Benatar,2012-05-15 While the manifestation of sexism against women is widely acknowledged few people take seriously the idea that males are also the victims of many and quite serious forms of sex discrimination So unrecognized is this form of sexism that the mere mention of it will be laughable to some Yet women are typically exempt from military conscription even where men are forced into battle and risk injury emotional repercussions and death Males are more often victims of violent crime as well as of legalized violence such as corporal punishment Sexual assault of males is often taken less seriously Fathers are less likely to win custody of their children following divorce In this book philosophy professor David Benatar provides details of these and other examples of what he calls the second sexism He discusses what sexism is responds to the objections of those who would deny that there is a second sexism and shows how ignorance of or flippancy about

discrimination against males undermines the fight against sex discrimination more generally *Accident & Emergency* Brian Dolan,Lynda Holt,2008 This edition shows nurses why they are doing what they do rather than just how for a range of A E conditions It has sections that cover potential problem areas such as paediatrics and treating the mentally ill A E patient A basic A P section is included so even the most experienced nurse can refresh their knowledge Students' Mental Health

*Spinoza and Deep Ecology* Eccy de Jonge, 2017-03-02 Spinoza and Deep Ecology explores the philosophical psychological and political assumptions that underpin a concern for nature offering specific suggestions how the domination of humans and nature may be overcome It is primarily intended as an introduction to the philosophy of ecology known as deep ecology and to the way Spinoza's philosophy has been put to this aim Only a self realisation along the lines of Spinoza's philosophy can afford a philosophy of care which is inclusive of humans and the non human world which recognises the need for civil laws and democratic politics for human flourishing In stark contrast to texts written by or on behalf of deep ecologists Spinoza and Deep Ecology is not afraid of criticising existing versions of deep ecology which fail to accept that human concerns are integral to environmental issues

and tests and were compared to non suicide terrorists This direct psychological examination enabled a first hand assessment of the personality characteristics and motivation of suicide bombers Additional interviews conducted by seasoned area specialists provided a comprehensive picture of the ways by which the suicide bombers were recruited prepared and dispatched to their planned death as well as how they felt and behaved along this road This information was supplemented by data derived from interviews with the families of suicide bombers who died carrying out their attacks The psychological makeup of suicide terrorists is put into context in other chapters of the book so as to provide an inclusive understanding of this phenomenon which takes into account public atmosphere and the ways in which terrorist groups influence the suicide candidates The book examines the characteristics of suicide terrorists in light of the most influential theories of suicide and offers a critical and innovative analysis of current explanations of suicide terrorism International Journal of Child & Family Welfare ,1997

M. Yasir Arafat,Mohsen Rezaeian,Murad M. Khan,2024-06-07 The book is about suicidal behavior in Muslim majority countries Islam is the second largest religion in the world There are also sizable Muslim populations in non Islamic countries Suicide is strongly prohibited in Islam and based on this tenet suicide and self harm

remain criminalized acts in many Islamic countries. When compared to the global estimates for suicide rates and to non-Islamic countries, Muslim majority countries have lower rates, indicating that Islamic faith and practice may be protective against suicidal behaviors. However, several factors such as criminal status stigma toward suicide, extreme dearth of research, low quality data, and under-reporting make it difficult to draw any firm conclusions. Hence, this book aims to do a deeper study of suicidal behaviors in Muslim majority countries, covering epidemiology, risk factors, and the challenges of suicide prevention in Muslim majority countries.
