Demetriou, 2012-12-22 The papers in this collection written by a cross regional group of experts provide insights into the causes of declining levels of citizen participation and other distinct forms of civic activism in Europe and explore a range of factors contributing to apathy and eventually disengagement from vital political processes and institutions At the same time this volume examines informal or unconventional types of civic engagement and political participation corresponding to the rapid advances in culture technology and social networking The volume is divided into three interrelated parts Part I consists of critical essays in the form of theoretical approaches to analysing weakening political participation and citizen estrangement Part II is dedicated to an exploration of the role and deployment of technologically advanced media such as the internet as determinants of changing patterns of political participationist behaviour Finally Part III presents findings of empirical research on the issue of political participation Combining theoretical and empirical perspectives the book contributes towards a better understanding of the disquieting trend of voter apathy and disenchantment with politics in the context of the ongoing process of European integration and offers a variety of analytical tools for decoding both the emergence of alternative conceptualizations of citizenship and other forms of meaningful civic and political engagement *Political Participation in France and Germany* Oscar W. Gabriel, Silke I. Keil, Eric Kerrouche, 2013-07-01 How do France and Germany compare in the world of participatory political communities This volume sets out an impressive historical theoretical and institutional framework for a comprehensive comparative and empirical analysis of the forms patterns trends and determinants of citizen participation in two of Europe's largest democracies Written by an international team of political scientists it starts with an outline of the participatory traditions in both countries before turning to the theoretical foundations of empirical research regarding the role of political participation in modern democracies It provides an overview of how the perception of political participation has changed over the years and the forms of both conventional participation particularly with regard to electoral participation and unconventional

Politics and Democracy in Microstates Wouter Veenendaal,2014-10-17 Why are small states statistically more likely to have a democratic political system By addressing this question from a qualitative and comparative methodological angle this book analyses the effects of a small population size on political competition and participation By comparing the four microstates of San Marino Europe St Kitts and Nevis Caribbean Seychelles Africa and Palau Oceania it provides fresh and stimulating insight concluding that the political dynamics of microstates are not as democratic as commonly believed Instead it is found in all four cases that smallness results in personalistic politics dominance of the political executive patron client relations between citizens and politicians and the circumvention of formal political institutions In addition the book suggests that the study of formal institutions provides an incomplete image of microstate democracy and that informal characteristics of politics in microstates also need to be explored in order to better explain the influence of smallness on democracy This book will be of key interest to scholars and students of democracy democratization regional and decentralization studies and comparative politics

NGOs and Global Trade Erin Hannah, 2016-01-29 In a deeply iniquitous world where the gains from trade are distributed unevenly and where trade rules often militate against progressive social values human health and sustainable development NGOs are widely touted as our best hope for redressing these conditions As a critical voice of the poor and marginalized many are engaged in a global struggle for democratic norms and social justice Yet the potential for NGOs to bring about meaningful change is limited This book examines whether improvements in participatory opportunities for progressive NGOs results in substantive and normative policy change in one of the major trading powers the European Union Hannah advances a constructivist account of the role of NGOs in the EU's trade policymaking process She argues that NGOs have been instrumental in providing education raising awareness and giving a voice to broader societal concerns about proposed trade deals both when they take advantage of formal participatory opportunities and when they protest from the streets and in the media However the book also highlights how NGO inputs are mediated by the social structure of global trade governance Epistemes the background knowledge ideological and normative beliefs and shared assumptions about how the world works determine who has a voice in global trade governance Showing how NGOs succeed only when their advocacy conforms broadly to the dominant episteme this book will be of value to scholars and students with an interest in NGOs and international trade negotiations It will also be of interest to policymakers national trade negotiators government departments and the trade policy community

Institutional Cosmopolitanism Luis Cabrera, 2018-09-25 Is a global institutional order composed of sovereign states fit for cosmopolitan moral purpose Cosmopolitan political theorists challenge claims that states nations or other collectives have ultimate moral significance They focus instead on individuals on what they share and on what each may owe to all the others They see principles of distributive justice and increasingly political justice applying with force in a global system in which billions continue to suffer from severe poverty and deprivation political repression interstate violence and other ills Cosmopolitans diverge widely however on the institutional implications of their shared moral view Some argue that the current system of competing sovereign states tends to promote unjust outcomes and stands in need of deep structural reform Others reject such claims and contend that justice can be pursued through transforming the orientations and conduct of individual and collective agents especially states This volume brings together prominent political theorists and International Relations scholars including some skeptics of cosmopolitanism in a far ranging dialogue about the institutional implications of the cosmopolitan approach Contributors offer penetrating analyses of both continuing and emerging issues around state sovereignty democratic autonomy and accountability and the promotion and protection of human rights They also debate potential reforms of the current global system from the transformation of cities and states to the creation of some encompassing world government capable of effectively promoting cosmopolitan aims
