Death, Dying and Bereavement Sharon Mallon, Laura Towers, 2024-11-28. While death, dying and bereavement are universal life events, the social conditions under which death takes place are fundamental in shaping how it is experienced by the individual. Bringing together contributors from around the world, this collection of chapters provides sociological insights into death, dying and bereavement. Drawing upon a range of sociological theorists including Emile Durkheim, Zygmunt Bauman and C. Wright Mills, the book reviews the historical contribution of sociology to the field of thanatology. In doing so, the book challenges individualistic psychological approaches to death, dying and bereavement and demonstrates how sociological approaches can shape, constrain and empower experiences by imbuing them with both collective and individual meaning. Chapter length case studies explore a wide range of issues from digital aspects of remembrance and memorialisation and continued threats to liberties that permit life and death decisions to discussions of the impact and likely legacy of COVID-19 and climate change. This collection will be of interest to students and researchers in the social sciences with an interest in societal attitudes towards death and bereavement. Chapter 6 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution (CC BY) 4.0 license.

Managing Death: International Perspectives Gerry R. Cox,Neil Thompson,2022-09-23 There is a huge collection of literature relating to death grief and bereavement but one aspect that has received relatively little attention is that of death management practices by which we mean the various ways of managing the circumstances of the death ritually acknowledging it and sensitively handling the disposal of the body and so on While ways of disposing of the dead and grief practices have been thought of as based upon individual responses grief and bereavement practices can be understood not only by looking at psychological and medical frameworks but also by examining people as part of a complex structure of social arrangements institutions structures and patterns By examining the social and institutional structures of various groups around the world we provide an international framework for a better understanding of the study of dying death and bereavement This book highlights the significance of these matters in an international context reflecting common themes and important differences It will highlight common themes across diverse cultures and national settings while also drawing attention to significant differences If

professionals working in the field of death grief and bereavement are not aware of such differences their practice can be insensitive discriminatory and therefore ineffective if not actually counterproductive As such the book provides an invaluable resource for a wide variety of professionals and students including medicine and health care social work counselling and psychotherapy chaplaincy and pastoral work and of course those involved in the funeral industry In addition students of sociology psychology and anthropology will find much of interest here in terms of appreciating the diversity of ways in which funerals and other death management practices are managed and integrated into social life
