deals with the effects of hearing impairment on communication and psychosocial functioning Section 3 considers the individual in their environment their family work and leisure Section 4 elaborates on the process of enablement in a non prescriptive manner The authors approach the problems and needs from the standpoint of what the patient client is seeking Enablement is seen as a team effort between the professionals the patient and their family in an ever changing environment This entails using any relevant techniques to ensure the well being of the individual with hearing impairment that end remains very much their goal The book also has a companion website www.wiley.com/go/stephens which hosts additional downloadable documents as well as a demonstration of the concept of the signal to noise ratio *Enhancing Communication Skills of Deaf & Hard of Hearing Children in the Mainstream* James J.
