Sundials Theory And Construction:

Sundials Albert Waugh,2012-09-06 A rigorous appraisal of sundial science includes mathematical treatment and pertinent astronomical background plus a nontechnical treatment so simple that several of the dials can be built by children 106 illustrations **Sundials, Their Theory and Construction** Albert E. Waugh,1990-01-01 **Sundials** ,1973 *Sundials* René R.J. Rohr,2012-09-06 Masterly account of long and colorful history of sundials with practical instructions for building your own Formulae rare dials mottoes and much more 104 figures 51 plates **A Shared Legacy** Emilia Calvo,2008 **In Synchrony with the Heavens, Volume 2 Instruments of Mass Calculation** David King,2005-06-01 This is the first investigation of one of the main interests of astronomy in Islamic civilization namely timekeeping by the sun and stars and the regulation of the astronomically defined times of Muslim prayer The study is based on over 500 medieval astronomical manuscripts first identified by the author now preserved in libraries all over the world and originally from the entire Islamic world from the Maghrib to Central Asia and the Yemen The materials presented provide new insights into the early development of the prayer ritual in Islam They also call into question the popular notion that religion could not inspire serious scientific activity Only one of the hundreds of astronomical tables discussed here was known in medieval Europe which is one reason why the entire corpus has remained unknown until the present A second volume also to be published by Brill deals with astronomical instruments for timekeeping and other computing devices *Tradition, Transmission, Transformation* Ragep,2023-09-20 This volume is the outcome of two conferences held at the University of Oklahoma in 1992 and 1993 which dealt with issues of transmission and subsequent cultural transformations that occurred in the premodern histories of mathematics and science Some twenty contributors explore transmission from a variety of perspectives including the role of language and other facets of culture in the transmission process the interaction of popular and elite science in transmission successful and less than successful episodes of scientific appropriation and the role of institutions in this process The volume uses the theme of transmission as a way to focus debate on the perennial issue of the continuity and discontinuity of ideas in the history of sciences **Sundials** R. Newton Mayall,Margaret W. Mayall,2012-06-14 Clear instructions for constructing a sundial on almost any surface and in virtually any position with information on materials Standard Time dials laying out hour lines and more 150 illustrations **Religion, Learning and Science in the 'Abbasid Period** M. J. L. Young,J. D. Latham,R. B. Serjeant,2006-11-02 The five centuries of the Abbasid period eighth to thirteenth centuries AD were the golden age of Arabic literature They saw the appearance not only of poetry and belles lettres which are covered in a previous volume but also of an extensive body of writings concerned with subjects ranging from theology and law to history and the natural sciences This volume of The Cambridge History of Arabic Literature surveys the most important of these writings including the literature of Sunnism and Shi'ism Arabic philosophy Sufism Islamic law grammar lexicography administration historiography mathematics astronomy astrology geography alchemy and medicine It contains

separate chapters on six of the greatest scholars of the Middle Ages as well as on the Arabic literature of the Christians and Jews who lived under the rule of the Abbasid caliphate and includes a study of one of the great cultural movements of the period the translations from Greek into Arabic

Mathematical Instrumentation in Fourteenth-Century Egypt and Syria François Charette, 2003-06-01 This volume contains the critical edition with English translation of a richly illustrated Arabic treatise on the construction of over one hundred various astronomical instruments many of which are otherwise unknown to specialists It was composed by Najm al D n al Misr a rather shadowy figure in Cairo ca 1330 The edition is accompanied by a detailed technical and historical commentary which is framed as a self standing essay on Islamic mathematical instrumentation While this essay commentary is mainly based on Najm al D n s treatise it also benefits from the consultation of a large number of previously unstudied manuscripts and includes a discussion of all relevant sources from the period 800 1500

Time in Early Modern Islam Stephen P. Blake, 2013-02-11 The prophet Muhammad and the early Islamic community radically redefined the concept of time that they had inherited from earlier religions beliefs and practices This new temporal system based on a lunar calendar and era was complex and required sophistication and accuracy From the ninth to the sixteenth centuries it was the Muslim astronomers of the Ottoman Safavid and Mughal empires who were responsible for the major advances in mathematics astronomy and astrology This fascinating study compares the Islamic concept of time and its historical and cultural significance across these three great empires Each empire while mindful of earlier models created a new temporal system fashioning a new solar calendar and era and a new round of rituals and ceremonies from the cultural resources at hand This book contributes to our understanding of the

Muslim temporal system and our appreciation of the influence of Islamic science on the Western world *Sundials* Hester Higton, 2001 This is an examination of the portable sundials used as timekeepers for three millennia The focus is on the sundials themselves but much reference is made to social political and economic history **Encyclopedia of the History of Arabic Science** Roshdi Rashed, 2019-08-08 The Arabic contribution is fundamental to the history of science mathematics and technology but until now no single publication has offered an up to date synthesis of knowledge in this area In three fully illustrated volumes the Encyclopedia of the History of Arabic Science documents the history and philosophy of Arabic science from the earliest times to the present day The set as a whole covers seven centuries Thirty chapters written by an international team of specialists from Europe America the Middle East and Russia cover such areas as astronomy mathematics music engineering nautical science and scientific institutions
