Portraits in the Andes Jorge Coronado, 2018-05-22 Portraits in the Andes examines indigenous and mestizo self representation through the medium of photography from the early to mid twentieth century As Jorge Coronado reveals these images offer a powerful counterpoint to the often slanted predominant view of indigenismo produced by the intellectual elite Photography offered an inexpensive and readily available technology for producing portraits and other images that allowed lower and middle class racialized subjects to create their own distinct rhetoric and vision of their culture The powerful identity marking vehicle that photography provided to the masses has been overlooked in much of Latin American cultural studies which have focused primarily on the elite s visual arts Coronado s study offers close readings of Andean photographic archives from the early to mid twentieth century to show the development of a consumer culture and the agency of marginalized groups in creating a visual document of their personal interpretations of modernity

The American Look Rebecca Arnold, 2009 Drawing on a wonderful array of sources from fashion magazines to department store records this book is the rich and absorbing narrative and analysis of how New York sportswear evolved to become the definitive American style
