The Age Of Realism:

The Age of Realism Frederick William John Hemmings, Giovanni Carsaniga, 1974 The Realism-Antirealism Debate in the Age of Alternative Logics Shahid Rahman, Giuseppe Primiero, Mathieu Marion, 2011-09-22 The relation between logic and knowledge has been at the heart of a lively debate since the 1960s On the one hand the epistemic approaches based their formal arguments in the mathematics of Brouwer and intuitionistic logic Following Michael Dummett they started to call themselves antirealists Others persisted with the formal background of the Frege Tarski tradition where Cantorian set theory is linked via model theory to classical logic Jaakko Hintikka tried to unify both traditions by means of what is now known as explicit epistemic logic Under this view epistemic contents are introduced into the object language as operators yielding propositions from propositions rather than as metalogical constraints on the notion of inference The Realism Antirealism debate has thus had three players classical logicians intuitionists and explicit epistemic logicians The editors of the present volume believe that in the age of Alternative Logics where manifold developments in logic happen at a breathtaking pace this debate should be revisited Contributors to this volume happily took on this challenge and responded with new approaches to the debate from both the explicit and the implicit epistemic point of view **Calvino and the Age of Neorealism** , 1990-08 Italo Calvino s reputation as one of the great writers of our century rests chiefly on his allegorical fables and fantastic narratives whose inventiveness irreverence and elegant style are universally admired In this study the author focuses on Calvino s first novel *The Path to the Nest of Spiders* 1947 because in it she discerns a critical point of origin for Calvino s entire ethics of writing She shows how in *The Path* he challenges the poetics of objectivity of the Italian neorealists movement and offers a complex and ironic representation of the anti Fascist armed resistance in Italy Situating Calvino s early work in its historical and cultural context the author reassesses Italian neorealism in terms of the theories and critical debates about realism of such critics as Lukacs Sartre Brecht Adorno and Barthes She analyzes neorealism s narrative practices and cultural and political implications while setting neorealism in the context of the resistance and the postwar Reconstruction in Italy and giving readings of major neorealist texts novels by Pavese and Vittorini films by Rossellini Visconti and others as well as relatively obscure minor ones The heart of the book consists of readings of *The Path* from four different but intersecting critical perspectives formalist narratological sociohistorical psychoanalytic and Bakhtinian The readings assess the importance of Calvino s beginnings for the body of his work and incorporate relevant references to his later fiction and critical essays Out of these multiple readings the ironic estrangement of the real through the act of writing itself emerges as his key narratological strategy Writing Management Barbara Czarniawska-Joerges, 1999 Barbara Czarniawska is one of the most original of contemporary writers on organizations Sceptical of scientific claims and explanations of the social world she advocates an approach that draws on narrative literary theory cultural studies and anthropology rather than positivist social science arguing that the social sciences are a system of institutionalized reflection

whereas business and public organizations represent institutionalized action Recognizing the spread and influence of management studies and management writing Czarniawska poses the question of what written form this institutionalized reflection might take She reviews some key organizational texts to show how the art of persuasion as opposed to the presentation of facts can be deployed In *Writing Management* Barbara Czarniawska explores a number of the related issues and reflects on the growth and claims of management studies She writes about the relationship between facts and metaphors stories and data and how these may be represented in genres ranging from scientific reports to belles lettres This provocative and engaging perspective on organizations and organization studies will be vital reading for anybody who is part of either
