## **Social Origins Of Modern Science:**

**The Social Origins of Modern Science** P. Zilsel, 2013-03-07 Edgar Zilsel 1891 1944 lived through the best of times and worst of times through the renewal of scientific optimism and humane politics and through the massive social collapse into idolatrous barbarism With it all and with his personal and family crises in Vienna and later in America Zilsel was I believe a heroic indeed a model scholar of the first half of the 20 century He was widely admired as a teacher at high schools in workers education in research tutoring and seminars He was an original investigator on matters of the methodology of science and of the history of the sciences He was a social and political analyst as a critical Marxist of the turmoil of Vienna in the 20s Above all he achieved so much as a sociological historian who undertook research on two central facts of the early modern world recognition of the creative individual and the ideal of genius and the conditions and realities of the coming of science to European civilization *The Social Origins of Modern Science* D. Zilsel P. Raven, W. Krohn, Robert S. Cohen, 2014-01-15

**A People's History of Science** Clifford D Conner, 2009-04-24 We all know the history of science that we learned from grade school textbooks How Galileo used his telescope to show that the earth was not the center of the universe how Newton divined gravity from the falling apple how Einstein unlocked the mysteries of time and space with a simple equation This history is made up of long periods of ignorance and confusion punctuated once an age by a brilliant thinker who puts it all together These few tower over the ordinary mass of people and in the traditional account it is to them that we owe science in its entirety This belief is wrong A People's History of Science shows how ordinary people participate in creating science and have done so throughout history It documents how the development of science has affected ordinary people and how ordinary people perceived that development It would be wrong to claim that the formulation of quantum theory or the structure of DNA can be credited directly to artisans or peasants but if modern science is likened to a skyscraper then those twentieth century triumphs are the sophisticated filigrees at its pinnacle that are supported by the massive foundation created by the rest of us *The Scientific Revolution and the Origins of Modern Science* John

Henry, 2008-06-03 This is a concise but wide ranging account of all aspects of the Scientific Revolution from astronomy to zoology The third edition has been thoroughly updated and some sections revised and extended to take into account the latest scholarship and research and new developments in historiography **Companion to the History of Modern**

**Science** G N Cantor, G.N. Cantor, J.R.R. Christie, M.J.S. Hodge, R.C. Olby, 2020-10-07 The 67 chapters of this book describe and analyse the development of Western science from 1500 to the present day Divided into two major sections The Study of the History of Science and Selected Writings in the History of Science the volume describes the methods and problems of research in the field and then applies these techniques to a wide range of fields Areas covered include the Copernican Revolution Genetics Science and Imperialism the History of Anthropology Science and Religion Magic and Science The companion is an indispensable resource for students and professionals in History Philosophy Sociology and the Sciences as

well as the History of Science It will also appeal to the general reader interested in an introduction to the subject **Source Book for Social Origins** William Isaac Thomas,1909 **Source Book for Social Origins** William Isaac Thomas (ed),1909

**Edgar Zilsel: Philosopher, Historian, Sociologist** Donata Romizi,Monika Wulz,Elisabeth Nemeth,2022-08-24 This book provides a new all round perspective on the life and work of Edgar Zilsel 1891 1944 as a philosopher historian and sociologist He was close to the Vienna Circle and has been hitherto almost exclusively referred to in terms of the so called Zilsel thesis on the origins of modern science Much beyond this thesis Zilsel s brilliant work provides original insights on a broad number of topics ranging from the philosophy of probability and statistics to the concept of genius from the issues of scientific laws and theories to the sociological background of science and philosophy and to the political analysis of the problems of his time Praised by Herbert Feigl as an outstanding brilliant mind Zilsel being as a Social Democrat of Jewish origins mostly led a life of hardship marked by emigration and coming to a sudden and tragic end by suicide in 1944 The impossibility of an academic career has hindered the reception of Zilsel s scientific work for a long time This volume is a contribution to its late reception providing new insights especially into his work during his years in Vienna moreover it shows the heuristic value of Zilsel s ideas for future scholarly research in philosophy history and sociology **Natural Science and the Origins of the British Empire** Sarah Irving,2015-09-30 Represents a history of the British Empire that takes account of the sense of empire as intellectual as well as geographic dominion the historiography of the British Empire with its preoccupation of empire as geographically unchallenged sovereignty overlooks the idea of empire as intellectual dominion

Encyclopedia of Renaissance Philosophy Marco Sgarbi,2022-10-27 Gives accurate and reliable summaries of the current state of research It includes entries on philosophers problems terms historical periods subjects and the cultural context of Renaissance Philosophy Furthermore it covers Latin Arabic Jewish Byzantine and vernacular philosophy and includes entries on the cross fertilization of these philosophical traditions A unique feature of this encyclopedia is that it does not aim to define what Renaissance philosophy is rather simply to cover the philosophy of the period between 1300 and 1650

**Essays in the History of Medicine** Robert I. Levy,2018 Artificial Intelligence: Anthropogenic Nature vs. Social Origin Elena G. Popkova,Bruno S. Sergi,2020-02-22 This book presents advanced research studies on the topic of artificial intelligence as a component of social and economic relations and processes It gathers research papers from the International Research to Practice Conference The 21st Century from the Positions of Modern Science Intellectual Digital and Innovative Aspects May 23 24 2019 Nizhny Novgorod Russia and the International Research to Practice Conference Economics of Pleasure a Science of Enjoying Economic Activities October 3 5 2019 Prague Czech Republic Both conferences were organized by the Autonomous Non Profit Organization Institute of Scientific Communications Volgograd What sets this book apart from other publications on the topic of artificial intelligence is that it approaches AI not as a technological tool but as an economic entity Bringing together papers by representatives of various fields of social and human knowledge it

systematically reflects on various economic social and legal aspects of the creation application and development of artificial intelligence Given the multidisciplinary nature of its content the book will appeal to a broad target audience including those engaged in developing AI scientific research institutes and universities and Industry 4.0 enterprises interested in its implementation as well as state regulators for the digital economy *Summer Seminars for College Teachers* ,

**Encyclopedia of Protestantism** Hans J. Hillerbrand,2004-08-02 For more information including sample entries full contents listing and more visit the Encyclopedia of Protestantism web site Routledge is proud to announce the publication of a new major reference work from world renowned scholar Hans J Hillerbrand The Encyclopedia of Protestantism is the definitive reference to the history and beliefs that continue to exert a profound influence on Western thought Featuring entries written by an international team of specialists and scholars the encyclopedia traces the course of Protestantism from its beginnings prior to 1517 when Martin Luther nailed his 95 Theses to the door of Wittenberg Cathedral to the vital and diverse international scene of the present day **Shadows of the Enlightenment** George E. McCarthy,2025-08-05 Shadows of the Enlightenment sheds light on the deeply political agenda underlying Western science from the so called Age of Reason to the present George McCarthy uncovers the economic social and historical origins of modern science and illuminates the a priori and innate features which furnish the justifications for the technical domination and control of nature and humanity The natural sciences were born of a market economy commercial trade and industrial production and were furthermore reflective of the values and institutions of modern capitalism and its class system in the seventeenth century As such one of the central roles of Western science has been to legitimate its theoretical imperative to dominate nature and to reorganize human labor for profit property and power Breaking with the medieval scholastic tradition modern science viewed nature as a reified mechanism which could be mathematically measured empirically predicted causally explained and managed Nature itself was recast as a dead machine stripped of any inherent meaning or purpose Ultimately when applied to the production process the field of natural science led to scientific management and economic exploitation and when applied in the academy particularly to the social sciences the field of natural science led to the eclipse of reason and the twilight of social theory Building upon the radical analysis of Marx and Engels Shadows of the Enlightenment articulates a new liberatory postmodern science and technology grounded in Marx's theory of social justice integrating ancient and modern traditions from classical Greece to the French Revolution from the Paris Commune to the Iroquois Confederacy In the process McCarthy invites us to move beyond the falsely mechanistic sense of reality and to break free from the sense of alienation that binds us all in order to make space for dreaming up a substantively democratic society **Locating Medical History** Frank Huisman,John Harley Warner,2006-10-31 With diverse constitutions a multiplicity of approaches styles and aims is both expected and desired This volume locates medical history within itself and within larger historiographic trends providing a springboard for discussions about what the history of medicine should be and what aims it

**The Orientation of Science and Technology** Shigeru Nakayama, 2009-02-26 One of the most distinguished science historians of the twentieth century Shigeru Nakayama has been at the forefront of redirecting or reorientating conventional East Asian science and technology arguing like Joseph Needham that the orientation of science refers not only to the direction of science but also implies a turning to Eastern science In recent times he has been arguing for implementation of a Service Science which is linked to the rights and needs of mankind A survivor of the Hiroshima atomic bomb he majored in astrophysics at the University of Tokyo and wrote on the history of astronomy for his PhD and later on the history of science for his Harvard PhD      **History of Technology Volume 31** Ian Inkster, 2012-11-22 New work on early modern Europe has now opened up the hidden avenues that link changes of technologies with a complex of cognitive institutional spatial and cultural elements It is true that all divisions of history wish to incorporate all other divisions unto themselves but in the essays of our first collection there are specific cases and analyses clearly delineated to show how technologies and systems for the production reproduction and representation of technological changes emerged out of fundamental aspects of European society and mentality The question must be How far were such fundamental aspects unique in their entirety and configuration to Europe The second collection on patent agency takes the modern industrialization of Europe as its focus and illustrates the manner in which systems of intellectual property rights generated manifold agencies that acted to both spread and control the use of knowledge in advanced sites Patent agency has been generally neglected by historians one reason for

this being the difficulty of defining effective agency beyond the obvious confines of those who were actually trained and remunerated as agents of invention Informal networks or sites may have been crucial in converting general patent systems into local environs of technical advance     Rethinking the Scientific Revolution Margaret J. Osler, 2000-03-13 This book challenges the traditional historiography of the Scientific Revolution probably the single most important unifying concept in the history of science Usually referring to the period from Copernicus to Newton roughly 1500 to 1700 the Scientific Revolution is considered to be the central episode in the history of science the historical moment at which that unique way of looking at the world that we call modern science and its attendant institutions emerged It has been taken as the terminus a quo of all that followed Starting with a dialogue between Betty Jo Teeter Dobbs and Richard S Westfall whose understanding of the Scientific Revolution differed in important ways the papers in this volume reconsider canonical figures their areas of study and the formation of disciplinary boundaries during this seminal period of European intellectual history
