The fifth edition of the Kirk Othmer Encyclopedia of Chemical Technology builds upon the solid foundation of the previous editions which have proven to be a mainstay for chemists, biochemists, and engineers at academic, industrial, and government institutions since publication of the first edition in 1949. The new edition includes necessary adjustments and modernization of the content to reflect changes and developments in chemical technology. **The Complete Technology Book on Soaps (2nd Revised Edition)** NIIR Board of Consultants & Engineers, 2016-04-08. Soap is the traditional washing compound made from oil, fats, and caustic alkali. It is an item of daily necessity as a cleaning agent. There are few specialty soaps like the washing soaps, castile soaps, sandal soap, specially flavored soaps, medicated soaps, toilet soaps, and baby soaps. Population growth, especially in households with children, has a proportional impact on the growth of the manufacturing sector of the industry. The soap industry is vivacious, varied, creative, and tricky and has the prospective to provide a gratifying career. With increasing popularity, there has been an increase in potential competitors, but it still has the opportunity of further exploitation. Today, with an increase in disposable incomes all around the world, demand for these products is expected to increase because consumers are moving up towards premium products. With increasing awareness of hygienic standards, the market for the soap is growing at a rate higher than 8% annually. People have become more creative in trying to find new ways in which they can make soap either for domestic use or commercial purposes. This book will provide all the basic facts and information you need to get started. You will be able to slowly build your way up to completely master the art of soap making. The book contains processes, formulae, photographs of plant machinery, with supplier's contact details, addresses of raw material suppliers, and providing information regarding manufacturing methods of different washing and toilet soaps. Some of the fundamentals of the book are raw material, oil and fats, fatty acids, manufacture of soap products, technology of soap manufacturing, various formulations of soaps, soap perfumery, management of soap factories, analytical methods. This book will be a mile stone for its readers who are new to this sector. It will also find useful for professionals, entrepreneurs, those studying and researching in this important area.
