The Story of Alchemy and the Beginnings of Chemistry Matthew Moncrieff Pattison Muir, 1902 **History of Alchemy** M. M. Pattison Muir, 2021-07-23

The system which began to be called alchemy in the 6th and 7th centuries of our era had no special name before that time but was known as the sacred art the divine science the occult science the art of Hermes A commentator on Aristotle writing in the 4th century A D calls certain instruments used for fusion and calcination *chruka organa* that is instruments for melting and pouring Hence probably came the adjective *chymic* or *chymic* and at a somewhat later time the word *chemia* as the name of that art which deals with calcinations fusions meltings and the like The writer of a treatise on astrology in the 5th century speaking of the influences of the stars on the dispositions of man says If a man is born under Mercury he will give himself to astronomy if Mars he will follow the profession of arms if Saturn he will devote himself to the science of alchemy *Scientia alchemiae* The word *alchemia* which appears in this treatise was formed by prefixing the Arabic *al* meaning the to *chemia* a word as we have seen of Greek origin **The Story of Alchemy and the Beginnings of Chemistry** M. M. Pattison Muir, For thousands of years before men had any accurate and exact knowledge of the changes of material things they had thought about these changes regarded them as revelations of spiritual truths built on them theories of things in heaven and earth and a good many things in neither and used them in manufactures arts and handicrafts especially in one very curious manufacture wherein not the thousandth fragment of a grain of the finished article was ever produced The accurate and systematic study of the changes which material things undergo is called chemistry we may perhaps describe alchemy as the superficial and what may be called subjective examination of these changes and the speculative systems and imaginary arts and manufactures founded on that examination We are assured by many old writers that Adam was the first alchemist and we are told by one of the initiated that Adam was created on the sixth day being the 15th of March of the first year of the world certainly alchemy had a long life for chemistry did not begin until about the middle of the 18th century **Alchemy - The Divine Work** Tommy Westlund, Katarina Falkenberg, 2023-09-23 Alchemy is one of the world's oldest wisdom traditions and has until recently been a secret tradition that was only passed down to the chosen and often through a coded language This is because alchemy touches upon that which nothing can surpass the eternal life of the golden consciousness Alchemy shows the way into the deepest mysteries of existence where our essence our gold can be revealed We can realise our full potential through alchemy access our hidden divine abilities and reach spiritual wholeness The alchemist's work is about making the impossible possible to achieve immortality The metaphor for this transformation is expressed as the refining of dark lead into shining gold This miraculous process is the secret of secrets to which this book carries the keys For the first time the divine work is presented in its entirety by authors with extensive experience in alchemy The book conveys alchemy's history philosophy and practice and instructs the reader on how to become an alchemical master Through this one becomes a divine co creator in both one's own refining process as well as that
