Teaching The History Of Science:

Teaching the History of Science Michael Shortland, Andrew Warwick, 1989-01-01 **History, Philosophy and Science Teaching: A Personal Story** Michael R. Matthews, 2021-06-02 This book is an historical narrative of academic appointments significant personal and collaborative research endeavours and important editorial and institutional engagements For forty years Michael Matthews has been a prominent international researcher author editor and organiser in the field of History Philosophy and Science Teaching He has systematically brought his own discipline training in science psychology philosophy of education and the history and philosophy of science to bear upon theoretical curricular and pedagogical issues in science education The book includes accounts of philosophers who greatly influenced his own thinking and who also were personal friends Wallis Suchting Abner Shimony Robert Cohen Marx Wartofsky Israel Scheffler Michael Martin and Mario Bunge It advocates the importance of clear writing and avoidance of faddism in both philosophy and in education It concludes with a proposal for informed and enlightened science teacher education *Science Teaching* Michael R. Matthews, 2014-09-19 *Science Teaching* explains how history and philosophy of science contributes to the resolution of persistent theoretical curricular and pedagogical issues in science education It shows why it is essential for science teachers to know and appreciate the history and philosophy of the subject they teach and how this knowledge can enrich science instruction and enthuse students in the subject Through its historical perspective the book reveals to students teachers and researchers the foundations of scientific knowledge and its connection to philosophy metaphysics mathematics and broader social influences including the European Enlightenment and develops detailed arguments about constructivism worldviews and science multicultural science education inquiry teaching values and teacher education Fully updated and expanded the 20th Anniversary Edition of this classic text featuring four new chapters The Enlightenment Tradition Joseph Priestley and Photosynthesis Science Worldviews and Education and Nature of Science Research and 1 300 references provides a solid foundation for teaching and learning in the field *Science Teaching* Michael R. Matthews, 1994 The author argues that science teaching can be improved if the science curriculum includes the historical and philosophical dimensions of topics He outlines the history of contextual approaches and explores curriculum developments that address questions about the nature of science **A History of Ideas in Science Education** George E. DeBoer, 1991-01-01 Dr DeBoer presents a fascinating account of the history of science education in the United States from the middle of the 19th century to the present History of Science Teaching in England Dorothy Mabel Turner, 1927 **International Handbook of Research in History, Philosophy and Science Teaching** Michael R. Matthews, 2014-07-03 This inaugural handbook documents the distinctive research field that utilizes history and philosophy in investigation of theoretical curricular and pedagogical issues in the teaching of science and mathematics It is contributed to by 130 researchers from 30 countries it provides a logically structured fully referenced guide to the ways in which science and mathematics education is informed by the history and

philosophy of these disciplines as well as by the philosophy of education more generally The first handbook to cover the field it lays down a much needed marker of progress to date and provides a platform for informed and coherent future analysis and research of the subject The publication comes at a time of heightened worldwide concern over the standard of science and mathematics education attended by fierce debate over how best to reform curricula and enliven student engagement in the subjects There is a growing recognition among educators and policy makers that the learning of science must dovetail with learning about science this handbook is uniquely positioned as a locus for the discussion The handbook features sections on pedagogical theoretical national and biographical research setting the literature of each tradition in its historical context It reminds readers at a crucial juncture that there has been a long and rich tradition of historical and philosophical engagements with science and mathematics teaching and that lessons can be learnt from these engagements for the resolution of current theoretical curricular and pedagogical questions that face teachers and administrators Science educators will be grateful for this unique encyclopaedic handbook Gerald Holton Physics Department Harvard University This handbook gathers the fruits of over thirty years research by a growing international and cosmopolitan community Fabio Bevilacqua Physics Department University of Pavia **Indian Journal of History of Science** ,1974 *Learning by Doing* Peter Heering,2012 *Learning by Doing* is about the history of experimentation in science education The teaching of science through experiments and observation is essential to the natural sciences and its pedagogy These have been conducted as both demonstration or as student exercises The experimental method is seen as giving the student vital competence skills and experiences both at the school and at the university level This volume addresses the historical development of experiments in science education which has been largely neglected so far The contributors of *Learning by Doing* pay at

Scientific Sources and Teaching Contexts Throughout History: Problems and Perspectives Alain

Bernard,Christine Proust,2013-12-13 This book examines the textual social cultural practical and institutional environments to which the expression teaching and learning contexts refers It reflects on the extent to which studying such environments helps us to better understand ancient or modern sources and how notions of teaching and learning are to be understood Tackling two problems the first is that of certain sources of scientific knowledge being studied without taking into account the various contexts of transmission that gave this knowledge a long lasting meaning The second is that other sources are related to teaching and learning activities but without being too precise and demonstrative about the existence and nature of this teaching context In other words this book makes clear what is meant by context and highlights the complexity of the practice hidden by the words teaching and learning Divided into three parts the book makes accessible teaching and learning situations presents comparatist approaches and emphasizes the notion of teaching as projects embedded in coherent treatises or productions
