Sociogenesis Reexamined:

Sociogenesis Reexamined Willibrord De Graaf, Robert Maier, 2012-12-06 Sociogenesis Reexamined offers the foundation for an inter disciplinary social scientific approach towards the development of persons in their historical and societal contexts The editors have organized herein the opportunity for exchange and theoretical confrontation on the theme of mechanisms in sociogenesis Stemming from a workshop that took place at the Rijksuniversiteit Utrecht in December 1990 the editors and contributors attempt to begin the refinement and reworking of the concept of sociogenesis Two possible branches in the definition of sociogenesis are presented in the introduction as a useful guide in mapping existing approaches The text is then divided into four parts theoretical and historical foundations new conceptual approaches analysis of existing frameworks empirical case studies Systematic perspectives for research in the field are offered For developmental and social psychologists anthropologists researchers and graduate students this groundbreaking work will surely initiate much elaboration and innovation in the study of sociogenesis

Language Structure, Discourse, and the Access to Consciousness Maksim Stamenov, 1997-01-01 The focus of this collective volume is on the mutual determination of language structure discourse patterns and the accessibility to consciousness of mental contents of different types of organization and complexity The contributions address the following problems among others the history of the interpretation of conscious and unconscious mind in the theoretical discourse of modern linguistics the determination of the structure of consciousness by the grammatical structure the levels of access of grammatical and lexical information to consciousness the development of cognitive complexity and control in ontogeny pathologies of consciousness access in discourse comprehension and production the cognitive contextual prerequisites for the representation of meaning in consciousness the relationships between language structure and qualia in the phenomenology of experience the dialogical structure of intentionality and meaning representation etc Series B

Dialogicality in Development Ingrid E. Josephs, 2003-09-30 The crucial nature of developmental theory is the question of relationship between cultural and personal facets of human development Dialogue is a useful concept to specify this relationship from a process oriented perspective In its broadest sense the notion of dialogue entails the interaction between at least two entities persons meanings perspectives out of which novelty can but need not emerge Thus dialogic models are open for developmental questions These issues are examined in this the first volume in which the increasingly popular metaphor of dialogue is systematically applied to developmental issues Dialogue is a multilevel concept and can be understood 1 as a real exchange between two interacting persons 2 as the interaction between culture at large e g stories and narratives and the interacting developing person and 3 as a metaphor for developmental processes in general In the first part of this international volume the concept of dialogue is elaborated by researchers from different disciplines The focus of the second section is on dialogic models in the area of self development The third deals with the dialogical co development of person and culture

A Theory of Imagining, Knowing, and Understanding Luca

Tateo,2020-03-09 This is a book about imaginative work and its relationship with the construction of knowledge It is fully acknowledged by epistemologists that imagination is not something opposed to rationality it is not mere fantasy opposed to intellect In philosophy and cognitive sciences imagination is generally delimiting not much more than the mental ability to interact cognitively with things that are not now present via the senses Stuart 2017 p 11 For centuries scholars and poets have wondered where this capability could come from whether it is inspired by divinity or it is a peculiar feature of human mind Tateo 2017b The omnipresence of imaginative work in both every day and highly specialized human activities requires a profoundly radical understanding of this phenomenon We need to work imaginatively in order to achieve knowledge thus imagination must be something more than a mere flight of fantasy Considering different stories in the field of scientific endeavor I will try to propose the idea that the imaginative process is fundamental higher mental function that concurs in our experiencing knowing and understanding the world we are part of This book is thus about a theoretical idea of imagining as constant part of the complex whole we call the human psyche It is a story of human beings striving not only for knowledge and exploration but also striving for imagining possibilities

International Handbook of Psychology in Education

Karen Littleton,Clare Wood,Judith Kleine Staarman,2010-05-26 Provides researchers practitioners and advisers working in the fields of psychology and education with an overview of research across a broad spectrum of work within the domain of psychology of education This book focuses on typically developing school age children although issues relating to specific learning difficulties are also addressed

Understanding Educational Psychology Wolff-Michael Roth,Alfredo

Jornet,2016-08-19 This book takes up the agenda of the late but unknown L S Vygotsky who had turned to the philosopher Spinoza to develop a holistic approach to psychology an approach that no longer dichotomized the body and mind intellect and affect or the individual and the social In this approach there is only one substance which manifests itself in different ways in the thinking body including as biology and culture The manifestation as culture is premised on the existence of the social In much of current educational psychology there are unresolved contradictions that have their origin in the opposition between body and mind individual and collective and structure and process including the different nature of intellect and affect or the difference between knowledge and its application Many of the same contradictions are repeated in constructivist approaches which do not overcome dichotomies but ratheracerbate them by individualizing and intellectualizing our knowledgeable participation in recognizably exhibiting and producing the everyday cultural world Interestingly enough L S Vygotsky who is often used as a referent for making arguments about inter and intrasubjective mental constructions developed towards the end of his life a Spinozist approach according to which there is only one substance This one substance manifests itself in two radically different ways body material biology and mind society culture But there are not two substances that are combined into a unit there is only one substance Once such an approach is adopted the classical question of cognitive scientists about how symbols are grounded in the world comes to be recognized as an

artefact of the theory Drawing on empirical materials from different learning settings including parent child school and workplace settings this book explores the opportunities and implications that this non dualist approach has for educational research and practice Qualitative Research Practice Clive Seale,2007 Aimed at the student reader this book demonstrates the benefits of using particular methods from the viewpoint of real life experience It contains chapters written by leading internationally distinguished qualitative researchers who recount and reflect on their own research experiences as well as others **Dialogical Approaches and Tensions in Learning and Development** Nathalie Muller Mirza,Marcelo Dos Santos Mamed,2021-10-26 The book pursues the goal of exploring and strengthening a dialogical approach of communication and cognition It brings together contributions from world leading researchers related to the dialogical approach in education and psychology It presents among others the place of language and materiality in the development of communication and thinking as well as the role of the methods in the relationship between researchers and participants This leads to an innovative definition of the dialogicality and how a dialogical approach can provide heuristic conceptual and methodological tools to better understand how people think communicate and learn in a complex world The authors hereby develop an epistemological framework inspired by scholars such as Michail Bakhtin Lev Vygotsky and Herbert Mead under the assumption that dialogue or dialogicality and therefore the presence of the other is fundamentally entangled into the human thinking and development This book contributes to the understanding of human communication cognition and mind and participates in a scientific dialogue which helps to advance future research It includes theoretical and empirical chapters and presents innovative methods of inquiry which makes it a useful tool for both teaching and research **Communication and Metacommunication in Human Development** Jaan Valsiner,Angela Uchoa Branco,2006-01-01 The book is divided into three parts In Part I basic conceptual and theoretical issues concerning communication and metacommunication are presented Part II continues the coverage with the issues of communication and metacommunication Those are extended as each chapter puts forward new insights and contextualizes them within the realms of teaching learning processes early adaptation to nursery school contexts and of the analysis of processes occurring at a particular dimension of human development gender identity Part III provides further conceptual and theoretical elaborations on the phenomena from the unique viewpoints of scholars with diverse backgrounds which definitely furnish scientific discussion over the issue with fresh and productive ideas Throughout the chapters the reader is supplied with empirical projects conducted in different research laboratories each study granting novel illustrations of methodological approaches to analyze the complexities of communication and metacommunication processes and their relevant constitutive roles in specific contexts *Dynamics and indeterminism in Developmental and Social Processes* Alan Fogel,Maria C.D.P. Lyra,Jaan Valsiner,2014-02-04 One of the most profound insights of the dynamic systems perspective is that new structures resulting from the developmental process do not need to be planned in advance nor is it necessary to have these structures represented in genetic or neurological

templates prior to their emergence Rather new structures can emerge as components of the individual and the environment self organize that is as they mutually constrain each other s actions new patterns and structures may arise This theoretical possibility brings into developmental theory the important concept of indeterminism the possibility that developmental outcomes may not be predictable in any simple linear causal way from their antecedents This is the first book to take a critical and serious look at the role of indeterminism in psychological and behavioral development What is the source of this indeterminism What is its role in developmental change Is it merely the result of incomplete observational data or error in measurement It reviews the concepts of indeterminism and determinism in their historical philosophical and theoretical perspectives particularly in relation to dynamic systems thinking and applies these general ideas to systems of nonverbal communication Stressing the indeterminacy inherent to symbols and meaning making in social systems several chapters address the issue of indeterminism from metaphorical modeling and narrative perspectives Others discuss those indeterministic processes within the individual related to emotional social and cognitive development

Revisiting a Progressive Pedagogy Nancy Nager,Edna K. Shapiro,2000-02-24 Revisiting a Progressive Pedagogy reviews the history of the developmental interactive approach a formulation rooted in developmental psychology and educational practice progressively informing educational thinking since the early twentieth century This conceptualization is identified with but not restricted to Bank Street College of Education Examining the origins and evolution of the approach the contributors assess its continued heuristic and practical value for classroom practice and teacher education in light of new ideas in social science and education and indicate new directions The book describes and analyzes key assumptions and assesses the compatibility of new theoretical approaches focuses on historical precedents and current adaptations in classroom practice and examines teacher education giving close attention to the personal and professional development of teachers Contributors include Edna K Shapiro Nancy Nager Margery B Franklin Laura M W Martin Linda Levine Salvatore Vascellaro Lucy Sprague Mitchell Edith Gwathmey Ann Marie Mott Nina Jaffe Carol Lippman Eva G Haberman Frank Pignatelli Helen Freidus Jonathan Silin and Eileen Wasow

Deconstructing Feminist Psychology Erica Burman,1997-11-14 How close is feminist psychology to contemporary feminism How can feminist psychological practice address issues of difference between women in meaningful ways What price has feminist psychology had to pay for attempting to engage with mainstream psychology to revise and improve it This book critiques feminist practice within psychology and reflects the diversity from across the globe of feminist struggles around psychology An international group of key feminist psychologists explore the relations between feminist politics and psychological practices in transitional and postcolonial contexts the distinct European traditions of critical psychology and women s studies and psychology s colonial centre in the United States Issues of race class and sexuality figure centrally in the discussions around the politics of feminist practice in psychology
