

Burden of Choice: A Qualitative Study of Healthcare Professionals' Reactions to Ethical Challenges in Humanitarian Crises**End-of-Life Dilemmas**While we have addressed some of the main legal and ethical scenarios that you are likely to face as a healthcare administrator, one deserves a bit more examination. End-of-life dilemmas include a myriad of different topic areas ranging from euthanasia to assisted suicide to advance directives.**Euthanasia**Euthanasia is loosely defined as "mercy killing," where individuals with deteriorating health and with no hope of improvement are provided with some relief. The primary area of contention is whether the patient is dying from his or her incurable disease and to offer, only to the dying patient, the option of euthanasia. What this means is that a patient with an incurable disease who is not dying should not have the option of euthanasia. Due to changing societal norms and minimal legislative support for or against euthanasia, the matter has become muddled and administrators often turn to whether the patient is of sound mind to make end-of-life decisions.**Physician-Assisted Suicide**Physician-assisted suicide requires a voluntary physician to aid patients in killing themselves. Perhaps the most famous name in physician-assisted suicide is Dr. Jack Kevorkian who developed a device to bring about death quickly and without pain. He assisted an Alzheimer's disease patient to commit suicide and was subsequently charged with first-degree murder. Those charges were later dismissed as there were no federal laws deeming assisted suicide as illegal. As with euthanasia, there are shifting opinions regarding assisted suicide too. Further, the Supreme Court maintains that assisted suicide of terminally ill patients is a state decision.**Advance Directives**The Patient Self-Determination Act of 1990 stipulates that patients have the right to make decisions about their healthcare, including treatment options and decisions that may need to be made in the future. Advance directive, also known as living wills or durable power of attorney, gives the patient a voice in his or her medical care should he or she becomes incapacitated at a later date. Such documents are written when the patient is sound and competent and detail his or her wishes for treatment should he or she become unable to communicate. This is a particularly important document to healthcare professionals as it allows them to provide appropriate intervention without interference from external parties. There are a number of legal and ethical issues that you may come across if you pursue career in hospital administration. However, following the directives set forth by patients via living wills, for example, and adhering to state and federal regulations for end-of-life care ensure patient's respect, death with dignity, and protection from legal and ethical wrongdoings.**Living Will**Displays an example of a living will.[Review the following example of a living will \(Phongar, 2018\).](#)[Example of a Will](#)[opens in new window](#)**Additional Materials**From your course textbook, *Legal and Ethical Issues for Health Professionals*, review the following chapter:– *End-of-Life Dilemmas*From the South University Online Library, review the following articles:– *Recording Advance Decisions to Refuse Treatment: Physicians, Specialised to Support and to Be Consulted in Case of Euthanasia- Dying with Dignity-Physician Assisted Suicide in India: A Critical Review of Legal Facts***MHA6060 Week 2 Discussion Instructions**Before beginning work on this discussion forum, please review the link "Doing Discussion Questions Right" and any specific instructions for this topic.Your initial posting should be addressed at 300-500 words.
