Unfolding Crisis in Assam's Tea Plantations Deepak K. Mishra, Vandana Upadhyay, Atul Sarma, 2014-03-21 As the Indian economy integrates into global circuits of production exchange and accumulation the burdens of adjustment are shared unequally by different sectors classes and regions This study unravels the livelihood strategies and living conditions of labour in the tea gardens of Assam The tea sector has been undergoing a crisis since the 1990s with stagnant production decline in exports and closures of many tea gardens leading to large scale retrenchments in the labour force Based on a detailed analysis of secondary data and primary field research the study examines the extent types and implications of inter generational occupational mobility or immobility among tea garden labourers in Assam In the process it reflects on how even a sector that had brought capital and labour from outside and contributed significantly to the country's export earnings failed to create dynamic growth linkages within the local economy The experience of the labour force in the Assam tea sector the authors argue is important for making sense not only of the development dynamics of the region but of the contradictory ways in which forces of globalisation and neo liberal reforms have been reshaping the worlds of labourers in the margins The book will be of interest to students and scholars of labour studies development studies management studies and studies of north east India as well as to policy makers and those in the tea industry

India & World Geography YCT Expert Team, 2021 22 UPSC IAS All PCS India World Geography

Water Management and Inclusive Growth of Agriculture Prof. Bharat Daga Patil, 2021-02-02 INTRODUCTION Employing nearly on half of the world's workforce agriculture is clearly of great economic and social importance An incredible variety of methods is used globally the Western world has the latest scientific and industrial advancements at its disposal yet in some parts of the Third World a living is made using tools that have hardly changed in two thousand years Thus the study of agriculture geography is clearly important The subject may be simply defined Agricultural geography seeks to describe and explain spatial variations in agricultural activity over the earth's surface The heart of this task is to explain the great diversity of agriculture It has been estimated that there are over 250 million farmers in the world Between them they grow many different crops at least 1000 species are in use and they raise these crops in a variety of ways Thus on some British farms aircraft spray the land with pesticides and computers control the day to day running of the farm yet in parts of the Middle East fellahin still raise wheat with implements little changed since biblical times Equally great are the differences in organization and social conditions Many farmers in Britain or the USA are rich and successful owning their land in parts of Latin America peons toil on land they do not own under conditions not far removed from slavery Even more striking are the differences in productivity One American farm worker can produce enough food to feed nearly fifty other people yet throughout Africa and Asia many farmers are hard pressed to feed themselves and their families David Grigg 1995
