

A photograph of a person with curly, light-colored hair, seen from the back and slightly to the side. They are wearing a bright red jacket. On the back of the jacket, there is a white, diamond-shaped patch with the words "Lost Americana" printed in a bold, black, serif font. The person is standing behind a blue, pointed-top fence. The background is a clear blue sky with some power lines and a utility pole visible on the left.

Heaman,David Tough,2020-09-17 Canadians can never not argue about taxes From the Chinese head tax to the Panama Papers from the National Policy to the Canada United States Mexico Agreement tax grievances always inspire private resentments and public debates But if resentment and debate persist the terms of the debate have continually altered and adapted to reflect changing social economic and political conditions in Canada and the wider world The centenary of income tax is the occasion for Canadian scholars to wrestle with past and present debates about tax equity efficiency and justice Who Pays for Canada explores the different ways governments can and should tax their peoples and evaluates how well Canada has done so It brings together a diverse group of perspectives from academia law economics political science history geography philosophy and accountancy and from the wider world of activists and public servants It asks how Canada compares to other countries and how other countries especially the United States influence Canadian tax policies It also surveys internal tax tensions and politics through the lenses of region and jurisdiction as well as race class and gender Reasoning from tax perplexities and reforms in the past and the present it argues that fair taxation requires an informed populace and a democratically inclined public will Above all this book serves as a reminder that it is not only what counts as fair that is important but how fairness is evaluated Revealing how closely tax policy is tied to mainstream politics human rights and morality Who Pays for Canada represents new perspectives on a matter of tremendous national urgency **Zion's Hope**,1906 **Federal Trade Commission Decisions** United States. *Farewell To The Good Old Days* David R. Greatrix,2018-11 Farewell to the Good Old Days is a lively and intimate tale by David Greatrix a man who has lived a dynamic professional life first as an aerospace engineer and then as a professor of the subject The book leaning heavily on the actual life experiences of Greatrix and a number of his academic colleagues close and far away is divided into two discrete parts the book s narrator for both parts is nominally a fictional consolidated representation of Greatrix drawing from various sources in addition to the author Part One covers the narrator s childhood and early adulthood followed by his moving into his years of growth as a professional breaking into the challenging field of aerospace engineering Part Two tracks the narrator s subsequent twenty five year academic career as a professor of aerospace engineering at a university in a major urban centre Prominent in this story are the many challenges the narrator encounters in his navigation of academe in a high profile setting for engineering education In an emotional narrative that never strays far from various shades of humour the narrator shares the details of his teaching and research experience at his institution frequently bumping up against the pointy bits of an

evolving cosmopolitan academic culture In colourful detail the narrator reveals the small successes notable failures unexpected events and crushing disappointments that describe his tenure at his university The narrator is especially candid in his revelations about episodes of betrayal He takes aim at big targets including the Canadian government university administrators and the academic superstructure as a whole The result is an enlightening view into an individual s complicated experience in a demanding world that serves as a microcosm of society at large

**Course Correction** Paul W. Gooch, 2019-03-01 Course Correction engages in deliberation about what the twenty first century university needs to do in order to re find its focus as a protected place for unfettered commitment to knowledge not just as a space for creating employment or economic prosperity The university s business Paul W Gooch writes is to generate and critique knowledge claims and to transmit and certify the acquisition of knowledge In order to achieve this a university must have a reputation for integrity and trustworthiness and this in turn requires a diligent and respectful level of autonomy from state religion and other powerful influences It also requires embracing the challenges of academic freedom and the effective governance of an academic community Course Correction raises three important questions about the twenty first century university In discussing the dominant attention to student experience the book asks Is it now all about students Secondly in questioning What knowledge should undergraduates gain it provides a critique of undergraduate experience advocating a Socratic approach to education as interrogative conversation Finally by asking What and where are well placed universities the book makes the case against placeless education offered in the digital world in favour of education that takes account of its place in time and space
