The Ages Of Man Medieval Interpretations Of The Life Cycle:

The Ages of Man Elizabeth Sears, 1986-01-01 *Death and Purgatory in Middle English Didactic Poetry* Takami Matsuda, 1997 The concept of Purgatory in Middle English didactic writings is explored through examination of visions of the afterlife sermons homiletic treatises and lyrics **Religion and life cycles in early modern England** Caroline Bowden, Emily Vine, Tessa Whitehouse, 2021-10-12 Religion and life cycles in early modern England assembles scholars working in the fields of history English literature and art history to further our understanding of the intersection between religion and the life course in the period c 1550 1800 Featuring chapters on Catholic Protestant and Jewish communities it encourages cross confessional comparison between life stages and rites of passage that were of religious significance to all faiths in early modern England The book considers biological processes such as birth and death aspects of the social life cycle including schooling coming of age and marriage and understandings of religious transition points such as spiritual awakenings and conversion Through this inclusive and interdisciplinary approach it seeks to show that the life cycle was not something fixed or predetermined and that early modern individuals experienced multiple overlapping life cycles **A Cultural History of Women in the Middle Ages** Kim M. Phillips, 2015-04-02 The medieval era has been described as the Age of Chivalry and the Age of Faith but also as the Dark Ages Medieval women have often been viewed as subject to a punishing misogyny which limited their legal rights and economic activities but some scholars have claimed they enjoyed a rough and ready equality with men The contrasting figures of Eve and the Virgin Mary loom over historians interpretations of the period 1000 1500 Yet a wealth of recent historiography goes behind these conventional motifs showing how medieval women s lives were shaped by status age life stage geography and religion as well as by gender A Cultural History of Women in the Middle Ages presents essays on medieval women s life cycle bodies and sexuality religion and popular beliefs medicine and disease public and private realms education and work power and artistic representation to illustrate the diversity of medieval women s lives and constructions of femininity **A Companion to The Book of Margery Kempe** John Arnold, Katherine J. Lewis, 2004 A collection of essays by twelve historians and literary critics who explore Margery Kempe her Book and her world **Old Age in the Middle Ages and the Renaissance** Albrecht Classen, 2012-02-14 After an extensive introduction that takes stock of the relevant research literature on Old Age in the Middle Ages and the early modern age the contributors discuss the phenomenon of old age in many different fields of late antique medieval and early modern literature history and art history Both Beowulf and the Hildebrandslied both Wolfram von Eschenbach s Parzival and Titarel both the figure of Merlin and the trans European tradition of Perceval Peredur Parzival then the figure of the vetula in a variety of medieval French English and Spanish texts and of the Old Man in The Stricker s Daniel both the treatment of old age in Langland s Piers the Plowman and in Jean Gerson s sermons are dealt with Other aspects involve late antique epistolary literature early modern French farce in light of Disability Studies the social role of old impotent men in sixteenth

and seventeenth century Netherlandish paintings and the scientific discourse of old age and health since the 1500s The discourse of Old Age proves to have been of central importance throughout the ages so the critical examination of the issues involved sheds intriguing light on the cultural history from late antiquity to the seventeenth century *The Meanings of Sex Difference in the Middle Ages* Joan Cadden, 1995-03-31 This book examines how scientific ideas about sex differences in the later Middle Ages participated in cultural assumptions about gender *Bede and the End of Time* Peter Darby, 2016-04-15 Bede c 673-735 was the leading intellectual figure of the Anglo Saxon Church and his writings had a profound influence on the development of English Christian thought Among the many issues he wrote about eschatology the study of the day of judgment and the end of time was a recurring theme Whilst recent research has furthered our knowledge of this subject in the later Middle Ages Dr Darby's book provides the first comprehensive analysis of Bede's eschatological thought and its impact upon the Anglo Saxon period Taking account of Bede's beliefs about the end of time this book offers sophisticated insights into his life his works and the role that eschatological thought played in Anglo Saxon society Close attention is given to the historical setting of each source text consulted and original insights are advanced regarding the chronological sequence of Bede's writings The book reveals that Bede's ideas about time changed over the course of his career and it shows how Bede established himself as the foremost expert in eschatology of his age The eight chapters of this book are organised into three main thematic groups the world ages framework Bede's eschatological vision and Bede's eschatological perspective It will be of interest to those studying early medieval history theology or literature as well as anyone with a particular interest in Bede and Anglo Saxon England **Father Chaucer** Samantha Katz Seal, 2019-09-26 The monograph series Oxford Studies in Medieval Literature and Culture showcases the plurilingual and multicultural quality of medieval literature and actively seeks to promote research that not only focuses on the array of subjects medievalists now pursue in literature theology and philosophy in social political jurisprudential and intellectual history the history of art and the history of science but also that combines these subjects productively It offers innovative studies on topics that may include but are not limited to manuscript and book history languages and literatures of the global Middle Ages race and the post colonial the digital humanities media and performance music medicine the history of affect and the emotions the literature and practices of devotion the theory and history of gender and sexuality ecocriticism and the environment theories of aesthetics medievalism When Geoffrey Chaucer is named the Father of English poetry an inherent assumption about paternity is transmitted Chaucer's fatherhood is presented as a means of poetic legitimization a stable mode of authority that connects the medieval author with all the successive generations of English writers This book argues however that for Chaucer himself paternity was a far more fraught ambition one capable of devastating male identity as surely as it could enshrine it Moving away from anachronistic assumptions about reproduction and authority this book argues that Chaucer profoundly struggled with his own desire to create something that would last past his own death For Chaucer also believed that men were the

humble mortal playthings of an all too distant God Medieval Christianity taught that the earth was but a temporary sorrowful abode for corrupted men and that the fall from grace was reborn within each generation of Adam's sons Chaucer knew that God had set sharp limits upon man's ability to create with certainty and to determine his own posterity Yet what could be more human than the longing to wrest some small authority from one's own mortal flesh This book argues that this essential intellectual ethical and religious crisis lies at the very heart of Chaucer's Canterbury Tales Within this masterpiece of English literature Chaucer boldly confronts the impossibility of his own aching wish to see his offspring biological and poetic last beyond his own death to claim the authority simultaneously promised and denied by the very act of creation Loyola's Acts
