The Changing Face of Warfare in the 21st Century Gregory Simons, Julian Chifu, 2017-07-20 This study discusses salient trends demonstrated by contemporary warfare of these first years of the 21st century The authors reinforce previous notions of Fourth Generation Warfare but most importantly explore the workings of new components and how these have modified the theory and practice of warfare beyond the basic divisions of conventional and unconventional warfare as witnessed in the preceding century Throughout history there has been a close interaction between politics communication and armed conflict and a main line of investigation of this book is to track changes that are presumed to have occurred in the way and manner in which armed conflicts are waged Using cogent examples drawn variously from conflicts of the Arab Spring the Islamic State and Russian adventurism in South Ossetia Crimea and Eastern Ukraine the authors demonstrate the application of Information Warfare the practice of Hybrid Warfare and offensive use of diplomacy communications economics and international law to obtain political and military advantages against the status quo states of the international community The authors combine a theoretical framework with concrete empirical examples in order to create a better understanding and comprehension of the current events and processes that shape the character of contemporary armed conflicts and how they are informed and perceived in a highly mediated and politicised world

Ideal Illusions James Peck, 2011-03-15 From a noted historian and foreign policy analyst a groundbreaking critique of the troubling symbiosis between Washington and the human rights movement The United States has long been hailed as a powerful force for global human rights Now drawing on thousands of documents from the CIA the National Security Council the Pentagon and development agencies James Peck shows in blunt detail how Washington has shaped human rights into a potent ideological weapon for purposes having little to do with rights and everything to do with furthering America's global reach Using the words of Washington's leaders when they are speaking among themselves Peck tracks the rise of human rights from its dismissal in the cold war years as fuzzy minded to its calculated adoption after the Vietnam War as a rationale for American foreign engagement He considers such milestones as the fight for Soviet dissidents Tiananmen Square and today's war on terror exposing in the process how the human rights movement has too often failed to

challenge Washington's strategies A gripping and elegant work of analysis *Ideal Illusions* argues that the movement must break free from Washington if it is to develop a truly uncompromising critique of power in all its forms *The Age of Sacred Terror* Daniel Benjamin, Steven Simon, 2003-10-14 Winner of the 2004 Arthur Ross Book Award from the Council on Foreign Relations From two of the world's foremost experts on the new terrorism comes the definitive book on the rise of al Qaeda and America's efforts to combat the most innovative and dangerous terrorist group ever Daniel Benjamin and Steven Simon trace the growth of radical Islam from its medieval origins and drawing on their years of counter terrorism work at the National Security Council provide essential insights into the thinking of Usama bin Laden and his followers With unique authority they analyze why America was unable to defend itself against this revolutionary threat on September 11 2001 why bin Laden's apocalyptic creed is gaining ground in the Islamic world and what the United States must do to stop the new terror *Presidential Decision Making and Military Intervention in the Post-Cold War Era* Dennis N. Ricci, 2019-07-08 Despite the end of the Cold War the frequency of U.S. military intervention has increased While military intervention accelerated after 9/11 increasing intervention was demonstrably evident well before 2001 *Presidential Decision Making and Military Intervention in the Post Cold War Era Go or No Go* analyzes presidential decision making regarding military intervention through a focused structured comparison of go and no go decisions from the four successive administrations of Presidents George H.W. Bush Bill Clinton George W. Bush and Barack Obama Dennis Ricci explores competing explanations for why a presidential administration will decide to intervene in one situation and not in another Since both the situations and decision makers vary across cases Ricci analyzes explanations for intervention by asking Why intervene Why use force or not Under what conditions or circumstances are intervention decisions made *State of Recovery* Barry Scott Zellen, 2013-02-28 In the decade that followed 9/11 technologies and technology policies became central to homeland security For example the U.S. erected new border defenses with remote sensors and biometric scanners and deployed new autonomous air warfare capabilities such as the drone program Looking at efforts to restore security after 9/11 the work examines issues such as the rise in technology spending the various scenarios of mass terror and America's effort to ensure that future engagements will take place far from the homeland Operation Iraqi Freedom Iran's emergence as nuclear threat and North Korea's acceleration of its missile program are analyzed along with the axis of evil and America's effort to create a ballistic missile shield to thwart this emerging threat to its security By focusing on the technologies of homeland security rather than on cyber warfare itself the work offers a unique and needed survey that will appeal to anyone involved with the study and development of homeland and strategic security ***In Search of Bill Clinton*** John D. Gartner, 2008-09-16 What makes Bill Clinton tick William Jefferson Clinton the 42nd President of the United States is undoubtedly the greatest American enigma of our age a dark horse that captured the White House fell from grace and was resurrected as an elder statesman whose popularity rises and falls based on the day's sound bytes John Gartner's *In Search of Bill Clinton* unravels

the mystery at the heart of Clinton's complex nature and why so many people fall under his spell. He tells the story we all thought we knew from the fresh viewpoint of a psychologist as he questions the well-crafted Clinton life story. Gartner, a therapist with an expertise in treating individuals with hypomanic temperaments, saw in Clinton the energy, creativity, and charisma that leads a hypomanic individual to success as well as the problems with impulse control and judgment which frequently result in disastrous decision making. He knew though that if he wanted to find the real Bill Clinton, he couldn't rely on armchair psychology to provide the answer. He knew he had to travel to Arkansas and around the world to talk with those who knew Clinton and his family intimately. With his boots on the ground, Gartner uncovers long-held secrets about Clinton's mother, the ambitious and seductive Virginia Kelley, her wild life in Hot Springs, and the ghostly specter of his biological father, Bill Blythe, to uncover the truth surrounding Clinton's rumor-filled birth. He considers the abusive influence of Clinton's alcoholic stepfather, Roger Clinton, to understand the repeated public abuse he invited both by challenging a hostile Republican Congress and engaging in the clandestine affair with Monica Lewinsky that led to his downfall. Of course, there is no marriage more dissected than that of the Clintons, both in the White House and on the Hillary Clinton presidential campaign trail. Instead of going down familiar paths, Gartner looks at that relationship with a new focus and clearly sees in Hillary's molding of Clinton into a more disciplined politician, the figure of Bill Clinton's stern grandmother, Edith Cassidy, the woman who set limits on him at an early age. Gartner brings Clinton's story up to date as he travels to Ireland, the scene of one of Clinton's greatest diplomatic triumphs, and to Africa, where his work with AIDS victims is unmatched, to understand Clinton's current humanitarian persona and to find out why he is beloved in so much of the world while still scorned by many at home. John Gartner's exhaustive trip around the globe provides the richest portrait of Clinton, yet a man who is one of our national obsessions. *In Search of Bill Clinton* is a surprising and compelling book about a man we all thought we knew.

Mediation and Liberal Peacebuilding Mikael Eriksson, Roland Kostić, 2013. Despite the wealth of research on external interventions and practices of Western peacebuilding, many scholars tend to rely on findings in the so-called post-agreement phase of interventions. As a result, most mainstream peacebuilding literature pays limited or no attention to the linkages that exist between mediation practices in the negotiation phase and processes in the post-peace agreement phase of intervention. By linking the motives and practices of interveners during negotiation and implementation phases into a more integrated theoretical framework, this book makes a unique contribution to the on-going debate on the so-called Western liberal models of peacebuilding. Drawing upon in-depth case studies, this innovative volume examines a variety of political motives behind third-party interventions, thus challenging the very founding concept of mediation literature from the publisher. [For Love of Politics](#) Sally Bedell Smith, 2007-10-23. During their eight years in the White House, Bill and Hillary Clinton worked together more closely than the public ever knew. Their intertwined personal and professional lives had far-reaching consequences for politics, domestic policy, and international affairs, and their marital troubles became a national soap opera.
