Suicide Notes Antoon A. Leenaars,1988 **Discourses of Men's Suicide Notes** Dariusz Galasinski,2017-10-19
Deaths by suicide are high every 40 seconds someone in the world chooses to end their life Despite acknowledgement that suicide notes are social texts there has been no book which analyzes suicide notes as discursive texts and no attempt at a qualitative discourse analysis of them Discourses of Men s Suicide Notes redresses this gap in the literature Focussing on men and masculinity and anchored in qualitative discourse analysis Dariusz Galasinski responds to the need for a more thorough understanding of suicidal behaviour Culturally men have been posited to be masters of the universe and yet some choose to end their lives This book takes a qualitative approach to data gathered from the Polish Corpus of Suicide Notes a unique repository of over 600 suicide notes to explore discourse from and about men at the most traumatic juncture of their lives Discussing how men construct suicide notes and the ways in which they position their relationships and identities within them Discourses of Men s Suicide Notes seeks to understand what these notes mean and what significance and power they are invested with **Teenage Suicide Notes** Terry Williams,2017-02-21 Picturing myself dying in a way I choose myself seems so comforting healing and heroic I d look at my wrists watch the blood seeping and be a spectator in my last act of self determination By having lost all my self respect it seems like the last pride I own determining the time I die Kyra V seventeen Reading the confessions of a teenager contemplating suicide is uncomfortable but we must do so to understand why self harm has become epidemic especially in the United States What drives teenagers to self harm What makes death so attractive so liberating and so inevitable for so many In Teenage Suicide Notes sociologist Terry Williams pores over the writings of a diverse group of troubled youths to better grasp the motivations behind teenage suicide and to humanize those at risk of taking their own lives Williams evaluates young people in rural and urban contexts and across lines of race class gender and sexual orientation His approach which combines sensitive portrayals with sociological analysis adds a clarifying dimension to the fickle and often frustrating behavior of adolescents Williams reads between the lines of his subjects seemingly straightforward reflections on alienation agency euphoria and loss and investigates how this cocktail of emotions can lead to suicide or not Rather than treating these notes as exceptional examples of self expression Williams situates them at the center of teenage life linking them to abuse violence depression anxiety religion peer pressure sexual identity and family dynamics He captures the currents that turn self destruction into an act of self determination and proposes more effective solutions to resolving the suicide crisis **Comprehensive Textbook of Suicidology** Alan Lee Berman,Morton M. Silverman,Bruce Michael Bongar,2000-08-10 Multidisciplinary and comprehensive in scope this volume serves as an authoritative overview of scientific knowledge about suicide and its prevention providing a foundation in theory research and clinical applications Issues relevant to clinical case management are highlighted and various treatment modalities are discussed in light of the latest research findings **THEORIES OF SUICIDE** John F. Gunn,David Lester,2015-06-01 Some

researchers in the field of suicidology think that the old theories of suicide are too constraining and impede advances in the understanding of suicide. However, the book's authors are not quite so critical of past theories. In the book, they review the classic theories of suicide, both psychological and sociological, because they are the foundation of our current theories and also propose the skeletons of possible future theories. The goal of the text is to present researchers with theories to guide their research, encourage them to modify these theories, perhaps meld them together in some cases, and think how they might propose new theories. Presented in three sections, the first reviews significant psychological theories including Suicide as Escape, Interpersonal Psychological theory, The Role of Defeat and Entrapment in Suicidal Behavior, Suicide Ethology, and Sociobiology, Stress Diatheses, Cognitive Theories, Learning Perspective on Suicide, Theories of Personality and Suicide, Typological Theories, and the Pathophysiology of Suicide. The second section of the text addresses Sociological and Economic Theories, including Suicide as Deviance, Naroll's Thwarting Disorientation Theory, three classic sociological theories, as well as several minor theories. A comprehensive chapter on economic theories is offered by Bijou Yang. The final section concentrates on Critical Thoughts About Theories of Suicide, a new and growing influence in academia and scholarship.

The Psychology of Death Investigations Katherine Ramsland, 2017-11-06. The Psychology of Death Investigations outlines definitively how behavioral evidence can often provide the necessary components and missing pieces to complement physical evidence as an essential tool for incident reconstruction. In order to determine the direction of an investigation and to prioritize leads, if necessary, death investigators must establish the manner of a death: natural, accident, homicide, or suicide. The most overlooked aspect of death investigation is the psychological dimension, which can provide unique leads, correct false assumptions, enhance investigative awareness, and solve cases in surprising ways. In an estimated 10-20% of cases, the manner of death cannot be determined or, worse, has been erroneously categorized. Since many jurisdictions can't afford behavioral consultants, this book has been written to provide practical information for a basic psychological analysis. If the circumstances surrounding a death are equivocal, psychological consultants can compile information retrospectively about a deceased person's mental state and possible motive to assist with unravelling ambiguity about the manner of death. This is the primary function of a psychological autopsy, and as such, this is the first book of its kind dedicated solely to the topic. In the event that the manner of death is determined to be a homicide, behavioral profiling can help to focus the potential pool of suspects. Professionals and students alike will benefit from the exercise of cognitive awareness and the application of psychological logic presented. Psychologists, medical examiners, coroners, attorneys, fraud examiners, law enforcement personnel, death and homicide investigators, and students enrolled in criminal profiling, forensic psychology, and criminal justice programs will find this text to be a compelling and insightful reference to add to their professional toolkit.
