Crime, Drugs and Social Theory Chris Allen, 2017-03-02 Do criminal cultures generate drug use *Crime Drugs and Social Theory* critiques conventional academic and policy thinking concerning the relationship between urban deprivation crime and drug use Chris Allen outlines an innovative constructionist phenomenological perspective to explore these relationships in a new light He discusses how people living in deprived urban areas develop natural attitudes towards activities such as crime and drug use that are prevalent in the social worlds they inhabit and shows that this produces forms of articulation such as I don't know why I take drugs I just take them and drugs come naturally to me He then draws on his constructionist phenomenology to help understand the natural attitude towards crime and drugs that emerge from conditions of urban deprivation as well as the non-reasoned forms of articulation that emerge from this attitude The book argues that understanding the conditions in which drug users deviate from their natural attitude can help effective intervention in the lives of drug users

by Rodney Benson 4 Rogers Brubaker Nick Crossley and John Myles Indeed it is the 1985 article by Rogers Brubaker that can truly be said to have served as one of the best introductions to Bourdieu's thought for the American social scientific public It is for this reason that we include it in the present collection Intellectual origins orientations We begin by providing an overview of Bourdieu's life as a scholar and a public intellectual The numerous obituaries and memorial tributes that have appeared following Bourdieu's untimely death have revealed something of his life and career but few have stressed the intersection of his social origins career trajectory and public intellectual life with the changing political and social context of France This is precisely what David Swartz's In memoriam attempts to accomplish In it he emphasizes the coincidence of Bourdieu's young and later adulthood with the period of decolonization the May 1968 French university crisis the opening up of France to privatization of many domains previously entrusted to the state that providence and most threatening to post World War II reforms the emergence of globalization as the hegemonic structure of the 21st century An orienting theme throughout Bourdieu's work warns against the partial and fractured views of social reality generated by the fundamental subject object dichotomy that has plagued social science from its very beginning
