What exactly is Time Time has often been counterpoised by the notion of Eternity as just that place wherever it is that is timeless Recently some physicists have sought to comprehend the universe as just one among many or has denied the existence of Time outright Through a use of Friedrich Nietzsche's thought of the Eternal Recurrence of All Things once made compatible with Christian orthodoxy's notion of time and eternity when combined with the latest in modern physics the author posits here a new theory of Time that can account for human freedom in the midst of a deterministic world while at the same time explaining the Uncertainty Principle and how Reality became what it is With Time given ontological priority all of our suspicions about lack of objectivity in scientific method are revealed as justified while the hitherto indecipherable nature of the cosmos and the role a Deity might have in it are explained God and Eternity is a brilliant intellectual tour de force that puts natural theology on an equal footing with post modern wonderment and enlightenment at an historical moment when a host of crucial questions are being asked anew
