Specimens of Bushmen Folklore Wilhelm Heinrich Immanuel Bleek,Lucy Lloyd,2001 This new edition of the long out of print classic collection of Bushman tales provides a fascinating look into the life of these little known people As Megan Biesele writes in her Foreword The fact that a family of trained linguists and their associates sat down between 1870 and 1884 with a group of

Xam people who had been temporarily sprung free of imprisonment in Cape Town's Breakwater Prison has immense potential consequences. San people today like indigenous peoples all over the world are quietly organizing educational futures for themselves which will make fine use of this record of the intellectual history of their culture. This edition reproduces the English text of the 1911 edition and is richly illustrated with photographs. *Teacher Proof* Tom Bennett, 2013-07-04 Tom Bennett is the voice of the modern teacher. Stephen Drew Senior Vice Principal Passmores Academy UK featured on Channel 4's *Educating Essex*. Do the findings from educational science ever really improve the day to day practice of classroom teachers? Education is awash with theories about how pupils best learn and teachers best teach, most often propped up with the inevitable research that proves the case in point. But what can teachers do to find the proof within the pudding and how can this actually help them on wet Wednesday afternoon? Drawing from a wide range of recent and popular education theories and strategies, Tom Bennett highlights how much of what we think we know in schools hasn't been proven in any meaningful sense at all. He inspires teachers to decide for themselves what good and bad education really is, empowering them as professionals and raising their confidence in the classroom and the staffroom alike. Readers are encouraged to question and reflect on issues such as the most common ideas in modern education and where these ideas were born, the crisis in research right now, how research is commissioned and used by the people who make policy in the UK and beyond, the provenance of education research, who instigates it, who writes it, and how to spot when a claim is based on evidence and when it isn't, the different way that data can be analysed, what happens to the research conclusions once they escape the laboratory. Controversial, erudite and yet unremittingly entertaining, Tom includes practical suggestions for the classroom throughout. This book will be an ally to every teacher who's been handed an instruction on a platter and been told the research proves it.

On the Aesthetics of Beowulf and Other Old English Poems John M. Hill, 2010-01-01 What makes one Anglo-Saxon poem better than another? Why does Beowulf still have the power to move us after so many centuries? What might have been aesthetically pleasing to Old English readers and writers of poetry? While there is an apparent consensus by scholars on a core of poems considered to be exceptional literary achievements, Beowulf, Judith, the Vercelli Book, there has been little systematic investigation of the basis for these appraisals. With new essays on rhetoric, wordplay, meter, structure, irony, form, psychology, ethos, and reader response, the contributors to this collection aim to find objective aesthetic qualities in Anglo-Saxon poetry. Posing questions of quality and beauty as discoverable in artefacts, *On the Aesthetics of Beowulf and Other Old English Poems* significantly advances our understanding not only of aesthetics and Old English poetry but also of Old English attitudes towards literature as an art form. [Advancing Cultural Astronomy](#) Efrosyni Boutsikas, Stephen C. McCluskey, John Steele, 2021-04-08 This collection of essays on cultural astronomy celebrates the life and work of Clive Ruggles, Emeritus Professor of Archaeoastronomy at Leicester University. Taking their lead from Ruggles' work, the papers present new research focused on three core themes in cultural astronomy: methodology, case studies, and

heritage Through this framework they show how the study of cultural astronomy has evolved over time and share new ideas to continue advancing the field Ruggles work in these areas has had a profound impact on the way that scholars approach evidence of the role of sky in both ancient and modern cultures While the papers span many time periods and regions they are closely connected by these three major themes presenting methodological investigations of how we can approach archaeological textual and ethnographic evidence describing detailed archaeoastronomical case studies or stressing the importance of global heritage management This work will appeal to researchers and scholars interested in the history and development of cultural astronomy **Sunrise Stories** Roger Riordan, Tozo Takayanagi, 1896 **Information**

Technologies and Social Orders Carl J. Couch, 2017-09-08 According to Carl J Couch the history of human society is one of successive sometimes overlapping information technologies used to process the various symbolic representations that inform social contexts Unlike earlier media theorists who ignored social context in order to concentrate on the information technologies themselves Couch implements a consistent theory of interpersonal and intergroup relations to describe the essential interface between information technologies and the social contexts in which they are used Couch emphasizes the formative capacities of information technologies across historical epochs and cultures and places them within the major institutional relations of various societies He views social orders as reflexively shaped by the information technologies that participants use and as susceptible to mass brutality and oppression due to oligarchic control though he hopes technology will remain humane The original edition of this manuscript was nearly complete at the time of Couch's death and was brought to completion by two of his closest associates Now after two decades during which its impact is indisputable it has been updated for a new generation of students and scholars Additions include discussions on books in the digital age social media mobile telephones recordings participatory culture and more **Inventing Los Alamos** Jon Hunner, 2014-08-04 A social history of New Mexico's Atomic City Los Alamos New Mexico birthplace of the Atomic Age is the community that revolutionized modern weaponry and science An instant city created in 1943 Los Alamos quickly grew to accommodate six thousand people scientists and experts who came to work in the top secret laboratories others drawn by jobs in support industries and the families How these people as a community faced both the fevered rush to create an atomic bomb and the intensity of the subsequent cold war era is the focus of Jon Hunner's fascinating narrative history Much has been written about scientific developments at Los Alamos but until this book little has been said about the community that fostered them Using government records and the personal accounts of early residents Inventing Los Alamos traces the evolution of the town during its first fifteen years as home to a national laboratory and documents the town's creation the lives of the families who lived there and the impact of this small community on the Atomic Age **Arboretum et fruticetum britannicum, or, The trees and shrubs of Britain, native and foreign, ... , and in landscape-gardening** John Claudius Loudon, 1854
