The Albatrob Of Midway Island A Natural History Of The Laysan Albatrob:

The Albatross of Midway Island Mildred L. Fisher, 1970 Scientifically accurate this story of the Laysan Albatross is told from the point of view of the young bird as he begins life and as he matures to adulthood A unique and little known bird the Laysan spends most of its life at sea roaming tens of thousands of miles of ocean The adults whose life span is as much as thirty years return to land each winter to reproduce and raise their young After its initial departure from Midway at about five months of age the young bird does not return to breed for seven or eight years Mildred L Fisher the wife of Harvey I Fisher a noted zoologist who has conducted extensive research on the Albatross at the invitation of the Office of Naval Research has accompanied her husband on many trips to Midway and has served as his research assistant From her experience she has developed a respect and affection for the goonies which she feels is outside the scope of scientific data It is her desire here to present to all readers interested in natural history a personable view of this interesting and unusual bird The result is a story of the Laysan Albatross told with imagination and feeling Illustrated with over sixty black and white photographs

Albatross Graham Barwell, 2013-10-15 At length did cross an Albatross Through the fog it came As if it had been a Christian soul We hailed it in God s name The introduction of the albatross in Samuel Taylor Coleridge s *The Rime of the Ancient Mariner* remains one of the most well known references to this majestic seabird in Western culture In *Albatross* Graham Barwell goes beyond Coleridge to examine the role the bird plays in the lives of a wide variety of peoples and societies from the early views of north Atlantic mariners to modern encounters by writers artists and filmmakers Exploring how the bird has been celebrated in proverbs folk stories art and ceremonies Barwell shows how people marvel at the way the albatross soars through the air covering awe inspiring distances with little effort thanks to its impressive wingspan He surveys the many approaches people have taken to thinking about the albatross over the past two hundred years from those who devoted their lives to these birds to those who hunted them for food and sport and discusses its place in the human imagination Concluding with a reflection on the bird s changing significance in the modern world Barwell considers threats to its continued existence and its prospects for the future With one hundred illustrations from nature film and popular culture *Albatross* is an absorbing look at these beautiful birds

Avian Biology Donald

Farner, 2012-12-02 Avian Biology Volume VIII assesses selected aspects of avian biology. It is generally the conceptual descendant of Marshall's earlier treatise *Biology and Comparative Physiology of Birds* but is more than simply a revision of it. This volume consists of two relatively lengthy diverse chapters that focus on adaptive significance of coloniality in birds and fossil records of birds. In particular, this volume looks into group phenomena related to central place systems, that is, systems in which one or more individuals move to and from a centrally located place in the course of daily activities. It also addresses selective factors that have been suggested to explain why individuals should form colonies rather than disperse within the available foraging space. This book will be useful as a reference material for advanced students and instructors in this field of interest.
