Summer River:

Summer River Rick Kantola, 2011-03-01 The fictional Summer River flows through the remote southeast corner of Summer County in Northern California. In addition to an illegal commune assembled on a mining claim on the river, the region is home to an aging cattle rancher, an aspiring wine grape grower, a marijuana grower, and an elder of the New Life Assembly with a spirited teenaged daughter. Still suffering the pain and anger of a broken marriage, Karen Mitchell moves with her five-year-old daughter into a friend's cabin on the south bank of the river. Rick Kantola is a wonderful writer. Great descriptive powers, pleasing line and paragraph rhythms, and a wonderful ear for dialogue. Todd Walton, author *Inside Moves* and *Ruby and Spear*, a gifted writer with a strong moral angle, a capacity for creating memorable characters, and a deep and lovely sense of landscape. Tim Farrington, author *The California Book of the Dead*.

Rivers of North America Michael D. Delong, Timothy D. Jardine, Arthur C. Benke, Colbert E. Cushing, 2023-04-20 *Rivers of North America* Second Edition features new updates on rivers included in the first edition as well as brand new information on additional rivers. This new edition expands the knowledge base, providing readers with a broader comparative approach to understand both the common and distinct attributes of river networks. The first edition addressed the three primary disciplines of river science: hydrology, geomorphology, and ecology. This new edition expands upon the interactive nature of these disciplines, showing how they define the organization of a riverine landscape and its processes. An essential resource for river scientists working in ecology, hydrology, and geomorphology. Provides a single source of information on North America's major rivers. Features authoritative information on more than 200 rivers from regional specialists. Includes full-color photographs and topographical maps to illustrate the beauty, major features, and uniqueness of each river system. Offers one-page summaries to help readers quickly find key statistics and make comparisons among rivers.

Rivers Laurie Burnham, Geoffrey H. Nash, 2007 Presents an introduction to rivers, describing how they were formed and how they have changed over time, and provides the history and description of ten of the world's most famous rivers.

Climate Change and Armed Conflict James R. Lee, 2009-09-10 This book examines the evolution of the relationship between climate change and conflict and attempts to visualize future trends. Owing to the accumulation of greenhouse gases in the atmosphere, current trends in climate change will not appreciably alter over the next half-century, even if drastic action is taken now. Changes in climate will produce unique types and modes of conflict, redefine the value of important resources, and create new challenges to maintaining social order and stability. This book examines the consequences of climate change and argues that it has and will produce two types of different types of conflict: cold wars and hot wars. Cold wars will occur in northern and southern

latitudes as warming draws countries into possible conflict due to expanding interests in exploiting new resources and territories inter state conflict Hot wars will break out around the equator as warming expands and intensifies dry areas increasing competition for scarce resources intra state conflict Conflict is not inevitable but it will also be a consequence of how states international institutions and people react to changes in climate Climate change and conflict have always shaped human experiences This book lays out the parameters of the relationship shows its history and forecasts its trends offering future conditions and opportunities for changing the historical path we are on This book will be of great interest for students of climate change and environmental security peace and conflict studies and IR security studies in general James R Lee is a Professor in the School of International Service American University Washington DC and Associate Director of American University s Center for Teaching Excellence He is author of several books on international relations including most recently *Exploring the Gaps Vital Links Between Trade Environment and Culture* 2000 Arctic National Wildlife Refuge U.S. Fish and Wildlife Service.
