Architectural Design, Architectural Theory, History, and Criticism, Human Behavior, Professional Practice, Special Topics, Urban Design Theory and History Georgia Bizios, 1998 Manipulating the Sun, 2023-12-18 This volume puts two biblical miracles the Sun reversing its course in II Kings 20 8 11 Isaiah 38 8 Horologium Ahaz and the Sun standing still in Joshua 10 12 in the early modern period centre stage We pay special attention to the development of related imagery their role as anti Copernican arguments in text and image their reception their treatment in the mathematical sciences and their various cultural layers with a focus on the history of art and the history of science in the sixteenth and seventeenth centuries The material discussed spreads from rather prosaic mathematical reflections to highly appealing visual representations of the two miracles **The Clock** C. S. Wimmer, 2015-06-23 Gods voice whispers through the words of the prophet Isaiah I make known the end from the beginning from ancient times what is still to come Isaiah 46 10 NIV When warning his disciples about heaven and earth passing away Jesus said No one knows about that day or hour not even the angels in heaven nor the Son but only the Father Be on guard Be alert You do not know when that time will come Mark 13 32 33 NIV Are we to believe that God makes known the end from the beginning Or should we believe that the day and the hour are unknowable In truth these seemingly contradictory verses in Scripture are equally believable when time is viewed on two different clocks To date however humankind has relied solely on the 24 hour clock that secured residence within the human mind more than 8 000 years ago Humanitys one clock perspective of time is entirely useless in determining spiritual beginnings and endings Yet a different perspective emerges from the text of Genesis 1 which does in fact make known the end from the beginning The Clock revealed within the pages of this book will help the human spirit develop a healthy theology of time and not a moment too soon Through the lens of light color and image The Clocks colorful face revisits the past identifies the present and makes known the future while orienting the human mind on its journey through time If Jews and Christians desire additional insight into our shared spiritual beginnings we must discover The Clock in Genesis 1 and embrace a two clock perspective of time Once aware of a second timekeeping option the mystery surrounding many end times scenarios will be removed enabling us to travel together with confidence into our projected future Its time to understand the times Zodiac Calendars in the Dead Sea Scrolls and Their Reception Helen R. Jacobus, 2014-10-30 The ancient mathematical basis of the Aramaic calendars in the Dead Sea Scrolls is analysed in this investigation Helen R Jacobus re examines an Aramaic zodiac calendar with a

thunder divination text 4Q318 and the calendar from the Aramaic Astronomical Book 4Q208 4Q209 all from Qumran Jacobus demonstrates that 4Q318 is an ancestor of the Jewish calendar today and that it helps us to understand 4Q208 4Q209 She argues that these calendars were taught in antiquity as angelic knowledge described in 1 Enoch and the Book of Jubilees The study also encompasses Babylonian Hellenistic Byzantine astronomy and astrology and classical and Jewish writings Finally a medieval Hebrew zodiac calendar related to 4Q318 with an astrological text is published here for the first time *Reading the Human Body* Mladen Popović, 2007 Offering new reconstructions and interpretations of physiognomic and astrological texts from Qumran in comparison with Babylonian and Greco Roman texts this book gives a fresh view of their sense function and status within both the Qumran community and Second Temple Judaism

Irish National Inventory of Historic Scientific Instruments Charles Mollan, 1995-11-15 Carried out over a period of ten years this is a listing of scientific instruments dating before 1920 preserved in many collections throughout the island of Ireland It gives location date and description for each of the more than 5 000 entries together where appropriate with relevant accompanying detail It demonstrates clearly that Ireland has an important resource which hitherto had not been appreciated It also preserves information about collections which have since been lost sold or otherwise dispersed

Art, Artefacts and Chronology in Classical Archaeology William R. Biers, 2012-11-12 The museums of the world are full of statues and other artefacts of the Greeks and the Romans All are given a date But how are these dates arrived at What is the evidence This study provides the student with an introduction and explanation of the ways scholars date the archaeological remains of classical antiquity Specific examples from architecture sculpture and painting are presented and the different methods of dating them are explained These are supplemented with many original photographs and drawings Old and not so old problems in chronology are thus investigated and new theories reviewed from a fresh perspective

[The Pendulum Paradigm](#) Martin Beech, 2014 The pendulum is perhaps the simplest experimental devices ever constructed and yet for all its simplicity it has historically enabled scientists to both investigate and enumerate gravity the fundamental force that shapes the very universe The pendulum has also allowed astronomers and geologists to measure the motion mass and distribution of matter within the Earth and its stately swing is at the very heartbeat of time This book explores the many applications of the pendulum from its employment as a fundamental experimental device such as in the Cavendish torsion balance for measuring the universal gravitational constant to its everyday practical use in geology astronomy and horology

In Synchrony with the Heavens, Volume 1 Call of the Muezzin David King, 2004-02-01 This is the first investigation of one of the main interests of astronomy in Islamic civilization namely timekeeping by the sun and stars and the regulation of the astronomically defined times of Muslim prayer The study is based on over 500 medieval astronomical manuscripts first identified by the author now preserved in libraries all over the world and originally from the entire Islamic world from the Maghrib to Central Asia and the Yemen The materials presented provide new insights into the early development of the prayer ritual in Islam They also call

into question the popular notion that religion could not inspire serious scientific activity Only one of the hundreds of astronomical tables discussed here was known in medieval Europe which is one reason why the entire corpus has remained unknown until the present A second volume also to be published by Brill deals with astronomical instruments for timekeeping and other computing devices In Synchrony with the Heavens, Volume 2 Instruments of Mass Calculation David King, 2005-06-01 This is the first investigation of one of the main interests of astronomy in Islamic civilization namely timekeeping by the sun and stars and the regulation of the astronomically defined times of Muslim prayer The study is based on over 500 medieval astronomical manuscripts first identified by the author now preserved in libraries all over the world and originally from the entire Islamic world from the Maghrib to Central Asia and the Yemen The materials presented provide new insights into the early development of the prayer ritual in Islam They also call into question the popular notion that religion could not inspire serious scientific activity Only one of the hundreds of astronomical tables discussed here was known in medieval Europe which is one reason why the entire corpus has remained unknown until the present A second volume also to be published by Brill deals with astronomical instruments for timekeeping and other computing devices

Astronavigation K.A. Zischka, 2017-05-30 This book acts as a manual for the ancient methods of navigating by the stars which continue to provide the sailor or pilot with a timeless means of determining location Despite the prevalence of GPS a comprehensive set of formulae that can be evaluated on any inexpensive scientific calculator in the event of a catastrophic software or systems failure is a vital failsafe It also serves as a living link to centuries of explorers from centuries past Beginning with the basics of positional astronomy this guide moves on to the more complex math necessary to understand the ephemerides tables showing the future positions of the stars and planets These astronomical almanacs were the satellite navigation of their day The objective of this book is twofold to provide the reader with a concise comprehensible manual on positional astronomy as it applies to astro navigation and to furnish the concise algorithms for finding the position of the Sun and various navigational stars at any given instant In a world where too many mariners and aeronauts rely solely on technology and are vulnerable to solar flares electrical issues and the like this knowledge can be a life saving backup not to mention a fascinating study in its own rights Included is an exact mathematical way to determine your position in the air or on the sea far more quickly and accurately than by using the old celestial navigational method without even needing to know or understand the underlying mathematics There is even a section that teaches how to measure the azimuth of a star using an analog wrist watch so if a sextant gets damaged locating position is still possible This book offers mathematicians and adventurers a way to determine position when the skies go dark The U S Navy has recently realized that their electronic navigation systems are vulnerable to cyberattack and as a result has instructed the Naval Academy to begin teaching celestial navigation again The Provo International Conference on the Dead Sea Scrolls Donald Parry, Eugene Ulrich, 2018-12-24 This volume contains the published proceedings of the conference on the Dead Sea Scrolls held at Provo

Utah July 15 17 1996 Forty three articles all dealing with various aspects of the Scrolls are placed under the following divisions Technology Editions and Analyses of Texts The Qumran Community Calendar Levi and the Priesthood Messianism and Eschatology and Wisdom and Liturgy The volume offers the most recent scholarship on a number of issues and topics pertaining to the Qumran community newly translated biblical and non biblical texts and technological advances that assist scholars and researchers in accessing and studying the scrolls The section that pertains to technology for example focuses on DNA techniques to analyze Scroll fragments and an imaging radar system that has archaeological applications to Qumran and its environs Another section addresses the question of how and where the Qumranites lived and speaks concerning Qumran names

Creating Places of Power Nigel Pennick,2022-11-29 An exploration of the traditional rites of auspicious building and crafting Explains the ceremonial

beginnings and Hermetic principles in the laying out of foundations not only for sacred buildings like temples but also for homes and barns Examines the principles and ceremonies of electional astrology and details how to compute natural time as opposed to clock time Shares examples from ancient Egypt Iran India and Europe that range from the Stone Age to the Renaissance and include secret societies When we make things whether a building a sacred space or a magical object there is a precise moment when the artifact comes into being as a separate entity That moment in time possesses its own unique quality and because of this there is a right time to do something and a wrong time And as Nigel Pennick reveals we have the power to select favorable moments for our creations just as our ancestors did Illustrating ancient principles of divination chronomancy and electional astrology Pennick examines all the factors behind the ancestral art of geomancy the auspicious creation and alignment of sacred buildings as places of power Sharing examples from ancient Egypt Iran India and Europe that range from the Stone Age to the modern day including secret societies like the Rosicrucians and the Freemasons he explains how many cities were constructed on specially selected sites and founded ritually at precise predetermined moments Looking at the traditional rites of creating places of power Pennick explains the ceremonial beginnings and Hermetic principles in the laying out of foundations as well as the use of sacrifice in the building of many notable structures Examining the role of sacred geometry in geomancy Pennick explains the Hermetic meaning assigned to each direction in traditional European cultures as well as the principles of natural measures and the science of understanding lucky and unlucky days Revealing how geomantic principles are rooted in the structure of the world and the cosmic patterns of space and time the author shows how they transcend the ages and are just as meaningful today as they were to our ancestors

Sticks, Stones, and Shadows Martin Isler, 2001 What do the pyramids of Egypt really represent What could have driven so many to so great and often so dangerous an effort Was the motivation religious or practical Illustrated with more than 300 photographs and drawings this book presents an original approach to the subject of pyramid building It reveals the connection between devices that served both a practical need for survival and a spiritual belief in gods and goddesses It examines Egyptian technologies and techniques from the origins of pyramid development to the step by step details of how the ground was leveled how the site was oriented and how the stone was raised and placed to meet at a distant point in the sky Here the author also asks and answers questions virtually ignored for the last century He discloses for example the ancient use of shadows now denigrated to the ornamental back yard sundial but once an important tool for telling the height of an object geographical directions the seasons of the year and the time of day He also reinterprets the ancient stretching of the cord ceremony which once was thought to have only religious significance but here is shown as the means of establishing the sides of a pyramid

How Round Is Your Circle? John Bryant, Chris Sangwin, 2011-02-28 How do you draw a straight line How do you determine if a circle is really round These may sound like simple or even trivial mathematical problems but to an engineer the answers can mean the difference between success and failure How Round Is Your Circle invites readers to

explore many of the same fundamental questions that working engineers deal with every day it's challenging hands on and fun John Bryant and Chris Sangwin illustrate how physical models are created from abstract mathematical ones Using elementary geometry and trigonometry they guide readers through paper and pencil reconstructions of mathematical problems and show them how to construct actual physical models themselves directions included It's an effective and entertaining way to explain how applied mathematics and engineering work together to solve problems everything from keeping a piston aligned in its cylinder to ensuring that automotive driveshafts rotate smoothly Intriguingly checking the roundness of a manufactured object is trickier than one might think When does the width of a saw blade affect an engineer's calculations or for that matter the width of a physical line When does a measurement need to be exact and when will an approximation suffice Bryant and Sangwin tackle questions like these and enliven their discussions with many fascinating highlights from engineering history Generously illustrated How Round Is Your Circle reveals some of the hidden complexities in everyday things

Shadows Roberto Casati, 2004-08-10 In this original wide ranging and endlessly thought provoking work of popular nonfiction a leading science writer uncovers the pervasive presence of shadows in our world For Plato shadows were the symbol of our limitations For Galileo they knocked the Earth from the center of the cosmos They are a source of fear and a symbol of ignorance and they loom large in art and design mythology and folklore physics and metaphysics and architecture and urban planning From shadows puppets and the psychology of shadows to the role of shadows in astronomy and the influence of shadows on the architectural profiles of our cities Roberto Casati awakens our fascination in this tour de force of investigation and imagination

Time Granularities in Databases, Data Mining, and Temporal Reasoning Claudio Bettini, Sushil Jajodia, Sean Wang, 2013-06-29 Calendar units such as months and days clock units such as hours and seconds and specialized units such as business days and academic years play a major role in a wide range of information system applications System support for reasoning about these units called granularities in this book is important for the efficient design use and implementation of such applications The book deals with several aspects of temporal information and provides a unifying model for granularities It is intended for computer scientists and engineers who are interested in the formal models and technical development of specific issues Practitioners can learn about critical aspects that must be taken into account when designing and implementing databases supporting temporal information Lecturers may find this book useful for an advanced course on databases Moreover any graduate student working on time representation and reasoning either in data or knowledge bases should definitely read it
