**Equipment** The International Union of Physiological Sciences (IUPS) Commission on Teaching Physiology, 1991-05-02 In many parts of the world there are limited resources for experimental work Much can be done with little or no equipment This source book prepared by the International Union of Physiological Sciences Commission on Teaching Physiology provides some ideas for experiments of this nature There are 62 experiments given in detail ranging from those requiring no equipment to those requiring a little sophisticated equipment In addition a number of ideas are suggested for experiments which can be worked out by groups of students together with an instructor To this is added some comments on the sort of equipment which Physiology Departments should aim for as a minimum and on the use of locally available species for animal

experiments This book should help stimulate practical work in physiology not only in developing countries but also in community colleges and the early university years in the more fortunate areas of the world      **Perry's The Chemotherapy Source Book** Michael C. Perry,Donald C. Doll,Carl E. Freter,2012-07-30 Perry s The Chemotherapy Source Book now in its fifth edition provides information on the choice of chemotherapeutic agents the use of combination chemotherapy and the toxicity of individual drugs Organized by site this is the only book of its kind to focus strictly on the clinical practice of chemotherapy and is meant to serve as a one stop shop for information on choice of chemotherapeutic agents treatment outlines grading of side effects and dose modification      *A Source Book in Mathematics* David Eugene Smith,2012-05-07 The writings of Newton Leibniz Pascal Riemann Bernoulli and others in a comprehensive selection of 125 treatises dating from the Renaissance to the late 19th century most unavailable elsewhere      **Pi: A Source Book** Jonathan M. Borwein,2013-06-29 Our intention in this collection is to provide largely through original writings an extended account of pi from the dawn of mathematical time to the present The story of pi reflects the most seminal the most serious and sometimes the most whimsical aspects of mathematics A surprising amount of the most important mathematics and a significant number of the most important mathematicians have contributed to its unfolding directly or otherwise Pi is one of the few mathematical concepts whose mention evokes a response of recognition and interest in those not concerned professionally with the subject It has been a part of human culture and the educated imagination for more than twenty five hundred years The computation of pi is virtually the only topic from the most ancient stratum of mathematics that is still of serious interest to modern mathematical research To pursue this topic as it developed throughout the millennia is to follow a thread through the history of mathematics that winds through geometry analysis and special functions numerical analysis algebra and number theory It offers a subject that provides mathematicians with examples of many current mathematical techniques as well as a palpable sense of their historical development Why a Source Book Few books serve wider potential audiences than does a source book To our knowledge there is at present no easy access to the bulk of the material we have collected
