in this book should be incorporated into the curriculum of psychology and psychiatry because suicide is such a vital topic that is hardly covered in medical schools due to the lack of a coherent theory of the brain in general and suicide in particular. This is an important book for all professionals who deal with mental disorders in general and suicide in particular. It is the author's

fifth book where suicide is explained not as a mysterious process but as a natural consequence of the reactions of the brain under certain conditions when suffering mental disorders The author begins with a brief summary of the statistics of the whos the hows and the wheres of suicide This gives us a clear idea of the magnitude of the problem of suicide of the cost not only in lives but of the emotional toll of the survivors as well as the financial burdens on society as a whole Then as an important first step to understanding the medical community's standard approaches to mental disease he reviews briefly the current psychiatric terminology and the diagnostic tools concerning mental disorders He presents the most accepted current theories and models of suicide He explains what a psychiatric emergency is and what to expect if one ever encounters such a situation And he explains how suicide risk assessment is currently done along with other important considerations He proceeds to explain in everyday language where possible his theory of how the brain works beginning with a simple explanation of how neurons communicate with each other Later he explains how the brain controls the body and how we see with the back of our heads how memory systems become a logical extension or expansion of our sensory and motor systems Awareness and attention are introduced first as an evolutionary tool that aids the senses gather more information from the environment and ultimately as tools that aid in thinking reasoning and constructing our past our lives and our identities But all this would mean nothing without the introduction of emotions and how the brain constructs contexts He explains how emotions are an integral part of memories and how these are related to contexts how basically the brain has created a very concise and compact filing memory system A clear explanation of how emotions are triggered regulated and dissipated is next These lead to a learned discussion of how these various systems can go haywire causing mental disorders A brief but perhaps new and revolutionary approach to these mental disorders is presented next including Obsessive Compulsive Disorder Delirium Dementia and Other Amnesic Disorders Manic Depression and Depression and Schizophrenia Ultimately it becomes clear how under certain conditions these disorders can lead to suicide The difference between attempters and completers is also explained He then presents a suicide autopsy as an exercise to show how varied the opinions of experts in the field of suicidology are and compares it to his own theories and lets the reader decide for himself who is closer to the truth The fallacy of many expert opinions of where research needs to go is presented The book gives a few words of advice on various therapies and the rationality of their approaches and cautions against their limitations The book devotes a chapter to suicide prevention in the military and how these efforts are bound to fail and another chapter on suicide prevention The author makes important suggestions of how to prevent suicide and lessen suicide rates particularly among the young And lastly a chapter is devoted to the specifics of grief for suicide survivors

The Psychology of Death in Fantasy and History

Jerry Piven, 2004-03-30 This volume investigates the impact of death consideration on such phenomena as Buddhist cosmology the poetry of Rilke cults and apocalyptic dreams Japanese mythology creativity and even psychotherapy Death is seen as a critical motivation for the genesis of artistic creations and monuments of belief systems fantasies delusions and

numerous pathological syndromes Culture itself may be understood as the innumerable ways that societies defend themselves against helplessness and annihilation how they mould and recreate the world in accordance with their wishes and anxieties the social mechanisms employed to deny annihilation and death Whether one speaks of the construction of massive burial tombs magical transformations of death into eternal life afterlives or resurrections the need to cope with death and deny its terror and effect are the sine qua non of religion culture ideology and belief systems in general **Suicides Prevention and the Ex-Wife of Narendra Modi** Singh M Parashar,2021-01-14 The Test of morality of euthanasia The suicider should ask himself Can I do some service to society by tolerating the unbearable pain created cancer The suicider wants his parents to weep by sitting near his dead body The suiciders should be punished according to the old French custom that is by carrying them to the graveyard with their bodies pointing in the downward direction A divorce is better than committing suicide due to the homosexuality of the husband **Death as Entertainment** Gareth R. Schott,2023-06-06 This book explores the moral and representational issues associated with engaging young people with popular media depictions of death and dying Emotionally charged depictions of death play an important role in contemporary media directed toward teen and young adult audiences Across creative works as diverse as interactive digital games graphic novels short form serial narratives television and films young people gain opportunities to engage with representations of death In some cases representations of death dying and the decision to end one s own life have been subject to public outcry and criticism related to its perceived potential impact on impressionable audiences Death in as entertainment can also be fleeting commonplace and used for humour making it trivial The chapters in this volume particularly consider the types of engagement made possible through different contemporary creative mediums and the ways in which they might distinctively capture or arouse thoughts and feelings on the end and loss of a human life Death as Entertainment will appeal to researchers and students interested in new media and its cultural and psychological impact The chapters in this book were originally published as a special issue of Mortality **Report of the Secretary's Task Force on Youth Suicide** United States.
