State of Authority Gerry Van Klinken,Joshua Barker,2018-05-31 A major realignment is taking place in the way we understand the state in Indonesia New studies on local politics ethnicity the democratic transition corruption Islam popular culture and other areas hint at novel concepts of the state though often without fully articulating them This book captures several dimensions of this shift One reason for the new thinking is a fresh wind that has altered state studies generally People are posing new kinds of questions about the state and developing new methodologies to answer them Another reason for this shift is that Indonesia itself has changed probably more than most people recognize It looks more democratic but also more chaotic and corrupt than it did during the militaristic New Order of 1966 1998 State of Authority offers a range of detailed case studies based on fieldwork in many different settings around the archipelago The studies bring to life figures of authority who have sought to carve out positions of power for themselves using legal and illegal means These figures include village heads informal slum leaders district heads parliamentarians and others These individuals negotiate in settings where the state is evident and where it is discussed coffee houses hotel lounges fishing waters and street side stalls These case studies and the broader trend in scholarship of which they are a part allow for a new theorization of the state in Indonesia

that more adequately addresses the complexity of political life in this vast archipelago nation State of Authority demonstrates that the state of Indonesia is not monolithic but is constituted from the ground up by a host of local negotiations and symbolic practices   A Working Bibliography of the Island of Sumba, Eastern Indonesia Taro Goh,1987   *Bibliographies on Southeast Asia* ,1998   **World Military History Bibliography** Barton Hacker,2003-06-01 Preclassical and indigenous nonwestern military institutions and methods of warfare are the chief subjects of this annotated bibliography of work published 1967 1997 Classical antiquity post Roman Europe and the westernized armed forces of the 20th century although covered receive less systematic attention Emphasis is on historical studies of military organization and the relationships between military and other social institutions rather than wars and battles Especially rich in references to the periodical literature the bibliography is divided into eight parts 1 general and comparative topics 2 the ancient world 3 Eurasia since antiquity 4 sub Saharan Africa and Oceania 5 pre Columbian America 6 postcontact America 7 the contemporary nonwestern world and 8 philosophical social scientific natural scientific and other works not primarily historical   *The Stranger-Kings of Sikka* E.
