Transformation and Crises
Thomas Ekman Jørgensen, 2008 The Left in the 1960s and 1970s has a powerful almost mythical place in the history of the 20th century It was during these decades that the radical Left managed to renew the language of socialism as an alternative to communism and liberalism alike but also when radicalism often led to extremism and social movements turned into political sects Focusing on the Left in Denmark and Sweden during those turbulent decades this study pays close attention to the political language in the two countries and shows the constant challenge to the concepts of the Left in the face of rapid social cultural and political changes The precarious relationship between the Left and the nation serves as a starting point for the exploration of the development of the New Left after the break with communism the subsequent student revolts and radicalization of the late 1960s until the movement's apparent collapse at the end of the 1970s This book illustrates the challenges the Left was facing in its attempt to articulate a credible political language at a time of social cultural and political transformation

Historisk-filosofiske meddelelser, 1965 **Neoliberal power and public management reforms**
Peter Triantafyllou, 2017-05-15 This book examines the links between major contemporary public sector reforms and neoliberal thinking The key contribution of the book is to enhance our understanding of contemporary neoliberalism as it plays out in the public administration and to provide a critical analysis of generally overlooked aspects of administrative

power The book examines the quest for accountability credibility and evidence in the public sector It asks whether this quest may be understood in terms of neoliberal thinking and if so how The book makes the argument that while current administrative reforms are informed by several distinct political rationalities they evolve above all around a particular form of neoliberalism constructivist neoliberalism The book analyses the dangers of the kinds of administrative power seeking to invoke the self steering capacities of society and administration itself Reforms in Long-Term Care Policies in Europe
Costanzo Ranci,Emmanuele Pavolini,2012-11-08 Over the last two decades many changes have happened to the social welfare policies of various industrial countries Citizens have seen their pensions unemployment benefits and general healthcare policies shrink as belt tightening measures are enforced But in contrast long term care has seen a general growth in public financing an expansion of beneficiaries and more generally an attempt to define larger social responsibilities and related social rights The aim of this book is to describe and interpret the changes introduced in long term care policies in Western Europe The volume argues that recent reforms have brought about an increasing convergence in LTC policies Most of the new programs have developed a new general approach to long term care based on a better integration of social care and health care The book explores increasing public support given to family care work in the past the family would take care of the elderly or infirm and increasing growth and recognition of a extended social care market by which care has shifted from a moral obligation based on family reciprocity to a paid professional activity A new social care arrangement has therefore been developing in Western countries based on a new mix of family obligations market provision and public support In order to understand such changes this analysis will take into account the social and economical impact of these reforms
