The Japanese Professor Gregory S. Poole, 2010-01-01 This monograph is a substantial contribution to our knowledge of the internal workings of a Japanese university focussing on the world view of the professor In this anthropological case study of a private university in urban Tokyo conducted through extended participant observation Gregory Poole at once both an insider and outsider tells an ethnographic story that explicates a professoriate s working world The author addresses one basic problem how do Japanese professors configure their working world In answering this research question he demonstrates how the present climate of competition and restructuring means that faculty members in Japan are faced with the challenge of culturally translating largely western concepts of the university while steadfastly preserving their own local culture of higher education

The Emotions Helena Wulff, 2024-11-01 Emotions are a loaded topic From love and hate to grief fear and envy emotions are increasingly understood as driving forces in social life The Emotions A Cultural Reader applies a cross cultural perspective on emotions It examines the fact that emotions are socially and culturally constructed while highlighting problems of comparison and translation of local terms and emotional experiences Are emotions cultural or universal To what extent are there culturally distinct emotions The Emotions closes the traditional Western gap where emotions are separated from rationality and thought the heart versus mind debate By presenting both classic essays and new cutting edge chapters from anthropology sociology and psychology with important contributions from philosophy and neuroscience the volume connects a rich range of cross cultural studies to form a thriving interdisciplinary debate on emotions

The Concept of Academic Freedom Kevin McGuinness, 2002 Academic freedom comprises two inter related rights one belonging to educational institutions particularly universities and the other to the scholars whom they employ This work surveys a variety of approaches taken toward academic freedom related issues around the world though concentrating mainly on the UK including control over hiring promotion tenure course content assessment student evaluation of the faculty deviation from orthodox methodology and revisionism

Lives in Context Ardra L. Cole, J. Gary Knowles, 2001 The reflexive turn in qualitative research has transformed the process of doing life history research No longer are research subjects examined through the lens of the all knowing but supposedly invisible researcher As Ardra Cole and Gary Knowles point out in this fresh introduction to conducting life history research the process is now one of mutuality empathy sensitivity and caring The

authors carry the novice researcher through the steps of conducting life history research from conceptualizing the project to the various means of presenting results with an eye toward understanding the complex relationship between participant and researcher and how that shapes the project. In addition to examples from their own research, Cole and Knowles bring in the work of a dozen novice researchers who explain the challenges they faced in developing their own life history projects in a wide variety of settings. Well written, interesting, and pedagogically sound, *Lives in Context* is the ideal text for teaching life history research to students and an important reference for the bookshelf of all qualitative researchers.
