Sagalyn, Princeton New Jersey a town typical of the affluent suburbs arising in so many communities today is surveyed by a team of urban affairs experts Housing problems are studied in light of their political and economic implications **The affluent Suburb: Princeton** George Sternlieb,1971

Privilege, Power, and Place Stephen Richard Higley,1995 In the first analytical study of where the American upper class lives and vacations Stephen R Higley explores the ways in which upper class residential places are created and maintained Drawing on the Social Register as a main source of data Higley examines the intersection of class status and geography and demonstrates the ways in which physical proximity solidifies upper class consciousness The Affluent Suburb George Sternlieb,1971 **Public health reports** ,2002 *The Politics of Joint University and Community Housing Development* Richard Sobel,2014-07-10 The Politics of Joint University and Community Housing Development Cambridge Boston and Beyond informs and encourages the understanding and creation of community university housing It reveals the political and technical dynamics of joint housing development involving both communities and universities Community university housing projects have been built in several cities and planned in others Since Cambridge Massachusetts home of Harvard and MIT contains outstanding examples of community university housing the book focuses on the projects there since the 1960s It also discusses a major project in Mission Hill near Harvard Medical School in Boston along with brief examinations of a number of other projects Through the Cambridge and Boston cases the author explores the historical political and economic reasons for developing community housing There residents asked the universities to help solve the city housing problems to which the institutions had contributed Since community housing involved a process as well as a result in describing how the housing was built the book focuses on the role of community participation in the development process The study contributes to the understanding of the issues in several ways First two people well acquainted with community university housing and politics introduce the study with insightful forewords Second the study provides details of the development process that will be useful to other community university groups Third it explores university responsibility rhetoric versus reality and the educational values of community housing participation Fifth the lessons and suggestions provide insights and inspiration for others Finally the epilogue explains the development of the study This study will be particularly helpful for other cities and university communities encountering housing problems The features and information here will interest a wide range of community university and other urban groups The issues discussed will become increasingly relevant as more people move into attractive areas near universities It is also pertinent to institutions like hospitals that also have community and housing problems and to civic groups that can help solve a range of housing problems This book explains the politics of community university housing development in ways that encourage others to address and solve similar problems **The Ecology of Welfare** George Sternlieb,2018-04-17 The basic ecology of human groups the relationship between the distribution of

population and material resources and the resultant social and cultural patterns is a subject which has occasioned far more talk than down to earth research Filling this gap George Sternlieb and Bernard Indik consider one dimension of human ecology the interplay between housing and outlook between the physical realities of a dwelling unit and the attitudes and responses of its inhabitants Their book *The Ecology of Welfare* presents a detailed description of the housing and housing problems of one special subgroup New York City s welfare recipients in the 1970 s **Environment** Jules Pretty,2006-06-23 This four volume set explores the locations where the environment matters most such as where people are poor where environments are under threat such as on frontiers where there are few natural resources remaining and where industrialization is rampant It will also explore these concerns at different system levels from local community to regional national and global It will also explore costs of damage to the very resources on which economies rely and the values of environmental goods and services and the controversies surrounding such valuations It is organized around environment people interactions livelihoods poverty income economic growth environment environment interactions do people matter and people people interactions collective action challenges institutions *Health Services Reports* ,2002 Restructuring the Philadelphia Region Carolyn Adams,2008-08 Restructuring the Philadelphia Region offers one of the most comprehensive and careful investigations written to date about metropolitan inequalities in America s large urban regions Moving beyond simplistic analyses of cities versus suburbs the authors use a large and unique data set to discover the special patterns of opportunity in greater Philadelphia a sprawling complex metropolitan region consisting of more than 350 separate localities With each community operating its own public services and competing to attract residents and businesses the places people live offer them dramatically different opportunities The book vividly portrays the region s uneven development paying particular attention to differences in housing employment and educational opportunities in different communities and describes the actors who are working to promote greater regional cooperation Surprisingly local government officials are not prominent among those actors Instead a rich network of third sector actors represented by nonprofit organizations quasi governmental authorities and voluntary associations is shaping a new form of regionalism
