Arnold-Scriber,Terry G. Scriber,2012-02-17 Ship Island was used as a French base of operations for Gulf Coast maneuvers and later during the War of 1812 by the British as a launching point for the disastrous Battle of New Orleans But most memorably Ship Island served as a Federal prison under the command of Union Major General Benjamin F Butler during the Civil War This volume traces this fascinating and somewhat sinister history of Ship Island The main focus of the book is a series of rosters of the men imprisoned Organized first by the state in which the soldier enlisted and then by the company in which he served entries are listed alphabetically by last name and include information such as beginning rank date and place of enlistment date and place of capture physical characteristics and where possible the fate and postwar occupation of the prisoner      **Progressives in Navy Blue** Scott Mobley,2018-05-15 This study examines how intellectual and institutional

developments transformed the U S Navy from 1873 to 1898 The period was a dynamic quarter century in which Americans witnessed their Navy evolve Cultures of progress clusters of ideas beliefs values and practices pertaining to modern warfare and technology guided the Navy s transformation The agents of naval transformation embraced a progressive ideology They viewed science technology and expertise as the best means to effect change in a world contorted by modernizing and globalizing trends Within the Navy s progressive movement two new cultures Strategy and Mechanism influenced the course of transformation Although they shared progressive pedigrees each culture embodied a distinctive vision for the Navy s future      **Navy Comptroller Manual** United States. *Cognitive Neuroscience: Modeling Natural Brain Dynamics* Klaus Gramann,Tzyy-Ping Jung,Daniel P. Ferris,Chin-Teng Lin,Scott Makeig,2014-10-03 Decades of brain imaging experiments have revealed important insights into the architecture of the human brain and the detailed anatomic basis for the neural dynamics supporting human cognition However technical restrictions of traditional brain imaging approaches including functional magnetic resonance tomography fMRI positron emission tomography PET and magnetoencephalography MEG severely limit participants movements during experiments As a consequence our knowledge of the neural basis of human cognition is rooted in a dissociation of human cognition from what is arguably its foremost and certainly its evolutionarily most determinant function organizing our behavior so as to optimize its consequences in our complex multi scale and ever changing environment The concept of natural cognition therefore should not be separated from our fundamental experience and role as embodied agents acting in a complex partly unpredictable world To gain new insights into the brain dynamics supporting natural cognition we must overcome restrictions of traditional brain imaging technology First the sensors used must be lightweight and mobile to allow

monitoring of brain activity during free participant movements New hardware technology for electroencephalography EEG and near infrared spectroscopy NIRS allows recording electrical and hemodynamic brain activity while participants are freely moving New data driven analysis approaches must allow separation of signals arriving at the sensors from the brain and from non brain sources neck muscles eyes heart the electrical environment etc Independent component analysis ICA and related blind source separation methods allow separation of brain activity from non brain activity from data recorded during experimental paradigms that stimulate natural cognition Imaging the precisely timed distributed brain dynamics that support all forms of our motivated actions and interactions in both laboratory and real world settings requires new modes of data capture and of data processing Synchronously recording participants motor behavior brain activity and other physiology as well as their physical environment and external events may be termed mobile brain body imaging MoBI Joint multi stream analysis of recorded MoBI data is a major conceptual mathematical and data processing challenge This Research Topic is one result of the first international MoBI meeting in Delmenhorst Germany in September 2013 During an intense workshop researchers from all over the world presented their projects and discussed new technological developments and challenges of this new imaging approach Several of the presentations are compiled in this Research Topic that we hope may inspire new research using the MoBI paradigm to investigate natural cognition by recording and analyzing the brain dynamics and behavior of participants performing a wide range of naturally motivated actions and interactions Two Naval Journals, 1864, at the Battle of Mobile Bay C. Savino, Ronald L. Krannich, 1997-07 **Catalog of audiovisual productions** United States. Assistant Secretary of Defense (Public Affairs), 1984 World War II Allied Nursing Services Martin Brayley, 2012-02-20 The skill and care of the women of the Allied military nursing services was remembered gratefully by hundreds of thousands of wounded servicemen The small peacetime services increased rapidly by enrolling reservists and volunteers the great majority of the nurses who cared for Allied casualties were civilians in uniform who worked tirelessly under difficult conditions and in tented hospitals close to the front lines in real danger many nurses paid for their devotion with their lives This first ever fully illustrated study of the US British Commonwealth and other nursing organisations includes many unpublished photographs and 24 meticulously illustrated colour figures **A Blue Sea of Blood** Donald M. Kehn, 2009-01-15 On the morning of March 1 1942 the WWI era destroyer USS Edsall under orders to deliver some forty Army Air Force fighter crews to the beleaguered island of Java split off from the USS Whipple and the tanker Pecos and was never seen again by Allied forces Despite the later discovery of bodies identified as Edsall crew members near a remote airfield on the coast of Celebes what happened to the ship remains a matter of mystery and perhaps deliberate obfuscation This book explores the many puzzling facets of the Edsall s disappearance in order to finally tell the full story of the fate of the vessel and her crew Based on

exhaustive research of the historical record including newly deciphered Japanese documents and previously unrevealed material from the crew's family members *A Blue Sea of Blood* offers a painstaking reconstruction of the ship's history. The book investigates not only the Edsall's mysterious final action but also her wide-ranging pre-war career and the curious uses to which her story was put generally under false pretenses first by the pre-war US Navy and then by the Japanese wartime propaganda machine. And finally military historian Donald Kehn considers the circumstances surrounding the curious obscurity of the Edsall's heroic service and final battle in American histories. Redressing six decades of official indifference Kehn's account recovers a significant chapter missing from the history of World War II and tells a long overdue story of courage and tragic loss. *Automobile Blue Book*, 1927
