Sunset Sensation:

Evidence and Religious Belief Kelly James Clark, Raymond J. VanArragon, 2011-07-28 A fundamental question in philosophy of religion is whether religious belief must be based on evidence in order to be properly held In recent years two prominent positions on this issue have been staked out evidentialism which claims that proper religious belief requires evidence and Reformed epistemology which claims that it does not Evidence and Religious Belief contains eleven chapters by prominent philosophers which push the discussion in new directions The volume has three parts The first part explores the demand for evidence some chapters object to it while others seek to restate it or find space for compromise between Reformed epistemology and evidentialism The second part explores ways in which beliefs are related to evidence that is ways in which the evidence for or against religious belief that is available to a person can depend on that person s background beliefs and other circumstances The third part contains chapters that discuss actual evidence for and against religious belief Evidence for belief in God includes the so called common consent of the human race and the way that such belief makes sense of the moral life evidence against it includes profound puzzles about divine freedom which suggest that it is impossible for a being to be morally perfect

between perception and the world it demonstrates the value of Merleau Ponty's insights for philosophy of perception today. The author focuses on two main topics: the contents and the nature of perception. In the first half of this book, the author tackles debates about the content of perception, namely what sorts of properties or features of the world reveal themselves to us in perception and in what modes. Drawing on Merleau Ponty's description of perceptual sense, the author argues that perception has a unique kind of content which cannot be adequately described in terms of sensations or concepts. He then shows how this account of perceptual sense can clarify debates about the richness of perceptual content, including whether we can perceive moral properties. In the second half, he turns to the nature of perception. Here he argues that Merleau Ponty's account of perceptual intentionality makes available a powerful combination of the core insights of two main contemporary approaches to this question: realism and intentionalism. The author shows how this combination can be developed, defends it from objections, and explains how it is equipped to deal with problems posed by the existence of illusions and hallucinations. *Merleau Ponty and Contemporary Philosophy of Perception* will appeal to scholars and advanced students working on phenomenology and the philosophy of perception.
