Yellowstone in the Afterglow Mary Ann Franke,2000 **Between Two Fires** Stephen J. Pyne,2015-10-15 From a fire policy of prevention at all costs to today s restored burning Between Two Fires is America s history channeled through the story of wildland fire management Stephen J Pyne tells of a fire revolution that began in the 1960s as a reaction to simple suppression and single agency hegemony and then matured into more enlightened programs of fire management It describes the counterrevolution of the 1980s that stalled the movement the revival of reform after 1994 and the fire scene that has evolved since then Pyne is uniquely qualified to tell America s fire story The author of more than a score of books he has told fire s history in the United States Australia Canada Europe and the Earth overall In his earlier life he spent fifteen seasons with the North Rim Longshots at Grand Canyon National Park In Between Two Fires Pyne recounts how after the Great Fires of 1910 a policy of fire suppression spread from America s founding corps of foresters into a national policy that manifested itself as a costly all out war on fire After fifty years of attempted fire suppression a revolution in thinking led to a more pluralistic strategy for fire s restoration The revolution succeeded in displacing suppression as a sole strategy but it has failed to fully integrate fire and land management and has fallen short of its goals Today the nation s backcountry and increasingly its exurban fringe are threatened by larger and more damaging burns fire agencies are scrambling for funds firefighters continue to die and the country seems unable to come to grips with the fundamentals behind a rising tide of megafires Pyne has once again constructed a history of record that will shape our next century of fire management Between Two Fires is a story of ideas institutions and fires It s America s story told through the nation s flames Environmental Policymaking and Stakeholder Collaboration Shannon K. interagency disputes reluctant to take any risks in its operations and extremely responsive to political pressures As a result U S national parks are now managed mainly to serve political purposes Lowry illustrates how in the 1980s politicians pushed the NPS to expand private uses of national parks through development timber harvesting grazing and mining while environmental groups push the NPS in the other direction Over the same period the CPS enjoyed a clarification of goals and increased institutional supports As a result the CPS has been able to decentralize its structure empower its employees and renew its commitment to preservation Lowry considers several proposals to change the institutions governing the parks His own recommendations are more in line with proposals to revitalize public agencies than with those that suggest replacing them with private enterprise state agencies or endowment boards Lowry concludes that preserving nature should be the primary explicit goal of the park services and he calls for a stronger commitment to that goal in the United States
