Mauldin, 2012-12-06 The infonnation revolution is upon us Whereas the industrial revolution heralded the systematic augmentation of human physical limitations by har nessing external energy sources the infonnation revolution strives to augment human memory and mental processing limitations by harnessing external computational resources Computers can accumulate transmit and output much more infonnation and in a more timely fashion than more con ventional printed or spoken media Of greater interest however is the computer s ability to process classify and retrieve infonnation selectively in response to the needs of each human user One cannot drink from the fire hydrant of infonnation without being immediately flooded with irrelevant text Recent technological advances such as optical character readers only exacerbate the problem by increasing the volume of electronic text Just as steam and internal combustion engines brought powerful energy sources under control to yield useful work in the industrial revolution so must we build computational engines that control and apply the vast infonnation sources that they may yield useful knowledge Information science is the study of systematic means to control classify process and retrieve vast amounts of infonnation in electronic fonn In par ticular several methodologies have been developed to classify texts manually by annies of human indexers as illustrated quite clearly at the National Library of Medicine and many computational techniques have been developed to search textual data bases automatically such as full text keyword searches In general **Report** United States. Rainbow's End Maury Klein, 2003-05-01 Rainbow's End tells the story of the stock market collapse in a colorful swift moving narrative that blends a vivid portrait of the 1920s with an intensely gripping account of Wall Street's greatest catastrophe The book offers a vibrant picture of a world full of plungers powerful bankers corporate titans millionaire brokers and buoyantly optimistic stock market bulls We meet Sunshine Charley Mitchell head of the National City Bank powerful financiers Jack Morgan and Jacob Schiff Wall Street manipulators such as the legendary Jesse Livermore and the lavish living Billy Durant founder of General Motors As Klein follows the careers of these men he shows us how the financial house of cards gradually grew taller as the irrational exuberance of an earlier age gripped America and convinced us that the market would continue to rise forever Then in October 1929 came a perfect storm like convergence of factors that shook Wall Street to its foundations We relive Black Thursday when police lined Wall Street brokers grew hysterical customers bellowed like lunatics and the ticker tape fell hours behind This compelling history of the Crash the first to follow the market closely for the two years leading up to the disaster illuminates a major turning point in our history

One of the significant advantages of Sun Bubble books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes.
