While there is a growing body of research on the effect of board gender diversity on firm performance, existing empirical evidence remains inconclusive and have yielded conflicting performance. **existing studies provided support for women's presence on the board (Almouzni et al., 2016; Arora et al., 2015; Kim and Soenen, 2016; Liu et al., 2014; Nguyen et al., 2015; Ragozzini, 2016; Xu et al., 2017), whereas other studies found no link between board gender diversity and firm performance (Carter et al., 2010; Ghosh et al., 2019; Huseini and Ibrahim, 2019; and firm performance (Carter et al., 2010; Miller and del Carmen Torres, 2019) and at times, a negative relationship (Almouzni and Ferreira, 2019; Arora and Dey, 2019; Liu et al., 2019; Torjesen et al., 2019). The mixed results of past studies could be due to the data from different countries, time periods or measures of firm performance (Almouzni et al., 2015; Li and Liu, 2016). Based on a contingency approach, the effect of board gender diversity on firm performance may be strengthened or weakened depending on the characteristics of the organizational environment, such as organizational size, industry, and country (Van Knippenberg et al., 2014). firm size, industry, and country (Van Knippenberg et al., 2014) and expert degree (Gompers et al., 2017) and expert degree. Consequently, researchers call for studies on the role of board gender diversity in the impact of gender diversity on firm performance to be more specific, which condition "board diversity improves firm performance" (Gompers et al., 2017; Li and Chen, 2018; Miller and del Carmen Torres, 2019). The effects of board diversity on firm performance tend to be positive or negative. In our literature stream, arguments of board diversity on firm performance are inconclusive.**

Arasa, 2017-05-05 This book examines the concept of the democratization of governance in universities in Kenya with particular emphasis on students involvement in governance processes and decision making Data were collected from members of the student community utilizing a structured self administered questionnaire and from purposively selected key informants and focus group discussants drawn from Kenyatta University representing the public sector and the United States International University representing the private sector The guiding argument for the study was that shared governance one of the principles of good governance is critical in enabling the universities to deliver their visions and the missions effectively The results revealed that while in principle Kenyan universities have embraced democratic governance in which all stakeholders including students have a role to play in practice they continue to violate the core principles of good governance particularly shared governance Specifically students who are major stakeholders in university education are largely excluded from significant structures of governance thereby limiting their influence and participation Although their representation is mainly provided via student self governance organs unions associations and or councils their effectiveness is undermined considerably by the lack of trust and confidence of the student body and the unending manipulation by top university administrators and external political actors Student active involvement in decision making is mainly confined to lower levels such as the school faculty and departmental programme The authors call for a paradigm shift in the involvement of students in the governance of universities in ways that discourage the current culture of tokenism and political correctness that characterizes public and private universities in Kenya *Resources in Education*, 1996-10
