Illegal Drug Use Through The Lifecourse David Moxon,Jaime Waters,2016-10-04 Hidden older illegal drug users are a seldom researched group most research on illegal drug users instead focusses on the young or the institutionalised To counter this trend this book reports on a study of current hidden users of illegal drugs aged 40 and over These are individuals who have sustained illegal drug use over the long term largely away from the gaze of the authorities whilst living otherwise conventional lives holding down jobs raising families and so on Thus they have much to tell us about how illegal substances can be integrated into life over the long term how that integration intersects with other aspects of one s existence and how illegal drug use is ultimately shaped by changes in personal circumstances and wider social contexts Utilising insights from the life course perspective the development of the participants use over their lives is analysed and placed in social context The book also details the nature of their current drug use Thus the book illustrates the place of illegal drugs in the lives of the participants and how this came to be over the decades as they also juggled work family and the everyday minutiae of life with their use The result is a unique look at the illegal drug use of an often ignored group of older drug users which charts the changing role that illegal drugs

have played and continue to play in their lives Handbook of Social Problems George Ritzer, 2004 Ritzer's Handbook of Social Problems offers a comprehensive treatment of today's major societal issues. The articles are authored by some of the top scholars in the field and address problem areas that will capture the interests of students and professors alike. The international coverage is most welcome in this time of intensifying global inequalities. Nancy Jurik, Arizona State University

The Handbook of Social Problems: A Comparative International Perspective provides a unique, broadly comparative perspective on the current state of social problems and deviance in a variety of societies around the world. Editor George Ritzer, along with leading U.S. and international sociologists, examines the relationship between social problems and a society's level of development and affluence. The essays in this volume focus on four interrelated issues involved in the relationship between social problems and the level of development and affluence. Less developed and less affluent societies are more likely to experience a range of social problems than developed and affluent societies. Affluence causes or at least brings with it a series of social problems that do not exist in less affluent societies. It is only with affluence that certain things can come to be imagined as social problems, such as excessive consumption. The very affluence of a society makes it vulnerable to problems that would not be social problems in poorer societies. The Handbook explores the theory of the weakness of the strong; in other words, strong or wealthy nations may have greater vulnerability to some social problems than less developed or affluent societies. This theory is clearly illustrated in this volume by the aftermath of September 11, 2001, depicting the vulnerability of the U.S. to social problems in far removed corners of the world. In addition, the international and comparative essays in this volume cover other important issues, such as the impact of modern technologies on social problems, ecological problems, global inequality, health as a social problem, and much more. The Handbook of Social Problems is a vital resource for sociologists and graduate students as well as an excellent addition to any academic library.

Effective Interventions in the Lives of Criminal Offenders John A. Humphrey, Peter Cordella, 2013-10-24 This book provides the most current thinking on effective interventions in the lives of criminal offenders. Original articles by leading criminologists provide in-depth analyses of turning points in the desistance process experienced by criminal offenders. An understanding of the sources of turning points or interventions across the life course is vital to assessing their impact on criminal behavior. Three sources of interventions in criminal careers are identified in the literature: structural location, human agency, and situated choice. Structural location refers to the social place occupied by an individual in the social structure, including marital and occupational status, education, and income, and so on. Human agency means the active will of an individual to change his or her behavior, that is, the decision to stop engaging in criminal activities. In addition, situated choice coordinates the offender's willingness to end a life of crime with the social structural supports that increase the odds of criminal desistance. This comprehensive book considers all three sources of turning points: structural location, human agency, and situated choice across the life course of criminal offenders. The book also provides a section on cross-cultural perspectives on the

effectiveness of interventions in the careers of criminal offenders The policy implications of each intervention are considered in individual chapters In addition the authors suggest a research agenda to further the understanding of the interplay among the key interventions across the life course This book will be of interest to researchers studying criminology from a life course perspective as well as crime prevention and public policy
