study company in New Mexico and focuses primarily on their adaptation to the US industrial environment Extensive interviews demonstrate that organizational practices of Japanese transplants are significantly different from either their Japanese or American counterparts Relations of power at the case study company are examined in depth and reveal two contrasting forms of control American managers tend to exert hierarchical control in the manufacturing department using a top down approach and clear distinctions between work and private lives In contrast the Japanese managers utilize what the author calls poka yoke fail proof control over the repair department Poka yoke control is characterized by strict attendance and dress codes emphasizing loyalty and dedication to work At the same time the US headquarters in New York and the parent company in Japan impose remote control thus limiting the autonomy of local managers Women and Work Elizabeth Higginbotham, Mary Romero, 1997-06-12 This collection of original research articles explores how race ethnicity and social class have shaped the work lives of women Women and Work explores women s working conditions their wages and salaries their abilities to control their work environments and how they see themselves and their options in the workplace A great deal of importance is given to women of color non citizens and working class women groups that are often neglected in other treatments of this subject The integration of work and family women s vision of their own work and consciousness as employees and women s resistance to exploitative and limiting work are themes are also addressed throughout this book Written by an interdisciplinary group of women scholars Women and Work will be of interest to faculty researchers and advanced students in the fields of sociology organization studies psychology gender studies women s history and economics *The Near Northwest Side Story* Gina Perez, 2004-10-04 In *The Near Northwest Side Story* Gina M P rez offers an intimate and unvarnished portrait of Puerto Rican life in Chicago and San Sebastian Puerto Rico two places connected by a long history of circulating people ideas goods and information P rez s masterful blend of history and ethnography explores the multiple and gendered reasons for migration why people maintain transnational connections with distant communities and how poor and working class Puerto Ricans work to build meaningful communities P rez traces the changing ways that Puerto Ricans have experienced poverty displacement and discrimination and illustrates how they imagine and build extended families and dense social networks that link San Sebastian to barrios in Chicago She includes an incisive analysis of the role of the state in shaping migration through such projects as the Chardon Plan Operation Bootstrap and the Chicago Experiment *The Near Northwest Side Story* provides a unique window on the many strategies people use to resist the negative consequences of globalization economic development and gentrification **Routledge Handbook of Chicana/o Studies** Francisco A. Daniel Barnes, 2015-12-01 Winner of the 2017 Race Gender and Class Section Book Award from the American Sociological Association Popular discussions of professional women often dwell on the conflicts faced by the woman who attempts to have it all raising children while climbing up the corporate ladder Yet for all the articles and books written on this subject there has been little work that focuses on the experience of African American professional women or asks how their perspectives on work family balance might be unique Raising the Race is the first scholarly book to examine how black married career women juggle their relationships with their extended and nuclear families the expectations of the black community and their desires to raise healthy independent children Drawing from extensive interviews with twenty three Atlanta based professional women who left or modified careers as attorneys physicians executives and administrators anthropologist Rich J Daniel Barnes found that their decisions were deeply rooted in an awareness of black women s historical struggles Departing from the possessive individualistic discourse of having it all the women profiled here think beyond their own situation considering ways their decisions might help the entire black community Giving a voice to women whose perspectives have been underrepresented in debates about work family balance Barnes s profiles enable us to perceive these women as fully fledged individuals each with her own concerns and priorities Yet Barnes is also able to locate many common themes from these black women s experiences and uses them to propose policy initiatives that would improve the work and family lives of all Americans **Feminist Anthropology** Pamela L. Geller, Miranda K. Vesperi,2018-05-31 St Petersburg Florida has become virtually synonymous with retirement and old age The city of green benches once courted its elderly population now however it seeks to rejuvenate its image to attract the young through urban revitalization In this humane and sensitive book Maria Vesperi an anthropologist and journalist looks at the realities of being old and poor in the rapidly changing downtown of St Petersburg Vesperi provides a complete and carefully observed picture of the elderly the conditions of their\_ lives representative social programs created to provide for them and their interaction with the city around them The life of the old in St Petersburg she notes is characterized by a profound contradiction between how the elderly see themselves and how they are viewed by the community a contradiction that speaks of the way cultural stereotypes about aging are transmitted to all older Americans As a culture Vesperi maintains we view the old as an isolated segment of humanity without a living future or even an ongoing present She seeks to understand the ways in which the old respond to the distorted image that they meet with every day not only in their relations with individuals but in their dealings with the institutions set up specifically to care for them Her study of St Petersburg explores questions that are significant throughout the United States How did our rigid cultural assumptions about old age develop and how can we change them Why do so many gerontologists public officials and social workers tacitly subscribe to that misconception How does it inform the development and operation of public programs for the elderly Enlivened by the voices of the old people of St Petersburg and enriched with photographs by Ricardo Ferro this moving book is important reading for anyone concerned with the life of the elderly in America      *Dismantling Apartheid* Walton Johnson,2018-08-06 As a result of Pretoria s 1976 imposition of

independence on the black homeland of Transkei its capital city Umtata became one of the first communities in South Africa to experience fundamental changes in the apartheid This timely book discusses those relationships that remained unchanged as well as the important race and class realignments that accompanied apartheid s dismantling Walton R Johnson shows that although the universal franchise radically altered municipal government and desegregation changed access to some public and private amenities transformation of the basic patterns of dominance and subordination occurred slowly He describes how the established dominant group perpetuated key parts of the old order by guiding and manipulating a pliable new African middle class For the mass of Africans the facade was new he makes clear but the underlying structures were the same effective social and political control stayed for a long while in the hands of the white elite and few new economic opportunities opened for Africans His chapter on personal ideologies shows how deeply cultural much of this behavior was Providing an informed account of change and continuity in one town *Dismantling Apartheid* is a compelling preview of future social relations in South Africa      **The Varieties of Ethnic Experience** Micaela Di Leonardo,2018-08-06 Taking a novel

anthropological approach to the issue of white ethnicity in the United States this book challenges the model of uniform ethnic family and community culture and argues for a reconsideration of the meaning of class kinship and gender in America's past and present Micaela di Leonardo focuses on a group of Italian American families who live in Northern California and who range widely in economic status Combining the methods of participant observation oral history and economic historical research she breaks decisively with the tradition of viewing white ethnicity solely as Eastern urban and working class The author integrates lively narrative accounts with analysis to give a fresh interpretation of ethnic identity as both materially grounded and individually negotiated She examines the ways in which different occupational experiences influence individual choice of family or community as the unit of collective ethnic identity and she considers the boundaries at which individuals particularly women work out their personal ethnic identities Her analysis illuminates the political meanings that the images of ethnic woman and family have taken on in popular discourse A provocative study that sets the reflections of a broad range of Italian Americans in the context of their varied life histories this book provides an informed commentary on family class culture and gender in American life      *"Getting Paid"* Mercer L. Sullivan, 2018-05-31 The working class in New York City was remade in the mid nineteenth century In the 1820s a substantial majority of city artisans were native born by the 1850s three quarters of the city's laboring men and women were immigrants How did the influx of this large group of young adults affect the city's working class What determined the texture of working class life during the antebellum period Richard Stott addresses these questions as he explores the social and economic dimensions of working class culture Working class culture Stott maintains is grounded in the material environment and when work population consumption and the uses of urban space change as rapidly as they did in the mid nineteenth century culture will be transformed Using workers' first person accounts letters diaries and reminiscences as evidence and focusing on such diverse topics as neighborhoods diet saloons and dialect he traces the rise of a new youth oriented working class culture By illuminating the everyday experiences of city workers he shows that the culture emerging in the 1850s was a culture clearly different from that of native born artisans of an earlier period and from that of the middle class as well      *Caribbean New York* Philip Kasinitz, 1992 Since 1965 West Indians have been emigrating to the United States in record numbers and to New York City in particular Caribbean New York shows how the new immigration is reshaping American race relations and sheds much needed light on factors that underlie some of the city's explosive racial confrontations Philip Kasinitz examines how two forces racial solidarity and ethnic distinctiveness have helped to shape the identity of New York's West Indian community He compares new post 1965 immigrants with West Indians who arrived earlier in the century and looks in detail at the economic political and cultural rules that Afro Caribbean immigrants have played in the city during each period      **Work in Tumultuous Times** Vivian Shalla, Wallace Clement, 2007-03-12 Using a progressive approach to political economy contributors propose alternative policies and practices that might secure more decent livelihoods for workers and their families      **The Time Bind** Arlie Russell

Hochschild,2001-04-01 The national bestseller that put work family balance in the headlines and on the White House agenda with a new introduction by the author When The Time Bind was first published in 1997 it was hailed as the decade s most influential study of our work family crisis In the short time since the crisis has only become more acute Arlie Russell Hochschild bestselling author of The Second Shift spent three summers at a Fortune 500 company interviewing top executives secretaries factory hands and others What she found was startling Though every mother and nearly every father said family comes first few of these working parents questioned their long hours or took the company up on chances for flextime paternity leave or other family friendly policies Why not It seems the roles of home and work had reversed work was offering stimulation guidance and a sense of belonging while home had become the place in which there was too much to do in too little time Today Hochschild s findings are more relevant than ever As she shows in her new introduction the borders between family and work have become even more permeable With the Internet extending working hours at home and offices offering domestic enticements free snacks soft music to keep employees later at their jobs The Time Bind stands as an increasingly important warning about the way we live and work     *The New Don't Blame Mother* Paula Caplan,2002-06 First Published in 2000 Routledge is an imprint of Taylor Francis an informa company
