**Spinning the Cosmos** Alica-Nana Citron, 2025-05-29 This open access book investigates the epistemological concept of and the knowledge transfer interwoven with the moveable paper wheels found in medieval and early modern books the so called volvelles The earliest known volvelles emerged in the mid thirteenth century and were cut out and installed by the reader often appearing in books dealing with astronomical subjects The brain processes and remembers images more easily than words the so called picture superiority effect especially if the images move making volvelles a useful method to help students of the Quadrivium memorizing the heavenly movements thus the composition of a device embedded within a text promises a comprehensive insight into the didactic concepts of early modern knowledge transfer The Tractatus de Sphaera by Johannes de Sacrobosco 1195 1256 the standard university textbook for astronomy from the thirteenth until the seventeenth century was particularly noted as containing volvelles of different kinds The project The Sphere located at the Max Planck Institute for the History of Science in Berlin has collected a corpus of 359 printed De sphaera editions building a promising basis for examining different volvelles and placing the results in a cultural context These volumes had never been analyzed in detail before nor was there such a large corpus that could provide a quantitative database for such an investigation The results of the book show that a book and knowledge tradition as widespread as that of the Sphaera contained more than one third of volvelles and was used in university teaching in the early modern period For historians this sheds light on a new aspect of movable paper instruments in university didactics and book history in the early modern period

The Power of Stars Bryan E. Penprase, 2010-10-17 What are some of the connections that bind us to the stars How have these connections been established And how have people all around the world and throughout time reacted to the night sky the sun and moon in their poetry mythology rituals and temples This book explores the influence of the sky on both ancient and modern civilization by providing a clear overview of the many ways in which humans have used the stars as an ordering principle in their cultures and which today still inspire us intellectually emotionally and spiritually The book explores constellation lore from around the world celestial alignments of monuments and temples both from ancient and modern civilizations and the role the sky has played in the cultures of the Greek Egyptian Babylonian Native American Chinese

Did the Exodus occur This question has been asked in biblical scholarship since its origin as a modern science The desire to resolve the question scientifically was a key component in the funding of archaeological excavations in the nineteenth century Egyptian archaeologists routinely equated sites with their presumed biblical counterpart Initially it was taken for granted that the Exodus had occurred It was simply a matter of finding the archaeological data to prove it So far those results have been for naught The Exodus An Egyptian Story takes a very real world approach to understanding the Exodus It is not a story of cosmic spectacles that miraculously or coincidentally occurred when a people prepared to leave Egypt There are no special effects in the telling of this story Instead the story is told with real people in the real world doing what real people do Peter Feinman does not rely on the biblical text and is not trying to prove that the Bible is true He places the Exodus within Egyptian history based on the Egyptian archaeological record It is a story of the rejection of the Egyptian cultural construct and defiance of Ramses II Egyptologists not biblical scholars are the guides to telling the Exodus story What would you expect Ramses II to say after he had been humiliated If there is an Egyptian smoking gun for the Exodus how would you recognize it To answer these questions requires us to take the Exodus seriously as a major event at the royal level in Egyptian history
