### **Participatory Planning in the Caribbean: Lessons from Practice**

Robert Potter, Jonathan Pugh, 2018-05-08 This title was first published in 2003 Until recently planning and development in the Caribbean have been top down centre out and expert led For a few years now though the region has bowed to the global trend and has experimented with participatory planning methods Participatory planning is heralded by much of the development community as the most appropriate alternative strategy to the traditional approaches In this volume a range of experts drawn

from the Caribbean the United Kingdom and the United States review the current achievements and future prospects for genuinely participative planning in the Caribbean region at the beginning of the 21st Century Bringing together a wide range of case studies from both the insular Caribbean as well as mainland Central and South America the book examines issues such as protected area planning sustainable development councils gender and development inner city redevelopment and community empowerment *Decolonising the Caribbean* Inge Klinkers, Gert Oostindie, 2025-10-01 Much has been written on the post war decolonisation in the Caribbean but rarely from a truly comparative perspective and seldom with serious attention to the former Dutch colonies of Surinam the Netherlands Antilles and Aruba This study bridges both gaps In their analysis of Dutch decolonisation policies since the 1940s the authors discuss not only political processes but also development aid the Dutch Caribbean exodus to the metropolis and cultural antagonisms A balance is drawn both of the costs and benefits of independence in the Caribbean and of the outlines and results of the policies pursued in the non sovereign Caribbean by France the Netherlands the United Kingdom and the United States Race, Class, and Nationalism in the Twenty-First-Century Caribbean Scott Timcke, Shelene Gomes, 2024-11-01 This collection of more than a dozen essays focuses on the political dynamics of race class and nationalism in the contemporary Caribbean Despite the plethora of studies on nationalism in the Caribbean few have attempted to look at the phenomenon as a political invention that does not and cannot serve the interests of all how essentialist reductive overdetermining nationalism is a political and conceptual confusion that forever stalls the project of universal human emancipation Editors Scott Timcke and Shelene Gomes gather and frame chapters that in their collective expression help trace the process of race class and nationalism through the contours of a broader political economic and social geography These chapters argue that notions of racial identity have changed over time but those reformations are not independent of class rule or nationalism By using several case studies that span the Anglo Dutch French and Spanish Caribbean and focus on the development of political organizations hardships and ideology each of these essays continues the struggle for liberation against elite entrenchment **Encyclopedia of the Developing World** Thomas M. Leonard, 2013-10-18 A RUSA 2007 Outstanding Reference Title The Encyclopedia of the Developing World is a comprehensive work on the historical and current status of developing countries Containing more than 750 entries the Encyclopedia encompasses primarily the years since 1945 and defines development broadly addressing not only economics but also civil society and social progress Entries cover the most important theories and measurements of development relate historical events movements and concepts to development both internationally and regionally where applicable examine the contributions of the most important persons and organizations and detail the progress made within geographic regions and by individual countries Introduction to Latin America Peadar Kirby, 2003-06-04 This excellent textbook provides students of Latin America with a rich and deep analysis of the processes and outcomes of globalization past and present Diversity and difference are explored using vivid and detailed country profiles A strength of this textbook is

its ability to explain complex issues in a way that is engaging and informative. It provides conceptual frameworks for students to engage in independent analysis of the complexities of global forces as they impact on and interact with the local in different contexts. It also however engages with the issues of crucial importance for the lived realities of Latin American people: poverty, development, the state and resistance under changing political, economic and ideological conditions. An essential buy for serious students of Latin America.

**Anne Boran**, Chester College, University of Liverpool. This is an outstanding textbook which will appeal to a wide audience but especially those wishing to understand contemporary Latin America. I have been studying Latin America for over 40 years and wish I could have written such a lucid and engaging book.

**Dr Cristóbal Kay**, Institute of Social Studies, The Hague. Introduction to Latin America provides a completely new introduction to the political, social and economic forces shaping this essential region of undergraduate study today. It is the first textbook to place Latin America within a genuinely global context and introduce the debates and impact of globalization, neoliberalism, democratization and the environment. It fully reviews the traditional literature in the postwar period such as modernization or dependency theory to demonstrate the way in which Latin America has often been misunderstood and introduces more recent theorizing to consider the longer term prospects for equitable and sustainable development. Incorporating maps, case study boxes, summary exhibits and guides to further reading, Introduction to Latin America will be an essential text for all students of Latin America across politics, international studies, geography, sociology and development studies.
