## **Sundancing The Art And Architecture Of James Lambeth:**

**Sundancing** James Lambeth, 1993 Anyone interested in the development of architecture over the past twenty years speculating on the future shape of our homes cities will enjoy this book on James Lambeth's work The designs are spirited varied complex showing incredible flexibility within the dictates of solar design Lambeth is among the wittiest most prophetic of the new breed of solar architects that emerged in the early seventies While developing a personal unique American style the resulting solar projects were among the most energy efficient ever created in the United States Lambeth's scope is wide with projects spanning the globe including mass housing designs for Tokyo Hong Kong Berlin Steamboat Springs Colorado Private residences adopt their character from their diverse respective environments from a desert compound in southern Nevada mountain lodges in Aspen Estes Park to a private home on the Intracoastal Waterway of East Florida His art has been a means of expressing clarifying his ideas His product designs range from furniture jewelry to solar efficient mobile homes This book is a beautiful visual documentation of James Lambeth's two decades of SUNDANCING More than 350 illustrations are included over 200 of them in full color [A Critical History of Contemporary Architecture](#) Elie G. Haddad, David Rifkind, 2016-12-05 1960 following as it did the last CIAM meeting signalled a turning point for the Modern Movement From then on architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi and gave rise to the first revisionary movement following Modernism Bringing together leading experts in the field this book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 It consists of two parts the first section providing a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects **The Greening of Architecture** Phillip James Tabb, A. Senem Deviren, 2017-03-02 Contemporary architecture and the culture it reflects dependent as it is on fossil fuels has contributed to the cause and necessity of a burgeoning green process that emerged over the past half century This text is the first to offer a comprehensive critical history and analysis of the greening of architecture through accumulative reduction of negative environmental effects caused by buildings urban designs and settlements Describing the progressive development of green architecture from 1960 to 2010 it illustrates how it is ever evolving and ameliorated through alterations in form technology materials and use and it examines different places worldwide that represent a diversity of cultural and climatic contexts The book is divided into seven chapters with an overview of the environmental issues and the nature of green architecture in response to them followed by an historic perspective of the pioneering evolution of green technology and architectural integration over the past five decades and finally providing the intransigent and culturally pervasive current examples within a wide range of geographic territories The greening of

architecture is seen as an evolutionary process that is informed by significant world events climate change environmental theories movements in architecture technological innovations and seminal works in architecture and planning throughout each decade over the past fifty years This time period is bounded on one end by the awareness of environmental problems beginning in the 1960 s the influential texts by Rachel Carson E F Schumacher Buckminster Fuller and Steward Brand and the impact of the OPEC Oil Embargo of 1973 and on the other end the pervasiveness of the necessary greening of architecture that includes systemic reforms in architectural and urban design land use planning transportation agriculture and energy production found in the 2000 s The greening process moves from remediation to holistic models of architecture Geographical landscapes give a global account of the greening process where some examples are parallel and sympathetic and others are in clear contrast to one another with very individuated approaches Certain events like the Rio Summit in 1992 and Kyoto Protocol in 1997 and themes such as the Hannover Principles in 2000 provide a dynamic ideological critique as well as a formal and technical discussion of the embodied and accumulative content of greening principles in architecture
