, *Maya Calendar Origins* Prudence M. Rice, 2009-02-17 In *Maya Political Science Time Astronomy and the Cosmos* Prudence M Rice proposed a new model of Maya political organization in which geopolitical seats of power rotated according to a 256 year calendar cycle known as the May This fundamental connection between timekeeping and Maya political organization sparked Rice s interest in the origins of the two major calendars used by the ancient lowland Maya one 260 days long and the other having 365 days In *Maya Calendar Origins* she presents a provocative new thesis about the origins and development of the calendrical system Integrating data from anthropology archaeology art history astronomy ethnohistory myth and linguistics Rice argues that the Maya calendars developed about a millennium earlier than commonly thought around 1200 BC as an outgrowth of observations of the natural phenomena that scheduled the movements of late Archaic hunter gatherer collectors throughout what became Mesoamerica She asserts that an understanding of the cycles of weather and celestial movements became the basis of power for early rulers who could thereby claim control over supernatural cosmic forces Rice shows how time became materialized transformed into status objects such as monuments that encoded calendrical or temporal concerns as well as politicized becoming the foundation for societal order political legitimization and wealth Rice s research also sheds new light on the origins of the Popol Vuh which Rice believes encodes the history of the development of the Mesoamerican calendars She also explores the connections between the Maya and early Olmec and Izapan cultures in the Isthmian region who shared with the Maya the cosmovision and ideology incorporated into the calendrical systems **The Craft & Art Show Calendar #29** , *The PI (π) Cycle Secret of the 360-days year calendar*

Zodiac Calendars in the Dead Sea Scrolls and Their Reception Helen R. Jacobus, 2014-10-30 The ancient mathematical basis of the Aramaic calendars in the Dead Sea Scrolls is analysed in this investigation Helen R Jacobus re examines an Aramaic zodiac calendar with a thunder divination text 4Q318 and the calendar from the Aramaic Astronomical Book 4Q208 4Q209 all from Qumran Jacobus demonstrates that 4Q318 is an ancestor of the Jewish calendar today and that it

helps us to understand 4Q208 4Q209 She argues that these calendars were taught in antiquity as angelic knowledge described in 1 Enoch and the Book of Jubilees The study also encompasses Babylonian Hellenistic Byzantine astronomy and astrology and classical and Jewish writings Finally a medieval Hebrew zodiac calendar related to 4Q318 with an astrological text is published here for the first time **The Old Farmer's Almanac** Old Farmer's Almanac,2005 The Indian Astronomical Ephemeris ,2004 **Calendars in Antiquity** Sacha Stern,2012-09-06 Calendars were at the heart of ancient culture and society and were far more than just technical time keeping devices Calendars in Antiquity offers a comprehensive study of the calendars of ancient Mesopotamia Egypt Persia Greece Rome Gaul and all other parts of the Mediterranean and the Near East from the origins up to and including Jewish and Christian calendars in late Antiquity In this volume Stern sheds light on the political context in which ancient calendars were designed and managed Set and controlled by political rulers calendars served as expressions of political power as mechanisms of social control and sometimes as assertions of political independence or even of sub culture and dissidence While ancient calendars varied widely they all shared a common history evolving on the whole from flexible lunar calendars to fixed solar schemes The Egyptian calendar played an important role in this process leading most notably to the institution of the Julian calendar in Rome the forerunner of our modern Gregorian calendar Stern argues that this common evolutionary trajectory was not the result of scientific or technical progress It was rather the result of major political and social changes that transformed the ancient world with the formation of the great Near Eastern empires and then the Hellenistic and Roman Empires from the first millennium BC to late Antiquity The institution of standard fixed calendars served the administrative needs of these great empires but also contributed to their cultural cohesion *The Mysterious Wall Paintings of Teleilat Ghassul, Jordan: In Context* Bernadette Drabsch,2015-08-31 This volume is primarily concerned with the re analysis of the wall paintings from the Jordanian Chalcolithic period ca 4700 3700 BC settlement site of Teleilat Ghassul first excavated in 1929 by scholars from the Pontifical Biblical Institute Rome and latterly by Australians from the University of Sydney *Planetary and Lunar Coordinates for the Years 2001-2020* Great Britain. Nautical Almanac Office,Rutherford Appleton Laboratory,2000 Tabulation of essential astronomical information at a low precision level for planning purposes **Approaches to Language and Culture** Svenja Völkel,Nico Nassenstein,2022-08-22 This book provides an overview of approaches to language and culture and it outlines the broad interdisciplinary field of anthropological linguistics and linguistic anthropology It identifies current and future directions of research including language socialization language reclamation speech styles and genres language ideology verbal taboo social indexicality emotion time and many more Furthermore it offers areal perspectives on the study of language in cultural contexts namely Africa the Americas Australia and Oceania Mainland Southeast Asia and Europe and it lays the foundation for future developments within the field In this way the book bridges the disciplines of cultural anthropology and linguistics and paves the way for the new book series Anthropological Linguistics **A Portable Cosmos**

Alexander Jones,2017-01-02 From the Dead Sea Scrolls to the Terracotta Army ancient artifacts have long fascinated the modern world However the importance of some discoveries is not always immediately understood This was the case in 1901 when sponge divers retrieved a lump of corroded bronze from a shipwreck at the bottom of the Mediterranean Sea near the Greek island of Antikythera Little did the divers know they had found the oldest known analog computer in the world an astonishing device that once simulated the motions of the stars and planets as they were understood by ancient Greek astronomers Its remains now consist of 82 fragments many of them containing gears and plates engraved with Greek words that scientists and scholars have pieced back together through painstaking inspection and deduction aided by radiographic tools and surface imaging More than a century after its discovery many of the secrets locked in this mysterious device can now be revealed In addition to chronicling the unlikely discovery of the Antikythera Mechanism author Alexander Jones takes readers through a discussion of how the device worked how and for what purpose it was created and why it was on a ship that wrecked off the Greek coast around 60 BC What the Mechanism has uncovered about Greco Roman astronomy and scientific technology and their place in Greek society is truly amazing The mechanical know how that it embodied was more advanced than anything the Greeks were previously thought capable of but the most recent research has revealed that its displays were designed so that an educated layman could understand the behavior of astronomical phenomena and how intertwined they were with one's natural and social environment It was at once a masterpiece of machinery as well as one of the first portable teaching devices Written by a world renowned expert on the Mechanism A Portable Cosmos will fascinate all readers interested in ancient history archaeology and the history of science **Time of Death** Glenys
