In the center, a large blue whale is depicted, possibly representing environmental issues. To the left, a crowd of people is shown, with one person holding a sign that says "CENTRE". In the foreground, a young child is looking up, and several people are wearing blue headscarves. Constructing Global Challenges in World Politics Alina Isakova, Malte Neuwinger, Robin Schulze Waltrup, Oday Uraiqat, 2024-06-24 This

interdisciplinary book investigates the problematization of global challenges in world politics by analyzing what they are and how they come to be. Offering a conceptual framework including four modes of construction: universalizing, bundling, upscaling, and creating urgency, this book provides a heuristic method for understanding how the process of rendering an issue a global challenge unfolds. It examines the role of the global challenges discourse, which may either reinforce or challenge the dominant orders of world politics, such as the capitalist market-based system and the liberal international order. As a consequence, the global challenges discourse facilitates the emergence of new actors and policy fields. The book will be of interest to students, academics, and practitioners of global governance, international organizations, and more broadly, international political economy and international relations.

This dynamic text invites critical reflection on these questions and more, outlining the various ways that social constructionist theory has been utilized in the social sciences. The Fallacy of Corporate Moral Agency David Rönnegard, 2015-05-12. It is uncontroversial that corporations are legal agents that can be held legally responsible, but can corporations also be moral agents that are morally responsible? Part one of this book explicates the most prominent theories of corporate moral agency and provides a detailed debunking of why corporate moral agency is a fallacy. This implies that talk of corporate moral responsibilities beyond the mere metaphorical is essentially meaningless. Part two takes the fallacy of corporate moral agency as its premise and spells out its implications. It shows how prominent normative theories within Corporate Social Responsibility, such as Stakeholder Theory and Social Contract Theory, rest on an implicit assumption of corporate moral agency. In this metaphysical respect, such theories are untenable. In order to provide a more robust metaphysical foundation for corporations, the book explicates the development of the corporate legal form in the US and UK, which displays how the corporation has come to have its current legal attributes. This historical evolution shows that the corporation is a legal fiction created by the state in order to serve both public and private goals. The normative implication for corporate accountability is that citizens of democratic states ought to primarily make calls for legal enactments in order to hold the corporate legal instruments accountable to their preferences.

Key Issues in Sustainable Development and Learning William Scott, Stephen Gough, 2004. Through the readings and vignettes, the book raises wide-ranging issues of how we choose to act. Following the format of its companion volume, *Sustainable Development and Learning*, framing the issues, the book builds on existing work across a number of fields as well as on original international research. *Key Issues in Sustainable Development and Learning* is a critical review, a major resource for anyone studying for masters degrees focusing on environment and sustainable development. It is also a valuable tool for professionals in both public and private sectors who are dealing with these issues daily. Bill and Steve's book for Routledge, *Sustainable Development and Learning*, framing the issues, is one of the academic sources cited by the United Nations in its draft international implementation scheme for the Decade of Education for Sustainable Development, which was launched by Kofi Annan last month.
