F-105 Wild Weasel vs SA-2 'Guideline' SAM Peter E. Davies, 2011-12-20 A detailed account of the

suppression of North Vietnam's surface to air missile defences during the Vietnam War initiating a totally new concept of air war. The Vietnam War was the first conflict that saw extensive use of surface to air anti aircraft missiles and thus became a training ground for the tactics of this new type of battle as USAF pilots battled with supersonic Soviet ground to air missiles. Featuring illustrations throughout this instalment in Osprey's Duel series presents this story in the context of two of the main opponents America's top fighter bomber and the NVA's best anti aircraft missile. Ultimate Allied Fighters of the Second World War Justo Miranda, 2024-01-07. During the five years of the Second World War the power of engines and speed of aircraft increased as much as it did during twenty years of peacetime. Conventional aircraft and engines reached the limits marked in the original design and surpassed them very fast. The basis for this huge achievement was exotic fuels, short lived artificially overpowered engines, propellers with four, five and even six blades and thinner wings with special sections of laminar flow. Then the faster Allied fighters began to be attacked by a demon that lived in the air, scientists called it compressibility buffeting and different types of aircraft suffered it at different speeds and manifested itself in different ways. The American and British designers never understood the true causes behind the aerodynamic phenomenon. They were forced to adopt brute force solutions by increasing engine power on the turbojet powered fighters leaving in the background the research on the last projects of fighters driven by monster piston engines. The purpose of this book is to present them to the public for its notable interest.

Chrome Dome 1960-68 Peter E. Davies, 2024-07-18. In 1960 SAC's B-52s began a nonstop eight year nuclear armed patrol. Fully illustrated this study explains how one of the Cold War's most challenging operations was conceived and flown. Operation Chrome Dome was Strategic Air Command's unprecedented nuclear deterrence operation, a hugely elaborate and costly response to the perceived nuclear missile threat from the Soviet Union. In this book Cold War aviation historian Peter E. Davies explains how for eight years Chrome Dome required 12 B-52 Stratofortresses to maintain a ceaseless airborne alert within striking distance of Soviet targets orbiting over the Mediterranean and north of Alaska. Each bomber stayed aloft for 24 hours flying for around 10,000 miles until relieved by another. In each cockpit a top secret Combat Mission Folder contained details of the routes and procedures for a nuclear attack on a pre-determined Soviet target. Dramatic and controversial the years of unrelenting Chrome Dome missions saw several B-52 crashes and losses of nuclear weapons, most famously those in Greenland and off the Spanish coast. Drawing on first hand information from the personnel who flew and supported these gargantuan efforts and packed with archive photos, superb new artwork, maps and diagrams, this book offers an authoritative history of how SAC flew its most challenging operation of the Cold War.

A Nation in Flames Nick Armbrister, 2007-11. This is Nick Armbrister's first collection of short stories written from the late 90s to the present day. They cover several topics like his poems but in much more depth from satanic actions by people worshipping an evil god, Loss of the Ice Queen to warriors of the sky using man's most powerful weapons in anger, Final Flight to an attempt to control fate, Spell to Find Amelia Earhart and to a post nuclear townscape.

Second History set in Oldham Two of the stories are fragments of larger uncompleted lost work that deserve inclusion here One day these projects may well see the light of day but for now the author hopes the reader will enjoy his dark work in time he hopes to do a follow up These stories span his entire writing career Though he prefers poetry as a means of incisive concentrated power of expression he loves short stories for their fun even those that give one a glimpse into the dark side that lurks beneath the surface of life Nikita Khrushchev and the Creation of a Superpower Sergei N.

Soviet Weapons Gideon Blackwood, AI, 2025-03-21 Soviet Weapons explores the Soviet Union's rise as a military superpower detailing its unique approach to weapons development. It examines how the nation born from revolution managed to challenge the United States through innovative if sometimes unconventional military technology. The book highlights that Soviet designs weren't mere copies of Western systems but products of specific historical ideological and resource driven contexts. For example the T 34 tank renowned for its mass production and effectiveness showcases the Soviet prioritization of practicality over sophistication. The book investigates the Soviet military industrial complex emphasizing the interplay between technological innovation ideological imperatives and geopolitical strategy. It reveals how the Soviet Union often favored adaptability in its weapons systems allowing it to maintain parity with the West despite perceived technological gaps. Readers will gain insights into the design philosophies production histories and combat deployments of various weapons from tanks to nuclear arms. Beginning with an overview of the Soviet military industrial complex from the Russian Civil War through the Stalinist era the book progresses through detailed examinations of specific weapon systems categorized by type. It concludes with an analysis of the Soviet Union's lasting military technological legacy and its continued relevance in modern warfare making it valuable for those interested in military history and Cold War history

Soviet Aircraft Industry Peter G Dancey, 2017-04-22 Soviet aircraft industry was an essential part of the USSR's campaign for global dominance in the twentieth century. Thanks to the thick fog of secrecy that enveloped it throughout the Cold War it has long inspired the fascination of analysts and enthusiasts in the West until the collapse of the USSR in 1991 details of Soviet aircraft were often a matter of conjecture. This book aims to uncover fully the mystery surrounding this topic. Drawing on original and previously unpublished information obtained directly from the former USSR Soviet Aircraft Industry examines the unique characteristics of Soviet designed aircraft particularly military types which were the cause of great concern to the West. Further by virtue of the industry's central role throughout Soviet history this book provides a rare and important perspective into the broader theme of Russia's great communist experiment

War in Ukraine Tom Cooper, Adrien Fontanellaz, Edward Crowther, Milos Sipos, 2023-05-18 On 24 February 2022 eight years after invading the Crimean Peninsula of Ukraine and organizing an illegal referendum in support of a subsequent Russian annexation President of the Russian Federation Vladimir Putin ordered a full scale invasion of Ukraine. Both Western and Russian intelligence services expected the invasion to quickly topple the democratically elected government in Kyiv and with the help of collaborators to overrun the Ukrainian armed forces in a matter of between 3 and 14 days. Early on 24 February

the Armed Forces of the Russian Federation VSRF launched a series of missile and artillery strikes on the main air bases and dozens of other military facilities in Ukraine Immediately afterwards the VSRF launched a ground invasion with its forces advancing on Kyiv Chernihiv Kharkiv Mariupol Melitopol and Kherson Although following a build up that had begun in April 2021 and expected by many the onslaught still came as a major surprise for the Ukrainian government the Ukrainian armed forces and the majority of its allies in the West and also for the mass of officers and other ranks of the VSRF many of whom believed that they were only to participate in exercises However the deeper the Russians rolled into Ukraine the more resistance they encountered while some Russian units performed as expected elsewhere whole armies began falling apart when ordered to advance at maximum possible speed without the necessary firepower and logistic support After suffering catastrophic losses while failing to reach downtown Kyiv and failing to reach and enter Chernihiv and Kharkiv the war in northern and north eastern Ukraine quickly settled down into a bloody stalemate In the south the Russians initially advanced at an astonishing rate securing Melitopol during the second day of their invasion and Kherson only a few days later It was only once President Putin attempted to accelerate the rate of advance through ordering heliborne operations deeper into Ukraine that the VSRF suffered a severe blow in the fighting for Voznesensk and Mykolaiv and its advance in this part of the country also came to an end Richly illustrated with color photography and full color artworks and providing a detailed study of the organization and order of battle of the armed forces involved on both sides Volume 2 of War in Ukraine provides the first detailed account of the first two weeks of the Russian invasion of Ukraine in 2022
