Human Language Technology. Challenges for Computer Science and Linguistics Zygmunt Vetulani, Hans Uszkoreit, Marek Kubis, 2016-07-29 This book constitutes the refereed proceedings of the 6th Language and Technology Conference Challenges for Computer Science and Linguistics LTC 2013 held in Poznań, Poland in December 2013. The 31 revised and in many cases substantially extended papers presented in this volume were carefully reviewed and selected from 103 submissions. The papers selected to this volume belong to various fields of Human Language Technologies and illustrate a large thematic coverage of the LTC conferences. To make the presentation of the papers possibly transparent, we have structured them into 9 chapters. These are: Speech Processing, Morphology, Parsing, Related Issues, Computational Semantics, Digital Language Resources, Ontologies and Wordnets, Written Text and Document Processing, Information and Data Extraction, and Less Resourced Languages.

Structuring Lexical Data and Digitising Dictionaries, 2024-10-28 In order to guarantee open access and full searchability, research in historical lexicography and lexicology must follow the same directions as the evolution of the Internet, which has moved from hypertext-based resources to more significant services and products stored and disseminated through databases and more recently through knowledge bases. Against this background, this book addresses specific questions like: What is involved in the digitisation of linguistic data? What annotation systems can give rise to datasets compatible with knowledge bases? What standards are needed to reach full searchability? What sources and methods can be used to gather the lemmas of a historical dictionary? What determines the obsolescence of lexicographical resources?

Dictionaries. An International Encyclopedia of Lexicography Rufus Gouws, Ulrich Heid, Wolfgang Schweickard, Herbert Ernst Wiegand, 2013-12-18 The basis for this additional volume are the three volumes of the handbooks *Dictionaries: An International Encyclopedia of Lexicography* HSK 5 1 5 3 published between 1989 and 1991. An updating has been perceived as an important desideratum for a considerable time.

In the present Supplementary Volume the premises and subjects of HSK 5 1 5 3 are complemented by new articles that take account of the practice internal and theoretical developments of the last 15 years Special attention has been given to the following topics the status and function of lexicographic reference works the history of lexicography the theory of lexicography lexicographic processes lexicographic training and lexicographic institutions new metalexicographic methods electronic and especially computer assisted lexicography Academic Press Dictionary of Science and Technology Christopher G.
