Sugar Without Slaves The Political Economy Of British Guiana 1838 1904:

Sugar Without Slaves Alan H. Adamson, 1972 **Economic Growth and the Ending of the Transatlantic Slave Trade** David Eltis, 1987-06-11 This watershed study is the first to consider in concrete terms the consequences of Britain's abolition of the Atlantic slave trade. Why did Britain pull out of the slave trade just when it was becoming important for the world economy and the demand for labor around the world was high? Caught between the incentives offered by the world economy for continuing trade at full tilt and the ideological and political pressures from its domestic abolitionist movement, Britain chose to withdraw, believing in part that freed slaves would work for low pay which in turn would lead to greater and cheaper products. In a provocative new thesis, historian David Eltis here contends that this move did not bolster the British economy; rather, it vastly hindered economic expansion as the empire's control of the slave trade and its great reliance on slave labor had played a major role in its rise to world economic dominance. Thus, for sixty years after Britain pulled out, the slave economies of Africa and the Americas flourished, and these powers became the dominant exporters in many markets formerly controlled by Britain. Addressing still volatile issues arising from the clash between economic and ideological goals, this global study illustrates how British abolitionism changed the tide of economic and human history on three continents.

Indentured Labour in the British Empire, 1834-1920 Kay Saunders, 2018-03-14 First published in 1984, *Indentured labour migration in the nineteenth century* intersects many of the most serious issues of our own time: racism, Third World poverty, and the arrogance of a great world power. Indenture suggests lack of freedom and the exploitation of people formed into exile or misadventure. Coming as it did after the abolition of slavery in the British Empire in 1834, in many respects it can be regarded as a replacement of the slave labour system. Indeed, both concerned humanitarians and officials in the nineteenth century, and many historians subsequently have regarded indentured labour merely as a new system of slavery. Many of the articles in this book address themselves to this assertion whilst investigating the particular variations inherent in their geographic area. The differing patterns of Indian indenture in the West Indies and British Guiana, coming almost immediately after slavery, forms the first section of this book. Attention is given to the Indians engaged in the sugar industries in Mauritius and Fiji, and the rubber industry in Malaya. The use of Pacific Islanders in the Queensland industry is also examined, particularly in the sugar industry which by the early twentieth century contained the unique pattern of white, expensive, unionized labour. Other groups dealt with include the aboriginal workers in Australia and the Chinese workers in the Transvaal. Overall, this book is comprehensive and far-reaching in its scope and the complex issues which it raises. **The Caribbean and the Atlantic World Economy** Adrian Leonard, D. Pretel, 2016-01-12 This collection of essays explores the inter-imperial connections between British, Spanish, Dutch, and French Caribbean colonies and the Old World countries which founded them. Grounded in primary archival research, the thirteen contributors focus on the ways that participants in the Atlantic World economy transcended imperial boundaries. **A Political And Social History Of Guyana, 1945-1983**

Recreational Uses of Coastal Areas P. Fabbri,2012-12-06 Human clustering in coastal areas The coastal zone has gained a solid reputation as a place vocated for recreational activities and this is generally related to the presence of the sea The relationship however does not appear univocal or simple the sea can be perceived as a hostile element by humans and the more general question of whether the presence of the shore is in itself a favourable repulsive or irrelevant factor to settlement is a debatable point at least for pre industrial societies Back in the early part of the 19th century Friedrich Hegel regarded oceans and rivers as unifying elements rather than dividing ones thus implying a trend towards the concentration of human settlements along them The sea he wrote stimulates 1 courage and conquest as well as profit and plunder although he realized that this did not equally apply to all maritime peoples In Hegel s view different approaches to the sea were mainly the results of cultural factors and in fact he recognized that some people living in coastal areas perceive the sea as a dangerous and alien place and the shore as aftnis terrae **General History of the Carribean UNESCO Vol.3** NA NA,2019-06-12 Volume 3 looks at various aspects of slave societies in the region from the seventeenth to the nineteenth centuries Throughout the tortuous history of the Caribbean nothing exceeded in fundamental importance the twin experiences of slavery and the plantation system the defining episodes of Caribbean social reality Topics addressed include European settler colonies the sugar revolutions forms of resistance the influence of creolization and religious beliefs and the place of the Maroon communities Knight also examines the internal and external forces that led to the eventual collapse of the Caribbean slave system *General History of the Caribbean* Knight, Franklin W.,UNESCO,1997-12-31 This volume the first one published begins with an overview of the slave trade African slavers and the demography of the Caribbean up to 1750 Scholars go on to study the demographic and social structure of the Caribbean slave societies in the 18 and 19 centuries their evolution and significance the social and political control in the slave society and forms of resistance and

Bacchus,2010-12-01 How critical is education in the development struggle of a third world country Responding to popular demands for more accessible education the Guyanese government instituted numerous educational reforms hoping to promote economic growth in both the modern and the traditional sectors of the economy Many in the traditional sector however saw education as a means of economic advancement and sought increasingly to move into higher social strata through employment in the modern sector Consequently the civil service and private firms gained an oversupply of personnel while agriculture and small business suffered and unemployment increased The author examines Guyana s educational system from historical political social and economic perspectives and draws implications for other developing countries

American vision **Colin Palmer's Trilogy on Imperialism in the Caribbean, Omnibus E-Book** Colin A.

Palmer,2014-03-01 This Omnibus E Book brings together all three of Colin A Palmer s books on the making of the modern Caribbean Included are Freedom s Children The 1938 Labor Rebellion and the Birth of Modern Jamaica This is the first

comprehensive history of Jamaica's watershed 1938 labor rebellion and its aftermath. The rebellion produced two rival leaders who dominated the political life of the colony through the achievement of independence in 1962. Alexander Bustamante, a moneylender, founded the Bustamante Industrial Trade Union and its progeny, the Jamaica Labour Party. Norman Manley, an eminent barrister, led the struggle for self-government and with others established the People's National Party. Palmer sheds new light on the nature of Bustamante's collaboration with the imperial regime, the rise of the trade union movement, the struggle for constitutional change, and the emergence of party politics in a modernizing Jamaica.

Cheddi Jagan and the Politics of Power: British Guiana's Struggle for Independence Palmer here tells the story of British Guiana's struggle for independence. The work details the rise and fall of Cheddi Jagan from his initial electoral victory in the spring of 1953 to the aftermath of the British orchestrated coup d'état that led to the suspension of the constitution and the removal of Jagan's independence-minded administration. Bringing the larger story of Caribbean colonialism into view, this work shows how violence, police corruption, political chicanery, racial politics, and poor leadership delayed Guyana's independence until 1966, scarring the body politic in the process.

Eric Williams and the Making of the Modern Caribbean In this first scholarly assessment of Williams, 1911-1981, founder of the Republic of Trinidad and Tobago's first modern political party and the nation's first prime minister, Palmer explores his life as a scholar and politician and his tremendous influence on the historiography and politics of the Caribbean. Palmer focuses especially on a 14-year period of independence struggles in the Anglophone Caribbean when Williams helped resolve regional disputes and promoted the creation of a pan-Caribbean federation.

The Economics of Emancipation Kathleen Mary Butler, 2017-12-15. The British Slavery Abolition Act of 1834 provided a grant of £20 million to compensate the owners of West Indian slaves for the loss of their human property. In this first comparative analysis of the impact of the award on the colonies, Mary Butler focuses on Jamaica and Barbados, two of Britain's premier sugar islands. *The Economics of Emancipation* examines the effect of compensated emancipation on colonial credit, landownership, plantation land values, and the broader spheres of international trade and finance. Butler also brings the role and status of women as creditors and plantation owners into focus for the first time. Through her analysis of rarely used chancery court records, attorneys' letters, and compensation returns, Butler underscores the fragility of the colonial economies of Jamaica and Barbados, illustrates the changing relationship between planters and merchants, and offers new insights into the social and political history of the West Indies and Britain.

Margins and Mainstreams Gary Y. Okihiro, 2014-04-01. In this classic book on the meaning of multiculturalism in larger American society, Gary Okihiro explores the significance of Asian American experiences from the perspectives of historical consciousness, race, gender, class, and culture. While exploring anew the meanings of Asian American social history, Okihiro argues that the core values and ideals of the nation emanate today not from the so-called mainstream but from the margins, from among Asian and African Americans, Latinos, and American Indians, women, and the

gay and lesbian community Those groups in their struggles for equality have helped to preserve and advance the founders ideals and have made America a more democratic place for all
