THIS SUMMER'S SECRETS

A woman with long blonde hair, wearing a red and yellow striped one-piece swimsuit, is floating on her back in clear blue water. Her arms are outstretched, and her head is tilted back. In the background, a large, faint map of the world is visible, with several small white sailboats scattered across it.

Christopher W. Skinner,2009-06-01 The hypothesis that the Fourth Gospel is a theological response to the Gospel of Thomas is a recent development in the study of the New Testament and early Christianity Assuming an early date for the Gospel of Thomas the proponents of this hypothesis argue that the supposed polemical presentation of Thomas in the Fourth Gospel is evidence of a conflict between the early communities associated respectively with John and Thomas However a detailed narrative study reveals that the Fourth Gospel portrays a host of characters disciples and non disciples in an equally unflattering light where an understanding of Jesus s origins message and mission are concerned The present study attempts to demonstrate that the Fourth Gospel s presentation of Thomas is part and parcel of its treatment of uncomprehending characters If this thesis is correct it poses a significant challenge to the assumption that the Fourth Gospel contains a polemic against Thomas or that it

The United Nations and the Rationale for Collective Intelligence Bassey Ekpe, 2009 Taking as its central argument the question of whether an intelligence system is both desirable and feasible within the UN structure this study explores the complex and sometimes irreconcilable issues of strategic intelligence in a sharing context This study further identifies and develops both conceptual and empirical framework for a viable intelligence capability in multi agency institutions exploring and suggesting for the first time necessary and acceptable conditions for collective intelligence in an environment characterised by conflicting objectives among international actors It takes as its main premise the view that the United Nations and the world of intelligence are two separate and contradicting entities that conflict in both principles and operating doctrines From this point of view the author explores the many theoretical imperatives which set the two institutions apart and stand in the way of understanding the concepts He also goes further to examine the contexts in which the contradictions could be harmonised This book is one of a handful of studies it is highly original in that it focuses on the relationship between intelligence and the United Nations While previous efforts to examine the subject have approached it from a strictly practical point of view this work is clearly focused on the linkages between theory and practice The methodology is thoughtful and broad in scope and the work is theoretically well informed and sophisticated in its analysis of the subject matter The discussion of aspects of the theory of international relations specifically those relevant to the role of international governance and the examination of the working of the UN and several case studies of the UN in action are further characteristics of the rigor and clarity in which the author approaches the study in an intelligent and illuminating manner While the book s many contributions can be found at various levels of originality its thorough assessment of the linkage between theory and policy stands out perhaps as the most important and primary contribution to the areas of collective intelligence and international relations Other important contributions include the case study analyses and specification of criteria for evaluating collective security intelligence mechanisms In essence a lack of scholarly efforts to ground the notion of collective intelligence within a rigorous intellectual framework is a significant vacuum in the study of intelligence which the present study has filled Scholars working within the international relations discipline and more specifically issues of global governance and security will find this study invaluable The book should also appeal to many categories of readers working in information and policy environment as well as governmental and non governmental organisations
