The Criminal Justice System Ebbe B. Ebbesen, Vladimir J. Konecni, 1982 , The Psychology of Criminal Justice Geoffrey Stephenson, 1992-04-08 The Psychology of Criminal Justice integrates aspects of psychology s contributions to criminology and to socio legal studies within a single narrative framework It does this by describing the interpersonal and group dynamics of decision making at key stages in the processing of accused persons from the time an alleged offence is committed to the moment sentence is passed The book bears directly on many current debates concerning the ability of the criminal justice system to deliver reliable verdicts It recognizes the interdependence of decision makers in the system and addresses questions at an appropriately social psychological level The book examines systematically and critically the dynamics of criminal decision making the response of victims the assumptions attitudes and behavior of police officers the conduct of court proceedings the performance of witnesses the strengths and weaknesses of juries and the sentencing of magistrates and judges Discussions of law and morality the attribution of blame in court and in everyday life and the achievement of justice in interpersonal and organizational contexts provide a definitive account of the social psychology of law in the context of criminal justice Problems with our adversarial system of justice have led to the establishment of a Royal Commission on Criminal Justice It is commonplace to seek a scapegoat in the behavior of one or other protagonist in the system especially the police It will become clear to readers of this book that breakdowns of the system are a product of persuasive interpersonal and intergroup processes of organization reaching well beyond the behavior of any one agent

Social Research in the Judicial Process Wallace D. Loh, 1984-09-17 How to inform the judicial mind Justice Frankfurter remarked during the school desegregation cases is one of the most complicated problems Social research is a potential source of such information Indeed in the 1960s and 1970s with activist courts at the forefront of social reform the field of law and social science came of age But for all the recent activity and scholarship in this area few books have attempted to create an intellectual framework a systematic introduction to applied social legal research Social Research in the Judicial Process addresses this need for a broader picture Designed for use by both law students and social science students it constructs a conceptual bridge between social research the realm of social facts and judicial decision making the

realm of social values Its unique casebook format weaves together judicial opinions empirical studies and original text It is a process oriented book that teaches skills and perspectives cultivating an informed sensitivity to the use and misuse of psychology social psychology and sociology in appellate and trial adjudication Among the social legal topics explored are school desegregation capital punishment jury impartiality and eyewitness identification This casebook is remarkable for its scope its accessibility and the intelligence of its conceptual integration It provides the kind of interdisciplinary teaching framework that should eventually help lawyers to make knowledgeable use of social research and social scientists to conduct useful research within a legally sophisticated context

Reason Curve, Jury Competence, and the English Criminal Justice System Bethel Erastus-Obilo, 2009 *Reason Curve Jury Competence and the English Criminal Justice System* a cross jurisdictional and cross disciplinary book seeks to stimulate discussion and extend the debate in the area of criminal trials in light of the absence of an articulated explanation for a verdict The book traces the history and development of the jury from the Carolingian kings its advancement in the English Courts following papal intervention the impact of the Magna Carta to its general use current curtailment in England and Wales and re emergence in Continental Europe Central to the book's submission is the dictum that the jurors franchise to deliver a cryptic verdict is a matter between them and their conscience In light of human and civil rights movements the book advances arguments that a cryptic verdict may offend the principle of fair trials in criminal justice This is amplified by the presence of a developing and significant body of law that demands that decisions by public officers be accompanied by articulated pronouncements regarding the basis for their decision While the

book does not contend with the sanctity of jury deliberations and recognizes the difficulties associated with reason articulation by lay assessors it argues that the jury continuum provides a fertile ground not only for articulating a verdict in light of human experiences but also for generating the reason curve which provides legitimacy for that verdict Furthermore the reason curve argues that it is entirely possible for the jury to articulate its reasons provided the Criminal Justice System makes provisions not just to expect an explained verdict from the jury but also provides it with the necessary facilities needed for compliance Exploring research and sources in the fields of law and psychology in Europe the USA and other jurisdictions around the world this book is written for an international audience as a catalyst for the student of legal jurisprudence who has interests in the concepts of reason accountability transparency and human rights in the criminal justice system It is also written for the cognitive and behavioral psychologist with an interest in lay decision making in criminal trials In the large legal jurisdictions of the USA and Canada the right to a jury trial is enshrined in state articles As such there is less tinkering with the institution In England and Wales where Parliament is supreme and the constitution is unwritten no such right exists Consequently the government enjoys tremendous leeway in tinkering with the right to jury trial Whether or not the institution can evolve to deliver a 21st Century approach is a matter for full debate research and the march of time

Reparation for Victims of Crimes against

Humanity Jo-Anne Wemmers, 2014-05-30 Each year countless people fall victim to crimes against humanity. These include widespread occurrences of systematic murder, torture, rape, disappearances, forced deportation, and political persecution. Crimes against humanity constitute an attack on human dignity and as such they violate the human rights of the victim as well as the laws of humanity. In recent years, following the creation of the International Criminal Court, there has been a growing interest in the prosecution of offenders and in particular in reparation following crimes against humanity. While such measures are meant to provide justice for victims, victims are often forgotten or lost in legal debates about what constitutes reparation and who is eligible to receive it. This book reaches beyond the boundaries of law and psychology and takes a multidisciplinary approach to the question of reparation for victims of crimes against humanity. Law does not take place in a vacuum and it is important to consider the impact of the law on the psychology of the victim as well as the legal principles themselves. Herein lies the originality of this book which bridges the gaps between psychology, victimology, criminology, and law and will be of key interest to academics and students engaged in the study of these areas.
