of a photon from its creation in the Sun until its arrival to the Earth These two volumes are aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers NGOs and GOs

**Energy-efficient Buildings in India** Mili Majumdar, 2001-01-01 Accelerated urbanization imposes immense pressure on the dwindling energy sources and fragile ecosystems Yet the resource crunch confronting energy supplies can be alleviated if we design and develop future buildings by incorporating sound concepts of energy efficiency and sustainability Covering 41 projects from India's various climatic zones this book provides thorough insights into the context techniques and benefits of energy efficient buildings The projects highlight design responses to varied climatic conditions appropriate materials and construction methods implementation of energy efficient systems and effective utilization of renewable energy to reduce pressure on grid power This book will inspire architects designers urban planners engineers and students to build for a better tomorrow
