## **Society Knowledge:**

Society and Knowledge Donald N. Levine, 2017-07-05 The sociology of knowledge is generally seen as part of the sociology of cultural products Along with the sociology of science it explores the social character of science and in particular the social production of scientific knowledge Knowledge in all its varieties is of crucial importance in social political and economic relations in modern society Yet new realities the editors argue in their introduction to this second edition require a new perspective In the past half century the social role of knowledge has changed profoundly The natural attitude toward scientific knowledge in science that assigned a special status to science's knowledge claims has lost its dominance and the view that all knowledge is socially constructed has gained general acceptance Science increasingly influences the political agenda in modern societies Consequently a new political field has emerged knowledge politics These fourteen essays by social scientists philosophers and historians cover fundamental issues theoretical perspectives knowledge and power and empirical studies Eight of the fourteen contributions were part of the first edition of *Society and Knowledge* published in 1984 and most of these have been updated and revised for this new edition Included in this edition are six new contributions by Robert K Merton Steve Fuller Dick Pels Nico Stehr Barry Schwartz and Michael Lynch This second revised edition builds on its predecessor in presenting cutting edge theoretical and empirical efforts to transform the sociology of knowledge Professionals policymakers and graduate students in the fields of sociology political science and social science will find this volume of interest and importance

**The Knowledge Society** Gernot Böhme, Nico Stehr, 2012-12-06 The original essays collected here under the general title of *The Knowledge Society* were first commissioned for a conference held in the late fall of 1984 at the Technische Hochschule Darmstadt West Germany The conference in Darmstadt saw a larger number of contributions presented than could be accommodated in this edition of the *Sociology of the Sciences Yearbook* However all contributions were important and affected those published in this collection We are therefore grateful to all participants of the Darmstadt conference for their presentations and for their intense useful as well as thoughtful discussion of all papers Those chosen for publication in the *Yearbook* and those undoubtedly to be published elsewhere have all benefitted considerably from our discussions in Darmstadt which also included a number of the members of the editorial board of the *Yearbook* In addition we are pleased that the authors were able to read and comment further on each other's papers prior to publication As is the case in every endeavor of this kind we have incurred many debts and are only able to acknowledge these at this point publicly while expressing our sincere thanks and appreciation for all the intellectual support and the considerable labor invested by a number of persons in the realization of the collection

Tennyson, David Avison, Ambjörn Naeve, Adrian Dale, Paul Lefrere, Felix Tan, Janice Sipior, Gottfried Vossen, 2009-09-16. It is a great pleasure to share with you the Springer LNCS proceedings of the Second World Summit on the Knowledge Society WSKS 2009 organized by the Open Search Society, NGO <http://www.openknowledge.society.org> and held in Samaria Hotel in the beautiful city of Chania in Crete, Greece, September 16-18, 2009. The 2nd World Summit on the Knowledge Society WSKS 2009 was an international scientific event devoted to promoting dialogue on the main aspects of the knowledge society towards a better world for all. The multidimensional economic and social crisis of the last couple of years has brought to the fore the need to discuss in depth new policies and strategies for a human-centric developmental processes in the global context. This annual summit brings together key stakeholders involved in the worldwide development of the knowledge society from academia, industry and government, including policy makers and active citizens to look at the impact and prospects of information technology and the knowledge-based era it is creating on key facets of living, working, learning, innovating and collaborating in today's hyper-complex world. The summit provides a distinct, unique forum for cross-disciplinary fertilization of research favoring the dissemination of research on new scientific ideas relevant to international research agendas such as the EU FP7, OECD or UNESCO. We focus on the key aspects of a new sustainable deal for a bold response to the multidimensional crisis of our times.

**The Knowledge Society** Gernot Böhme, Nico Stehr, 1986-07-31. The original essays collected here under the general title of *The Knowledge Society* were first commissioned for a conference held in the late fall of 1984 at the Technische Hochschule Darmstadt, West Germany. The conference in Darmstadt saw a larger number of

contributions presented than could be accommodated in this edition of the Sociology of the Sciences Yearbook. However, all contributions were important and affected those published in this collection. We are therefore grateful to all participants of the Darmstadt conference for their presentations and for their intense, useful as well as thoughtful discussion of all papers. Those chosen for publication in the Yearbook and those undoubtedly to be published elsewhere have all benefitted considerably from our discussions in Darmstadt, which also included a number of the members of the editorial board of the Yearbook. In addition, we are pleased that the authors were able to read and comment further on each other's papers prior to publication. As is the case in every endeavor of this kind, we have incurred many debts and are only able to acknowledge these at this point publicly while expressing our sincere thanks and appreciation for all the intellectual support and the considerable labor invested by a number of persons in the realization of the collection.

**Participating in the Knowledge Society** R. Finnegan, 2005-09-27. In current debates about the knowledge society and the organization of research, the spotlight is most often on the universities. This interdisciplinary and transhistorical volume focuses on the less often recognized work of independent researchers creating and participating in knowledge outside the academy, from seventeenth-century north country astronomers to Victorian naturalists to today's think tanks, community historians, and new forms of researching and publishing through the internet. These intriguing cases raise challenging issues about the location, definition, and validation of research, about active participation in knowledge generation, and about the perhaps changing boundaries of university today.

**Knowledge and Society** Eric Aaron Johnson,1994 *On the improvement of society by the diffusion of knowledge. The philosophy of a future state. The philosophy of religion. The Christian philosopher. On the mental illumination and moral improvement of mankind. v. 2. An essay on the sin and the evils of covetousness. Celestial scenery. The sideral heavens and other subjects connected with astronomy. The practical astronomer. The solar system. The atmosphere and atmospherical phenomena* Thomas Dick,1853 **Who Owns Knowledge?** Nico Stehr,Bernd Weiler,2011-12-31 **Who Owns Knowledge** explores the emerging linkages between the extension of knowledge and the law It anticipates that the legal system will not only be called upon to adjudicate in matters of creative minds but will be expected to do so to an ever increasing degree Linkages between the legal system and knowledge are bound to multiply in modern societies Ironically while increasingly relying on knowledge we are simultaneously investing significant resources into controlling this same knowledge This includes developing a system of legal governance over how knowledge is extended or enlarged Such modes of governance may take the form of regulatory legal codes or legal challenges and judgments that shape the evolution of modern society and potentially transform knowledge itself as a productive force **Who Owns Knowledge** asks such questions as What is the appropriate balance of public and private interests involved in this process How can creative powers natural resources and indigenous knowledge be protected from either public or private exploitation Does the law have the power to prevent this exploitation or is adaptive technology needed Also in this identity theft conscious age how can the rights of the individual be protected against policies allowing access to any kind of information especially confidential information The editors and contributors demonstrate that the relationship between knowledge and the law needs to be further researched and discussed **Who Owns Knowledge** is a must read for those interested in the subjects of intellectual property the history and development of modern legal and economic systems and their entanglements and how judicial systems make choices between the legal and economic systems and especially between the public and private good and their often opposing interests

**Information Society** Karamjit S. Gill,2012-12-06 **Human centredness A Challenge to Post industrial Europe** The key power in industrial society has been linked to the possession of capital and factory In the information society it could be rather different If one accepts that that the key power in the information society will be linked not so much to the ownership of information but to human creativity nourished by that information the productive force of today and tomorrow could be more and more the human brain Making use of one s intelligence is always accompanied by positive emotion which in turn

further activates the intelligence But unfortunately under present conditions workers of all levels live in fear anxiety and stress rather than desire and motivation The question of basic human ecology quality of life is therefore a major strategic factor It is precisely the opposite to the mechanisms of exclusion that currently dominate our society exclusion of young people through joblessness but also exclusion through technology as with the helplessness of older people or the poorly educated confronted with ticket dispensing machines or other automats This is not idle theorizing it corresponds to concrete facts It is for example how some observers interpret the crisis at IBM Because its programs were less human friendly it was shaken to its foundations by Apple and Microsof though it seems since to have learnt its lesson
